## Lesson-I

## Learning Objective

- The objective of this lecture is to introduce the subject "Financial Accounting" to the students and give them an idea as to how did accounting develop.

## What is Financial Accounting?

- It is the maintenance of daily record of ALL financial transactions in such manner that it would help in the preparation of suitable information regarding the financial affairs of a business or an individual.

## Why is Financial Accounting Needed?

- The need for recording financial transactions arises because the individual or business wants to know the performance and to assist the person in making decisions related to the business.

## What Are Transactions?

- In accounting or business terms, any dealing between two persons involving money or a valuable thing is called transaction.
- Human beings are social animals and are bound to adopt a community living style. Living in a community, essentially means that people interact with other people and are dependant on each other to fulfil their needs.
- Every person cannot fulfil all his needs like food, clothing, housing etc. on his own. He, therefore, depends on other people to provide him with some of his needs, in return to him providing others with some of theirs.
- This means that to get something on has to give something in return. Every instance where one 'gives something' to 'get something' is called a transaction.

## How Did it Develop?

- Nearly all developments happen because of human being's need for the same. Accountancy is no different.
- Times when goods were bartered or exchanged. When the concept of money was introduced, it became a little more difficult.
o Example of the Shepherd.
0 Budgeting - the old custom of keeping separate "Potlees" by the elders for household and other expenses. Today's Business budgeting is on the same lines.
0
What is a Budget?
- Budget is a plan of income, expenses \& other financial operation for a future period.

## Concept of Costing.

- A person making or producing any thing must not only know how much it costs to make but also to help in determining the selling price.
- It is necessary that the person not only knows the cost of what is being produced but also the cost of each component which has gone into production
- The control of the costs being incurred is also necessary otherwise the same can exceed the estimates.
- All this is only possible if the costs and data relating to production is properly recorded and analysed. An exercise that the Accountant only can carry out.

## Impact of IT on Accounting.

- The old "Munshi," who kept record of the financial dealings was the original accountant. But he is now of no use, as the need for analysis of information recorded and forecasting based there on, is a capability the "Munshi" lacks.
- In fact, there is no need for any expert in writing of books. Information Technology has taken over. But some one has to tell the Software developer how books are written.
- The need for an Accountant who is well versed in the art of writing up books still remains. The role has changed. Information Technology software can now produce the reports and analysis but the expert to interpret all of this remains.
- The need for the professional to describe this has not been overtaken by Information Technology.

## Barter Trading and Barter Transactions.

- Trading one commodity or service for another commodity or service is called 'Barter Trading'.
- Every transaction where goods are exchanged for goods is called a 'Barter Transaction'.
- Since every person cannot produce every thing that he needs. Therefore, he needs to give / sell what he produces to get / buy what he wants.
- In early days when 'money' was not invented, people used to exchange goods for goods.
- This kind of trade, where goods are exchanged for goods, is called barter trade. In fact, in barter trade, value of one commodity is quoted in terms of other commodity, for example the price of 10 kg of wheat may be 2 meters of cloth or 5 litres of milk.
- Although, there is no involvement of money but still every commodity has a value, which means that, you have to give a specific quantity of one commodity to buy a specific quantity of another commodity

## Money Measurement Concept.

- With the passage of time, the trading volumes and types of commodities available in the market increased and it became increasingly difficult to exchange commodity with commodity.
- That is why the concept of cash / money came in and people started valuing all goods / services in terms of a common commodity called money. Now the price of 10 kg wheat would be Rupees 60 and not 2 meters of cloth.
- Similarly the price of 2 meters of cloth and 5 litres of milk would also be Rupees 60 .
- In accounting, every transaction that is worth recording is recorded in terms of money.
- In other words any event or item that cannot be translated in terms of money is not recorded in books.

## Cash and Credit Transactions.

- Translating every transaction in terms of money does not always mean that the money changes hands, the same time at which the transaction takes place. It may be paid before or after the goods are exchanged.
- When the money value of an item being purchased is paid, at the same time the item is exchanged. The transaction is said to be a cash transaction.
- On the other hand, if the payment is delayed to a future date, the transaction is termed as a credit transaction.

## Different Types of Business Organizations

- Sole Proprietorship

A business owned and run by a single person

- Partnership

A business owned and run by more than one persons.

- Limited Company

A large organization with separate legal status.

## Lesson-2

## Learning Objective

- The evolution of accounting started in the previous lecture continues with a slight emphasis on how actual record keeping started. In addition, some basic concepts like capital, profit, and budget are introduced.

## Different Types of Business Entities

- Commercial Organizations (Profit Oriented)
o Sole proprietor
o Partnership
o Limited companies
- Non-Commercial Organizations (Non-Profit Oriented)
o NGO's (Non-government Organizations)
0 Trusts
0 Societies

## The Basic Concept of Record Keeping

- We can maintain a diary of transactions and note the daily transactions like sale, purchase etc. in it.

## Problems Faced in Maintaining Diary of Transactions

- How will we come to know the income and expenses from various sources?
- We only have a sheet / page on which daily transactions are listed.
- We do not know which product is selling better and which is not.

## Available Alternate

- One can go through all the transactions at the end of the month and note the different types of transactions on different pages.
- So that every page gives total for a different type of transaction like sales of different products and expenses of different types

## Diary of Transactions

| Transactions of Jan 20-- |  |
| :--- | :---: |
| P a r t i c u l a r s | Rs. |
| Sold 5 nos. of Item A | 1,000 |
| Purchased 10 nos. of Item B | $(15,000)$ |
| Sold 1 no. of Item C | 2,000 |
| Electricity bill paid | $(1,500)$ |
| Sold 1 no. of Item A | 500 |
| Sold 2 nos. of Item B | 4,000 |
| Sold 5 nos. of Item A | 1,000 |
| Purchased 10 nos. of Item B | $(15,000)$ |
| Sold 1 no. of Item C | 2,000 |
| Telephone bill paid | $(1,000)$ |
| Salary paid | $(1,500)$ |

- Now try to go through these transactions and separate, transactions of different types.
- But what if the number of transactions is large?

Is it really possible to go through hundreds or thousands of transactions at the month end and analyse them to obtain required results.

## Cash and Credit Transactions

- Sales and purchase are not always for cash. Some times the payment / receipt is delayed to a future date (Sale/purchase for "UDHAR")
- The diary that we have discussed above, records cash transactions only.
- The "UDHAR" (credit) transactions may be noted in separate diary.
- Now we have two diaries. One for cash and one for credit.
- We need to know total sales and purchases (both cash and credit) and other information like the amount that is payable and receivable.
- How will we get our required results now?
- Do we need another diary to combine information from both these diaries?
- But when we receive or pay cash for the credit transactions will we again record the transactions on the day, when cash is received or paid? If so, where?
- So the problems keep on increasing with the size or volume of business. But one thing is becoming certain and that is that an accurate reflection of business transacted can only be obtained if both cash and credit transactions are recorded in such a manner that there is no duplication and yet the transactions are completely recorded. This is possible only under Commercial Accounting.

## Commercial Accounting

- Commercial Accounting is done through a system that is known as Double entry book keeping.

## Single Entry and Double Entry Accounting

- Single entry accounting/Cash accounting.

0 This system records only cash movement of transactions and that too up to the extent of recording one aspect of the transactions.
0 This means that only receipt or payment of cash is recorded and no separate record is maintained (about the source of receipt and payment) as to from whom the cash was received or to whom it was paid.

- Double entry book keeping/Commercial accounting.
o Double entry or commercial accounting system records both aspects of transaction i.e. receipt or payment and source of receipt or payment.
0 It also records credit transactions. Example of Electricity Bill
- This concept will be explained in detail in the next lectures but for the time being it should be noted that in cash accounting date of receipt / payment of actual cash is important while in commercial accounting the date on which the expense is caused, whether paid or not, as well as the spreading of the cost of certain items over their useful life becomes important.

## Capital

- No business can run without money or resources being invested therein.
- Whatever money or resources from ones' own pocket are put in a business is referred to as CAPITAL.
- This capital or investment must earn a return or profit on its use even if it is coming out of ones' pocket.
- This return is also known as PROFIT. So no capital should be without a profit or a return.
- Also, no Capital even if coming from the business owner can be without cost. Why? Because if the same sum that was used in a business was put in the bank or used to buy Defence Savings or National Savings Certificates, a certain amount of profit would have been earned. By putting this money in business, a return must be expected.

## Money Value of Time

- Another important concept to remember in all businesses is that of MONEY VALUE OF TIME.
- Time spend by the owner also has value; he should be remunerated for it.(The time of the proprietor or business persons spent on the business is also a business cost and must be paid for by the business in addition to the profit)
- Why? Because if the business person had employed somebody else in his place, the person would be paid a salary.
- Therefore, a business person's time and money both have costs attached to them. Nothing is free nor should be expected to be free of cost.

## Goodwill

- Then there is something called GOODWILL.
- This is simply the value attached to the good reputation earned through good, clean conduct of business over a number of years.
- This good reputation also has a value and becomes part of investment in business

## Is Cash in Hand Our Profit?

- Not unless we have deducted from it the total amount of expenses that are accrued or are on credit and added to it the sale made on credit for which cash is to be received at a later date. The simple equation for calculation of profit would thus be:

Cash Sale-Cash Payment + (Credit Sale-Credit Expense)

- Also remember that certain items have a long life and will be used during that time to earn more money for business. The cost of such items will as be spread over their life and also accounted for accordingly in the above equation.
- More on this in later lectures.

## Budget

- Budgeting is another important aspect of business planning.
- The budget is made to ensure that there is at least a balance between Income earned and the expenses incurred on earning this income in the first instance, and to provide a reasonable return on the capital used in the business.
- However, if there is a shortfall between of Income as against expense, it means that more is being spent and less earned.
- Decisions will be required to bring the situation to balance or if it cannot be so then to arrange for loans or more capital to ensure business continues.
- But business cannot be run on loans and these must be repaid.
- Budget Is an Organization's Plan of a Future Period Expressed in Money Terms.

## Learning Objective

After attending this lecture, the students should be able to:

- Distinguish between Cash Accounting and Accrual Accounting;
- Understand what is

## 0 Income

0 Expenses
o Profit or Net Profit

- Distinguish between Cash in Hand and Profit.
- Distinguish between Capital Expenses and Revenue Expenses; and
- Understand what is Liability

## Cash Accounting and Accrual Accounting

## Cash Accounting

All dealing relating to cash (there is no concept of credit)

- It is the accounting system in which events are recorded when actual cash / cheque is received or paid.
- Let's take the example of utility bills like electricity, telephone etc. The bill of January is received on 15th February and paid on 25th February. If the organization is following cash accounting practice it will record the expense of electricity / telephone on 25th February.
- The same principle applies for income and other transactions as well i.e. income is recorded when cash is actually received instead recording when it is earned.

## Accrual Accounting

- It is the accounting system in which events are recorded as and when they occur.
- This means that income is recorded when it is earned and expense is recorded when incurred i.e. the organization has obtained the benefit from it.
- Consider the same example. The electricity is utilized in the month of January so the expense should be recorded in the month of January. Similarly the company that is providing the electricity should record the income in the month of January.

## Income

- Income is the value of goods or services that a business charges from its customers.
- Businesses can be distributed in two major categories. One that provides / sells goods and the other that provides services. If the organization is commercial then these goods or services will always be provided at some price. This price at which these goods / services are provided is the income of the organization, providing the goods / services.

## Expenses

- Expenses are the costs incurred to earn revenue.
- In order to earn revenue, one has to spend some money such as the cost of goods that are sold or the money paid to the individuals who are providing services plus other costs. These costs that are incurred / spent by the business to earn the revenue are the expenses of the business.

## Profit or Net Profit

- Net income or Net Profit is the amount by which the income exceeds expenses in a specific time period. OR
- Profit is what is left of the income after all expenses, paid and incurred, have been deducted from it.

## Net Profit $=$ Income - Expenses

## Cash in Hand and Profit

- We have said that profit is what is left of income after deducting the expenses.
- Is it the income received in cash less the expenses paid in cash? Or do we have to consider other things as well?
- It can be explained with the help of following example.
- A trader purchases some goods from a supplier for Rs. 1,500 and promises to pay in two weeks time. (Remember credit transactions from lecture 02).
- The same day he sells these to a customer for Rs. 2,000 who pays Rs. 1,000 and promises to pay the balance amount after one week.
- Now at the end of the day, the trader has Rs. 1,000 in his hand. After one week, he will have another Rs. 1,000 and he will pay Rs. 1,500 after two weeks.
- What is profit? Is Rs. 1,000 that he has in his hand on day one is his profit.
- The answer is No. He still has to receive Rs. 1,000 and pay Rs. 1,500 to the supplier plus any other expenses that he may have incurred in the process of this trade.
- His actual profit is Rs. 500 less any other expenses that he incurs, which is the difference of the total amount that he receives from customer and the amount that he pays to the supplier less other expenses.
- What we understand form this example is that cash in hand is not always the profit. To work out the profit we have to consider the total income and total expenses irrespective of the fact that actual payment has been made or not.

## Capital and Revenue Expenses

- We have established, to calculate the profit, all expenses are deducted from income.
- Are all payments that we make are expenses and have to be deducted from the income?
- Consider the different types of payments that could be made by a business organization. The payments could be for utility bills, salaries, fuel bills or purchase of vehicle, furniture etc.
- Out of the types discussed above utility bills, salaries and fuel bill are the payments for which the organisation has already enjoyed the benefit. Whereas vehicle and furniture are the types from which the company will derive the benefit for a long time.
- If the payment made for vehicles and furniture is subtracted from the income of the period in which payment was made, the profit for that period will be too low. Whereas in the future period when the item will still be providing benefit to the company there will be no expense to match the benefit.
- This means that we have to distinguish between the payments / expenses that provide benefit to the company immediately and those that last for a longer period.
- In accounting the expenses that provide benefit immediately are called "Revenue Expenses" and those expenses whose benefit last for a longer period are called "Capital Expenses".

## Liabilities

- Liabilities are the debts and obligations of the business.
- Liability is the obligation of the business to provide a benefit or asset on a future date.
- We have discussed credit transactions. Whenever a person purchases something on credit he promises to pay for the goods on a future date. This is his obligation to pay cash at a future date and thus it becomes his liability.

## Lesson-4

## Learning Objective

- The objective of this lecture is to develop an understanding in the students about the basic concepts like:
o The separate business entity,
o Single and double entry book-keeping,
o Debit and Credit
o The dual aspect of a transaction,
o Accounting equation

## Separate Entity Concept

- In accounting, ‘The Business' is treated independently from the persons who own it.
- This means, although anything owned by the business belongs to the owners of the business and anything owed by the business is payable by the owners but for accounting purposes, we assume that the business is independent from its owners.
- This means, if the business purchases a machine or piece of equipment, business will own and obtain benefit from that equipment. Likewise, if the business borrows money from 'someone' it will have to repay the money. This 'someone' includes even the owner of the business.
- This treatment of the business independently from its owners is called the 'Separate Entity Concept'. We will discuss this concept again in detail when we study the different types of business entities.

## Single Entry Book-Keeping

- This is the conventional style of keeping records
- In single entry book keeping system, as it is clear from the name, only one aspect of the transaction is recorded.
- This actually is not a system but is a procedure by which small business concerns, like retailers and small shopkeepers, keep record of their sale / income.
- In this system, there are usually two to three registers "Khata". In one register cash received from customers is recorded, whereas the other one is a person-wise record of goods sold on credit "Udhar Khata". There may or may not be a register of suppliers to whom money is payable.
- That means, only one aspect of transaction i.e. either cash receipt or the fact that money is receivable from someone is recorded.

## Double Entry Book-Keeping

- The concept of double entry is based on the fact that every transaction has two aspects i.e. receiving a benefit and giving a benefit.
- The accounting system that records both the aspects of transaction in books of accounts is called double entry system.
- The account that receives the benefit is debited and the account that provides the benefit is credited.
- 'Debit' and 'Credit' are denoted by ' Dr ' and ' Cr ' respectively.
- The ultimate result of the system is that for every Debit $(\mathrm{Dr})$ there is an equal $\mathrm{Credit}(\mathrm{Cr})$.

## Single \& Double Entry Book-Keeping Distinguished

- The double entry system is a more sophisticated, comprehensive and reliable form of single entry book keeping system.
- Single entry system records only one aspect of the transaction such as:
o Cash received from sale is recorded in cash register only,
o Goods sold on credit are recorded in the individual's account only,
o When cash is received from the customer, to whom something was sold on credit, the receipt may just be recorded in the account of individual only.
0
- Double entry system records both the aspects of the transaction;
o When good are sold on cash the two aspects of the transaction are - the seller has sold goods and received cash against them. The goods sold are benefit transferred to the purchaser (Credit) whereas the cash against the goods is benefit received (Debit).
o When the goods are sold on credit the benefit given is the same i.e. goods sold but the benefit received is not cash but a right to receive cash from the customer. Therefore, in this case Debit is given to customer's account instead of cash.
0 When cash is received from the customer the right to receive cash ceases. So, the benefit received is cash and benefit transferred is the right to receive cash. Here cash will be debited and customer will be credited.
- Adopting the double entry accounting system can, therefore, have following benefits:

0 Every transaction has equal Debit and Credit; hence the total of all Debit accounts will be equal to the total of all Credit accounts at any given time. This serves as a quick test of mathematical accuracy of book keeping.
0 Since all aspects of transactions are recorded, therefore, the books are more informative. In the example discussed, the trader, if he keeps double entry books, will know the exact figure of total sale, cash in hand and receivable from customers from their respective accounts at any desired time.

## Debit and Credit

- We have used two terms in our above discussion Debit and Credit. What do these terms mean?
- Debit and Credit are two Latin words and as such it is difficult to say what do these mean.
- But we can develop an understanding as to what does these terms stand for.

## DEBIT

- It signifies the receiving of benefit. In simple words it is the left hand side.

## CREDIT

- It signifies the providing of a benefit. In simple words it is the right hand side.

Debit and Credit will be explained in details and with examples in our future discussions.

## Dual Aspect of Transactions

- We have just said that for every debit there is an equal credit.
- This is also called the dual aspect of the transaction i.e. every transaction has two aspects, debit and credit and they are always equal.
- This means that every transaction should have two-sided effect.
- For example Mr. A starts his business and he initially invests Rupees 100,000 /- in cash for his business. Out of this cash following items are purchased in cash;

O A building for Rupees $50,000 /-$;
o Furniture for Rupees $10,000 /-$; and
o A vehicle for Rupees 15,000 /-

- This means that he has spent a total of Rupees $75,000 /$ - and is left with Rupees 25,000 cash. We will apply the Dual Aspect Concept on these events from the viewpoint of business.
- When Mr. A invested Rupees $100,000 /$-, the cash account benefited from him. The event will be recorded in the books of business as,
DEBIT
Cash
Rs. 100,000
CREDIT Mr. A Rs.100, 000

Analyse the transaction. The account that received the benefit, in this case is the cash account, and the account that provided the benefit is that of Mr. A.

- Building purchased - The building account benefited from cash account

| DEBIT |  | Building | Rs.50, 000 |
| :--- | :--- | :--- | :--- | Cash $\quad$ Rs. 50,000

- Furniture purchased - The furniture account benefited from cash account
DEBIT Furniture Rs.10, 000

CREDIT Cash

DEBIT Vehicle Rs.15, 000 CREDIT Cash Rs.15, 000

## Basic Principle of Double Entry

- We can devise the basic principle of double entry book-keeping from our discussion to this point.
- "Every Debit has a Credit" which means that "All Debits are always equal to All Credits".

## Assets

- Assets are the properties and possessions of the business.
- Properties and possessions can be of two types, one that have physical existence (called tangible) and the other that have no physical existence (called intangible).
o Tangible Assets - Furniture, Vehicle etc.
o Intangible Assets - Right to receive money, Good will etc.

## Accounting Equation

- From the example that we just discussed, if the debits and credits are added up, the situation will be as follows:

## DEBITS

| Cash | Rs.100, 000/- |
| :--- | :---: |
| Building | $50,000 /-$ |
| Furniture | $10,000 /-$ |
| Vehicle | $15,000 /-$ |

## CREDITS

Mr. A
Rs.100, 000/-
Cash
75,000/-

- The total Equation becomes:
- 

DEBITS $=\quad$ CREDITS

$$
\begin{aligned}
& \text { Cash + Building + Furniture + Vehicle } \\
& 100000+50000+10000+15000
\end{aligned} \quad \begin{gathered}
\text { Cash }+ \text { Mr. A } \\
75000+75000
\end{gathered}
$$

- Cash on Left Hand Side is Rupees $100,000 /$ - and on Right Hand Side it is Rs. $75,000 /$-. If it is gathered on the Left Hand Side it will give a positive figure of Rupees 25,000/- (which you will notice is our balance of cash in hand). Now the equation becomes:

| DEBITS | $=$ | CREDITS |
| :---: | :--- | :--- | :--- |
| Cash + Building + Furniture + Vehicle | $=$ | Mr. A |
| $25,000+50,000+10,000+15,000$ | $=$ | 100,000 |

$$
\text { Cash + Building + Furniture+ Vehicle }=\text { Mr. A }
$$

$$
25,000+50,000+10,000+15,000=100,000
$$

- Keeping the entity concept in mind we can see that the business owns the building, furniture, vehicle and cash and will obtain benefit from these things in future. Any thing that provides benefit to the business in future is called 'Asset'.
- Similarly the business had obtained the money from Mr. A and this money will have to be returned in form of either cash or benefits. Any thing for which the business has to repay in any form is called 'Liability'.
- So cash, building, furniture and vehicle are the assets of the business and the amount received from Mr. A for which the business will have to provide a return or benefit is the liability of the business. Therefore, our equation becomes:

$$
\text { Assets } \quad=\quad \text { Liabilities }
$$

- The liabilities of the business can be classified into two major classes i.e. the amounts payable to 'outsiders' and those payable to the 'owners'. The liability of the business towards its owners is called 'Capital' and amount payable to outsiders is called liability. Therefore, our accounting equation finally becomes:
Assets $=\quad$ Capital $\quad+\quad$ Liabilities

## Lesson-5

## Learning Objective

- This lecture will cover
o Classification of accounts into Assets, Liabilities, Income and Expenses, and
O Rules of Debit and Credit for these classes.

## Account

- An accounting system keeps separate record of each item like assets, liabilities, etc. For example, a separate record is kept for cash that shows increase and decrease in it.
- This record that summarizes movement in an individual item is called an Account.

## Classification of Accounts

- We have studied following classification of accounts:

0 Assets,
o Liabilities,
o Income,
o Expenses
0 Expenses can be further divided into capital and revenue expenses.

- We have already studied about these classifications in different lectures but to refresh your memory we will gather them at one place.

## Assets and liabilities

## ASSETS

- Assets are the properties and possessions of the business to pay in future. Can be amount payable for material purchased, expenses etc.
- Properties and possessions can be of two types, one that have physical existence (called tangible) and the other that have no physical existence (called intangible).

## LIABILITIES

- Liabilities are the debts and obligations of the business.
- Liability is the obligation of the business to provide a benefit or asset on a future date.

Asset is a right to receive and liability is an obligation to pay, therefore, these are opposite to each other.

## Accounting Equation

- Assts are created out of capital invested plus liability to third party.

## Income \& Expenses

## INCOME

- Income / Revenue is the value of goods or services that a business charges from its customers. or
- The reward / return received from the resources committed in the business.

## EXPENSES

- Expenses are the costs incurred to earn the revenue.
- The resources spent and the efforts made to earn the income, when translated in money terms are the expenses of the business

## Profit and loss

Profit

- Profit is the excess of income over expenses in a specific period.

Loss

- Loss is the excess of expenses over income in a specific period.

## Capital and Revenue expenditure

Capital expenditure

- It is the expenditure to create an asset that helps in generating future income and its life is more than 12 month. For example machinery purchased, furniture purchase etc

Revenue expenditure

- It is the day to day expenses whose benefit is drawn immediately. For example salary of the employee and rent of the building etc.

## Rules of Debit and Credit

- From our discussion up to this point, we have established following rules for Debit and Credit: Any account that obtains a benefit is Debit.

## OR

Anything that will provide benefit to the business is Debit.

- Both these statements may look different but in fact if we consider that whenever an account benefits as a result of a transaction, it will have to return that benefit to the business then both the statements will look like different sides of the same picture.
- For credit

Any account that provides a benefit is Credit.
OR
Anything to which the business has a responsibility to return a benefit in future is Credit.

- As explained in the case of Debit, whenever an account provides benefit to the business the business will have a responsibility to return that benefit at some time in future and so it is Credit.

## Rules of Debit and Credit for Assets

- Similarly we have established that whenever a business transfers a value / benefit to an account and as a result creates some thing that will provide future benefit; the 'thing' is termed as Asset.
- By combining both these rules we can devise following rules of Debit and Credit for Assets:
o When an asset is created or purchased, value / benefit is transferred to that account, so it is Debited
i. Increase in Asset is Debit
o Reversing the above situation if the asset is sold, which is termed as disposing off, for say cash, the asset account provides benefit to the cash account. Therefore, the asset account is Credited

## ii. Decrease in Asset is Credit

## Rules of Debit and Credit for Liabilities

- Anything that transfers value to the business, and in turn creates a responsibility on part of the business to return a benefit, is a Liability. Therefore, liabilities are the exact opposite of the assets.
o When a liability is created the benefit is provided to business by that account so it is Credited
iii. Increase in Liability is Credit
o When the business returns the benefit or repays the liability, the liability account benefits from the business. So it is Debited
iv. Decrease in Liability is Debit

## Rules of Debit and Credit for Expenses

- Just like assets, we have to pay for expenses. From assets, we draw benefit for a long time whereas the benefit from expenses is for a short run.
- Therefore, Expenditure is just like Asset but for a short run.
- Using our rule for Debit and Credit, when we pay cash for any expense that expense account benefits from cash, therefore, it is Debited.
o Now we can lay down our rule for Expenditure:
v. Increase in Expenditure is Debit
o Reversing the above situation, if we return any item that we had purchased, we will receive cash in return. Cash account will receive benefit from that Expenditure account. Therefore, Expenditure account will be credited
vi. Decrease in Expenditure is Credit

## Rules of Debit and Credit for Income

- Income accounts are exactly opposite to expense accounts just as liabilities are opposite to that of assets.
- Therefore, using the same principle we can draw our rules of Debit and Credit for Income
vii. Increase in Income is Credit
viii. Decrease in Income is Debit

## Lesson-6

## Learning Objective

- This lecture will cover following areas:

0 An overview of the flow of transactions.
0 An introduction to the basic books of accounts.
0 The General Ledger, and
o The ledger balance

## The Flow of Transactions

Event
Event is the happening of any thing but in accounting we discuss monetary events
Monetary Events
If the financial position of a business is change due to the happening of event that Event is called Monetary Event

The Voucher

- Voucher is a document in a specific format that records the details of a transaction.
- It is accompanied by the evidence of transaction.

A Sample Voucher

| Name Of Company |  |  |  |
| :---: | :---: | :---: | :---: |
| Type Of Voucher |  |  |  |

## The General Journal

- The Journal used to be a chronological (day-to-day) record of business transactions. All vouchers were first recorded in books.
- It was also called the Book of Original Entry or Day Book.
- But in present day accounting and especially with the introduction of computers for accounting, this book is not in use any more.
- We will, therefore, not study the use of Journal in detail but we should know that it is a book that keeps day-to-day record of transactions.

## General Ledger - The 'T' Account

- Ledger - is a book that keeps separate record for each account (Book of Accounts).
- We know that Account or Head of Account is systematic record of transactions of one type.
- An account in its simplest form is a T-shape and looks like this:

## Title of Account

Left hand side. The Debit side.

Right hand side. The Credit side.

## A Standard General Ledger

- Since the ledger keeps record of transactions that affect one head of account, therefore, it should provide all the information that a user may need.
- Usually the ledger is required to provide following information:
o Title of account
o Ledger page number, called Ledger Folio / Account Code
o Date of transaction
o Voucher number
o Narration / particulars of transition
o Amount of transaction

## A Standard General Ledger

| Capital Account (Title of Account)Account Code 02 <br> DateVoucher <br> Number |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| Particulars / <br> Narration | Debit <br> Amount | Credit <br> Amount |  |  |

## A Simple Presentation of a Recorded Transaction is as under:

## The Ledger Balance

- In the earlier lecture, we discussed that in order to have the total figure in respect of each head of expense/income, asset/liability we need to maintain different accounts.
- We had also said that each account may have figures on the debit as well as the credit side.
- Therefore, the difference between the debit and the credit sides, known as the BALANCE, would represent the required total of the particular account.
- The total of all balances on the Debit side is ALWAYS equal to the total of all balances on the Credit side. This is called the balancing of books of accounts. We will study about this concept at a later stage.
- The balance may be written out after every transaction in a third column or calculated at the end of a specific time period (an accounting period).
- A Debit balance is shown without brackets and a Credit balance is shown in brackets (XYZ).

| Cash Account |  |  |  |  | Account Code 01 |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Date | Voucher <br> Number | Narration / <br> Particulars | Debit <br> Amount | Credit <br> Amount | Balance <br> Dr/(Cr) |

| Jan 01 | 01 | Capital Introduced in cash by Owner | 100,000 |  | 100,000 |
| Jan 01 | 02 | Cash Paid for Purchase of Building |  | 50,000 | 50,000 |
| Jan 02 | 03 | Cash Paid for Purchase of Furniture |  | 10,000 | 40,000 |

| Capital Account |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Date | Voucher <br> Number | Narration / <br> Particulars | Debit <br> Amount | Credit <br> Amount | Balance <br> Dr/(Cr) |
| $20--$ |  |  |  |  |  |
| Jan 01 | 01 | Capital Introduced in cash by Owner |  | 100,000 | $(100,000)$ |

## Areas Covered in this lecture

- Cash book and bank book.
- Accounting Period.
- Trial Balance and its limitations.

## Flow of Transaction

In Financial Accounting, any business transaction flows as follows:

- The business transaction is recorded in a voucher. The voucher is the first document prepared in the financial accounting.
- All credit transactions are then posted in the journal.
- In these days, voucher is directly fed in the books of accounts by means of computers.
- From the books of accounts, trial balance is prepared, which shows the arithmetic accuracy of the accounting system.
- Finally, financial statements. i.e., Profit \& Loss Account and Balance Sheet is prepared from trial balance.

## Cash Book \& Bank Book

- Cash book and bank book are part of general ledger.
- All entries including payables and receivables are recorded in the general ledger. Expenses, income, assets and liabilities are recorded in different head of accounts to analyze the expenses incurred in different head of accounts.
- Due to large volume of transactions, entries related to cash and bank are recorded in the separate books.

## Cash Book

- All cash transactions (receipts and payments) are recorded in the cash book.
- Cash book balance shows the amount of cash in hand at a particular time.
- Format of cash book is here under:

| Cash Book |  |  |  | Account Code 01 |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Receipt Side |  |  |  | Payment Side |  |  |  |  |  |
| Date | No. | Narration / <br> Particulars | Ledger <br> Code | Receipt <br> Amount | Date | No. | Narration / <br> Particulars | Ledger <br> Code | Payment <br> Amount |
|  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |

OR

| Date | Voucher <br> Number | Narration / <br> Particulars | Ledger <br> Code | Receipt <br> Amount | Payment <br> Amount | Balance <br> Dr/(Cr) |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
|  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |

- Two formats of cash book are shown above. In the first format, receipt side and payment side are shown separately. In the second format, two columns are shown for receipt and payment with an extra column of balance. The balance column shows the net balance of cash available for use.
- The ledger code shows the code of that head of account which contains the second effect of the cash transactions because debits and credits are always equal in financial accounting.
- Both of these formats are correct. A business can use any format considering its policies and requirements.

## Bank Book

- All bank transactions are recorded in the bank book.
- The balance of bank book reflects the cash available at bank at a particular time.
- Format of bank book is hereunder:

| Bank Book (Bank Account Number) |  |  |  |  |  |  |  |  | Account Code 02 |
| :--- | :--- | :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Date | Voucher <br> Number | Chq. <br> No. | Narration / <br> Particulars | Ledger <br> Code | Receipt <br> Amount | Payment <br> Amount | Balance <br> Dr/(Cr) |  |  |
|  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |

- The format of bank book is same as that of cash book except the column of cheque no.
- This column is added in the format because all payments made by cheque and the number of cheque is written in that column to keep the accounting record updated.

## Accounting Period

- Accounting period is any period for which a profit and loss account is prepared.
- The length of the accounting period can be anything between one day to one year
- The legal or statutory definition is a maximum of one year.
- The only exception in this case is the formation of a new company which is formed before the start of accounting period.

## Financial year ("a period of 12 month duration")

- In Pakistan, financial year starts from $1^{\text {st }}$ of July and ends on $30^{\text {th }}$ of June.
- Exceptions are:
o Specialized business. e.g., Textile, banks, Sugar mills etc.
- Financial reports can be made for a week or a month, depending upon the requirements of the company.

## Debit \& Credit Balances

- It has already been mentioned that both sides i.e. Debit and credit side of a ledger must be equal.
- If debit side of a ledger is greater that credit side. The balance will be written on the credit side and it will be called Debit Balance. The reason being, the balance is written on the credit side because of excessive debit balance. Therefore, it is called Debit Balance. For example:

| Title of Account |  |  |  | Account Code 01 |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Debit Side |  |  |  | Credit Side |  |  |  |
| Date | No. | Narration / Particulars | Receipt <br> Amount | Date | No. | Narration / <br> Particulars | Payment Amount |
|  | 1 |  | 100,000 |  | 3 |  | 80,000 |
|  | 2 |  | 20,000 |  | 4 |  | 30,000 |
|  |  |  | 120,000 |  |  |  | 110,000 |
|  |  |  |  |  |  | Balance | 10,000 |
|  |  |  |  |  |  |  | 1 |

A Debit Balance

- Similarly, if credit side is greater than debit side, the balance will be written on the debit side. This balance is called. Credit Balance. For Example:

| Title of Account |  |  |  | Account Code 01 |  |  |  |  |
| ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | :---: |
| Debit Side |  |  |  | Credit Side |  |  |  |  |
| Date | No. | Narration / <br> Particulars | Receipt <br> Amount | Date | No. | Narration / <br> Particulars | Payment <br> Amount |  |
|  | 1 |  | 80,000 |  | 3 |  | 100,000 |  |
|  | 2 |  | 30,000 |  | 4 |  | 20,000 |  |
|  |  |  | 110,000 |  |  |  | 120,000 |  |
|  |  | Balance | 10,000 |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |

## A Credit Balance

## Trial Balance

- At the end of accounting period, a list of all ledger balances is prepared. This list is called trial Balance.
- Both sides of trial balance i.e. Debit side and credit side must be equal. If both sides are not equal, there are errors in the books of accounts.
- Trial balance shows the mathematical accuracy of the books of accounts.

## Limitations of Trial Balance

- Trial balance only shows the mathematical accuracy of the accounts.
- If both sides of trial balance are equal, books of accounts are considered to be correct. But this might not be true in all the cases.
- If any transaction is not recorded at all, trial balance can not detect the omitted transaction.
- If any transaction is recorded in the wrong head e.g. if an expense is debited to an assets account. Trial balance will not be able to detect that mistake too.

A Sample Trial Balance

| Name Of The Organization |  |  |  |
| :--- | :---: | :---: | :---: |
| Trial Balance As On (Date on Which Trial Balance is Drawn) |  |  |  |
| Title of Account | Account <br> Code | Debit <br> Amount | Credit <br> Amount |
| Cash in Hand | 01 | xy |  |
| Cash at bank | 02 | xy | xy |
| Capital | 03 |  | xy |
| Assets | 04 |  |  |
| Liabilities | 05 |  | xy |
| Income | 06 |  | xy |
| Expenses | 07 | xy |  |
| Total |  | xyz | xyz |

Lesson-8

## LEARNING OBJECTIVE

- After studying this chapter, you will be able to:
o Draw up Profit \& Loss account from the information given in trial balance.
o Differentiate the term, Receipt \& Payment, Income \& Expenditure and Profit \& Loss account.

## FINANCIAL STATEMENTS

- Different reports generated from the books of accounts to provide information to the relevant persons.
- Every business is carried out to make profit. If it is not run successfully, it will sustain loss. The calculation of such profit \& loss is probably the most important objective of the accounting function. Such information is acquired from "Financial Statements".
- Financial Statements are the end product of the whole accounting process. These show us the profitability of the business concern and the financial position of the entity at a specified date.
- The most commonly used Financial Statements are 'profit \& loss account' 'balance sheet' \& 'cash flow statement'.

## Income and Expenditure Vs Profit and Loss

- Income and Expenditure Account - is used for Non-Profit Organizations like Trusts, NGOs.
- Profit and Loss Account - is used for Commercial organizations like limited companies.

## PROFIT \& LOSS ACCOUNT

- Profit \& Loss account is an account that summarizes the profitability of the organization for a specific accounting period.
- Profit \& Loss account has two parts:

0 In the first part, Gross Profit is calculated.
o Gross profit is the excess of sales over cost of goods sold in an accounting period.
0 In trading concern, cost of goods sold is the cost of goods consumed plus any other charge paid in bringing the goods in salable condition. For example, if business purchased certain items for resale purpose and any expense is paid in respect of carriage or bringing the goods in store (transportation charges). These will also be grouped under the heading of 'cost of goods sold' and will become part of its price.
0 In manufacturing concern, cost of goods sold comprises of purchase of raw material plus wages paid to staff employed for converting this raw material into finished goods plus any other expense in this connection.
0 In the $2^{\text {nd }}$ part, Net Profit is calculated.
o Net Profit is what is left of the gross profit after deducting all other expenses of the organization in a specific time period.

## How to prepare Profit \& Loss account

- One way is to write down all the Debit and Credit entries of Income and Expense accounts in the Profit and Loss Account. But it is not sensible to do so.
- The other way is that we calculate the net balance or we can say Closing Balance of each income and expense account. Then we note all the credit balances on the credit side and all the debit balances on the debit of profit and loss account.
- If the net balance of profit and loss is Credit (credit side is greater than debit side) it is Profit and if the net balance is Debit (Debit side is greater than credit side) it is a loss.

## Income, expenditure, profit and loss

- Income is the value of goods and services earned from the operation of the business. It includes both cash \& credit. For example, if a business entity deals in garments. What it earns from the sale of garments, is its income. If somebody is rendering services, what he earned from rendering services is his income.
- Expenses are the resources and the efforts made to earn the income, translated in monetary terms. It includes both expenses, i.e., paid and to be paid (payable). Consider the above mentioned example, if any sum is spent in running the garments business effectively or in provision of services, is termed as expense.
- Profit is the excess of income over expenses in a specified accounting period.

## Profit $=$ Income-expenses

In the above mentioned example, if the business or the services provider earn Rs. $100,000 \&$ their expenses are Rs. 75,000. Their profit will be Rs. 25,000 (100,000-75,000).

- Loss is the excess of expenses over income in a specified period of time. In the above example, if their expenses are Rs. $100,000 \&$ their income is Rs. 75,000 . Their loss will be Rs. 25,000 .

## RULES OF DEBIT \& CREDIT

- Increase in expense is Debit (Dr.)
- Decrease in expense is credit (Cr.)
- Increase in income is credit (Cr.)
- Decrease in income is Debit (Dr.)

## Classification of expenses

- It has already been mentioned that a separate account is opened for each type of expense. Therefore, in large business concerns, there may be a large number of accounts in organization's books.
- As profit \& loss account is a summarized record of the profitability of the organization. So, similar accounts should be grouped for reporting purposes.
- The most commonly used groupings of expenses are:
- COST OF GOODS SOLD
o ADMINISTRATION EXPENSES
o SELLING EXPENSES
o FINANCIAL EXPENSES
- Cost of goods sold is the cost incurred in purchasing or manufacturing the product, which an organization is selling plus any other expense incurred in bringing the product in salable condition. Cost of goods sold contain the following heads of accounts:
o Purchase of raw material/goods
o Wages paid to employees for manufacturing of goods
0 Any tax/freight is paid on purchases
0 Any expense incurred on carriage/transportation of purchased items.
- Administrative expenses are the expenses incurred in running a business effectively. Main components of this group are:
o Payment of utility bills
0 Payment of rent
0 Salaries of employees
0 General office expenses
O Repair \& maintenance of office equipment \& vehicles.
- Selling expenses are the expenses incurred directly in connection with the sale of goods. This head contains:
o Transportation/carriage of goods sold
0 Tax/freight paid on sale
- If the expense head 'salaries' includes salaries of sales staff. It will be excluded from salaries \& appear under the heading of 'selling expenses'.
- Financial expenses are the interest paid on bank loan \& charges deducted by bank on entity's bank accounts. It includes:
o Mark up on loan
o Bank charges

## Receipt \& Payment Account

- A receipt \& payment account is the summarized record of actual cash receipts and actual cash payment of the organization for a given period of time. This is a report that provides cash movement during the reported period. In other words, it can be defined as the summarized record of the cash book for a specific period.

## Receipt \& Payment vs. Profit \& Loss Account

- Receipt \& payment account is the summarized record of actual cash receipts and actual cash payment during the period while profit \& loss account also includes Receivable and Payable.
- Income \& expenditure Vs. Profit \& Loss Account
- These are two similar terms. Only difference between these two terms is that income \& expenditure account is prepared for non profit oriented organizations, e.g. Trusts, N.G.O's, whereas profit \& loss account is prepared in profit oriented organizations, e.g. Limited companies, Partnership firms etc.
- In case of Income and Expenditure Surplus/Deficit is to be find and in case of Profit and loss account profit or loss is to be find.

## A sample of Profit and Loss Account

A sample of Income Statement

## Name of the Entity

Income statement
For the period Ending ----

| PARTICULARS | AMOUNT <br> Rs. | AMOUNT <br> Rs |
| :--- | :---: | :---: |
| Income/Sales/Revenue |  | 100000 |
| Less: Cost of sales |  | $(60000)$ |
| Gross profit |  | $\mathbf{4 0 0 0 0}$ |
| Less: Administration expenses | 15000 |  |
| Selling expenses | 5000 | $(25000)$ |
| Financial expenses | 5000 | $\mathbf{1 5 0 0 0}$ |
| Net profit |  |  |

## Recognizing Income and Expenditure

- Income - should be recognized / recorded at the time when goods are sold or services are rendered.
- Expenses - should be recognized / recorded when benefit relating to that expense has been drawn.

## Learning Objective

- After studying this chapter, you should be able to:
o Explain what are Assets and Liabilities: and
o Draw up simple Balance Sheet from given information in trial balance.
Assets are economic resources that are owned by a business and are expected to benefit future operations. In most cases, the benefit to future operations comes in the form of positive future cash flows. The positive future cash flows may come directly as the asset is converted into cash(collection of a receivable)or indirectly as the asset is used in operating the business to create other assets that result in positive future cash flows(building \& land used to
Manufacture a product for sale). Assets may have definite physical form such as building, machinery or stock. On the other hand, some assets exist not in physical or tangible form, but in the form of valuable legal claims or right; examples are accounts receivables, investment in govt. bonds, and patent rights.

Liabilities are debts. The person or organization to which the debt is owed is called creditors. All businesses have liabilities; even the most successful companies purchase stocks, supplies, and services on credit. The liabilities arising from such purchases are called accounts payable.

## Rule of Debit and Credit

Assets (increase in assets is debit and decrease in asset is credit)
Liabilities (Increase in liability is credit and decrease in liability is debit)

## Classification of Assets

- Fixed Assets - Are the assets of permanent nature that a business acquires, such as plant, machinery, building, furniture, vehicles etc. Fixed assets are subject to depreciation.
- Long Term Assets -These are the assets of the business that are receivable after twelve months of the balance sheet date. For example, if business has invested some money for two years in any saving scheme or has purchased saving certificates for more than one year, it is a long term asset.
- Current Assets - Are the receivables that are expected to be received within one year of the balance sheet date. Debtors, closing stock \& all accrued incomes are the examples of Current Assets because these are expected to be received within one accounting period from the balance sheet date.
- The year, in which long term asset is expected to be received, long term asset is transferred to current assets in that year.

## Classification of Liabilities

- Capital - is the funds invested by the owners of the business. Business has a liability to return these funds to the owner.

We know that for the purpose of accounting, business is treated separately from its owners. This is known as Separate Entity Concept i.e. Business is a separate entity. Therefore, if the owner gives something (can be in form of Cash or Some other Asset) to the business then the business, not only has to return the amount to the owner but it also has to give some return on that money. That is why we treat Capital (Owners Funds) as a Liability.

- Profit and Loss Account - The net balance of the profit and loss account i.e. either profit or loss also belongs to the owners.

While explaining capital we said that the business has to give return to the owners. Now if the business is managed successfully, then this return would be a Favorable figure (Profit). This return will, therefore, be added to the Owners' investment.

- On the other hand, if the business is managed un-successfully then this return would be an un-favorable figure (Loss). It will, therefore, be deducted from the Owners' Investment.
- Long Term Liabilities - These are the liabilities that will become payable after a period of more than one year of the balance sheet date. For example, if business has taken a loan from bank or any third person and it is payable after three years, it is a long term liability of the business.
- Current Liabilities - These are the obligations of the business that are payable within twelve months of the balance sheet date. Creditors and all accrued expenses are the examples of current liabilities of the business because business is expected to pay these back within one accounting period.
- The year in which long term liability is to be paid back, long term liability is transferred to current liability in that year.

## BALANCE SHEET

- It is a position statement that shows the standing of the organization in Monetary Terms at a Specific Time.
- Unlike Profit and Loss that shows the performance of the entity over a period of time, the Balance Sheet shows the Financial State of Affairs of the entity at a given date.
- Balance sheet is the summarized analysis in a ' T ' form of all assets and liabilities of the entity, with liabilities listed on left hand side and assets on right hand side.
- Asset is any owned physical object (tangible asset) or a right (intangible asset) having economic value to the owner.
- Liability is an obligation of the business to deliver goods or to provide a benefit in future.

## Format of Balance Sheet (Account Form)

| Name of the Entity Balance Sheet As At- |  |  |  |
| :---: | :---: | :---: | :---: |
| Liabilities | Amount Rs. | Assets | Amount Rs. |
| Capital 100000 |  | Fixes Assets | 75000 |
| Profit and loss Account +15000 | 115000 | Long Term Assets | 20000 |
| Long Term Liabilities | 50000 | Current assets | 80000 |
| Current liabilities | 10000 |  |  |
| Total | 175000 | Total | 175000 |

Format of Balance Sheet (Report Form)

| Name of the Entity <br> Balance Sheet As At------ |  |  |  |
| :--- | :--- | :--- | :--- |
| PARTICULARS | Amount <br> Rs. | Amount <br> Rs. |  |

| ASSETS |  |  |
| :--- | :---: | :---: |
| Fixes Assets |  | 75000 |
| Long Term Assets |  | 20000 |
| Current Assets | 80000 |  |
| Total |  |  |
| LIABILITIES | 100000 |  |
| Capital | 15000 | 115000 |

| Current Liabilities | $\mathbf{1 7 5 0 0 0}$ |  |
| Total |  |  |

## SOLVED EXAMPLES

## ILLUSTRATION \# 1

The following is the trial balance extracted from the books of Naeem \& Sons as on 30/06/2002. Prepare a profit \& loss account \& balance sheet for the year ended June 30, 2002.

| Particulars | Dr. | Cr. |
| :--- | ---: | :---: |
| Sales |  | 100,000 |
| Purchases | 45,000 |  |
| purchase return | 12,000 | 3,000 |
| Salaries | 5,000 |  |
| Rent | 25,000 |  |
| Debtors |  | 16,000 |
| Creditors | 408,000 | 368,000 |
| Capital |  |  |
| Plant \& machinery | 487,000 | 487,000 |
|  |  |  |

## SOLUTION

| Naeem \& Sons |  |  |  |
| :---: | :---: | :---: | :---: |
| Profit \& Loss Account for the year ended June 30, 2002. |  |  |  |
| cost of goods sold: | Rs. | Sales | Rs. |
|  |  |  | 100,000 |
|  | 45,000 | Purchase return | 3,000 |
| Gross Profit | 58,000 |  |  |
|  | 103,000 |  | 103,000 |
| Salaries | 12,000 | Gross Profit | 58,000 |
| Rent | 5,000 |  |  |
| Net Profit | 41,000 |  |  |

- This is a presentation of profit \& loss account in ' T ' account form. Now same illustration is presented in statement form.

\begin{tabular}{|c|c|c|}
\hline \multicolumn{3}{|c|}{Naeem \& sons} \\

Salaries \\
Rent
\end{tabular} \& \[
\begin{array}{r}
(12,000) \\
(5,000)
\end{array}
\] \& \(\mathbf{5 8 , 0 0 0}\)

$(17,000)$ <br>
\hline Net Profit \& \& 41,000 <br>
\hline
\end{tabular}

This is not a correct way to present profit \& loss account in statement form. In actual practice only main heads of expenses are presented in profit \& loss account along with foot note number. Detail of that head of expense is given in the note. Correct presentation of profit \& loss account is hereunder:

| Naeem \& sons |  |  |
| :---: | :---: | :---: |
| Profit \& Loss Account for the year ended June 30, 2002 |  |  |
| Particulars | Amount Rs. | Amount Rs. |
| Income / Sales / Revenue Less: Cost of Goods Sold (See Note \# 1) |  | $\begin{array}{r} \hline 100,000 \\ (42,000) \end{array}$ |
| Gross Profit <br> Less: Administrative expenses <br> (See Note \# 2) |  | $\begin{array}{r} \hline 58,000 \\ (17,000) \end{array}$ |
| Net Profit |  | 41,000 |

Note \# 1
Cost of goods sold

| Purchases | $\mathbf{4 5 , 0 0 0}$ |
| :--- | :--- |
| Less: Purchase Return | $\mathbf{( 3 , 0 0 0 )}$ |
| Net Purchases | $\mathbf{4 2 , 0 0 0}$ |

Note \# 2

Administrative expenses

| Salaries | 12,000 |  |
| :--- | :---: | :---: |
| Rent | 5,000 |  |
| Total Administrative expenses | 17,000 |  |

It is recommended that Profit $\&$ loss account should be prepared in above mentioned format.

BALANCE SHEET

| Naeem \& Sons |  |  |  |
| :---: | :---: | :---: | :---: |
| Balance Sheet As At June 30, 2002 |  |  |  |
| Liabilities |  | Assets |  |
| Particulars | $\begin{gathered} \text { Amount } \\ \text { Rs. } \end{gathered}$ | Particulars | $\begin{gathered} \text { Amount } \\ \text { Rs. } \end{gathered}$ |
| Capital <br> Profit and Loss Account | $\begin{array}{r} 368,000 \\ 41,000 \end{array}$ | Fixed Assets Plant \& Machinery | 400,000 |
|  | 409,000 |  |  |
| Current Liabilities Creditors | 16,000 | Current Assets Debtors | 25,000 |
| Total | 425,000 | Total | 425,000 |

Balance sheet in statement form is presented hereunder:

| Naeem \& Sons |  |  |
| :--- | ---: | ---: |
| Balance Sheet As At June 30, 2002 |  |  |
| Particulars | Amount Rs. | Amount Rs. |
| Assets |  |  |
| Fixed Assets <br> Plant \& machinery <br> Current Assets <br> Debtors |  | 400,000 |
| Total |  | 25,000 |
| Liabilities |  | 468,000 |
| Capital |  | 4,000 |

## Illustration \# 2

The following trial balance has been extracted from the books of Saeed \& co. on 30-06-2002. From this, prepare an income statement and balance sheet for the year ended 30-06-2002.

|  | Dr. | Cr. |
| :--- | ---: | ---: |
| Sales |  | 200,000 |
| Purchases | 180,000 |  |
| purchase return |  | 2,500 |
| Office salaries | 3,500 |  |
| Furniture \& Fixture | 16,000 |  |
| Office Equipment | 11,000 |  |
| Rent | 5,000 |  |
| Accounts Payable(creditors) |  | 28,000 |
| Sales Salaries | 3,000 |  |
| Freight \& custom duty on purchases | 6000 |  |
| Repair of office equipment | 2,000 |  |
| Accounts Receivable(debtors) | 52,000 |  |
| Freight on sales | 1,000 |  |
| Capital | 37,000 |  |
| Cash in hand |  | 41,500 |
| Loan from bank(for three years) | 500 |  |
| Bank charges | 5,000 |  |
| Interest on loan | 322,000 | 322,000 |
| Grand Total |  |  |

## SOLUTION

| Saeed \& Co. |  |  |  |
| :--- | ---: | :--- | ---: |
| Profit \& Loss Account for the year ended June 30, 2002. |  |  |  |
|  | Rs. |  |  |
|  |  | Sales | Rs. |
| Purchases | 180,000 | Purchase return | 200,000 |
| Freight, custom duty on purchases | 6,000 |  | 2,500 |
| Gross Profit | 16,500 |  | 202,500 |
|  | 202,500 |  | 16,500 |
| Salaries | 3,500 | Gross Profit |  |
| Rent | 5,000 |  |  |
| Repair of office equipment | 2,000 |  |  |
| Sales salaries | 3,000 |  |  |
| Freight on sales | 1,000 |  | 3,500 |
| Interest on loan | 5,000 |  | 20,000 |
| Bank charges | 500 |  |  |
|  |  | Net loss |  |
| Total | 20,000 |  |  |

## Profit \& loss account in statement form:

| Naeem \& sons |  |  |
| :---: | :---: | :---: |
| Profit \& Loss Account for the year ended June 30, 2002 |  |  |
| Particulars | $\begin{gathered} \hline \text { Amount } \\ \text { Rs. } \end{gathered}$ | $\begin{aligned} & \text { Amount } \\ & \text { Rs. } \end{aligned}$ |
| Income / Sales / Revenue Less: Cost of Goods Sold (See Note \# 1) |  | $\begin{array}{r} 200,000 \\ (183,500) \end{array}$ |
| ```Gross Profit Less: Administrative expenses (See Note \# 2) Less: Selling expenses (See Note \# 3) Less: Financial Expenses (See Note \# 4)``` |  | $\begin{array}{r} 16,500 \\ (10,500) \\ (4,000) \\ (5,500) \end{array}$ |
| Net Profit/(Loss) |  | $(3,500)$ |

NOTE \# 1
COST OF GOODS SOLD

| Purchases | 180,000 |
| :--- | ---: |
| Less: purchase return | $(2,500)$ |
| Add: Freight, custom duty on purchases | $(6,000)$ |
| TOTAL | $\mathbf{1 8 3 , 5 0 0}$ |

NOTE \# 2
Administrative expenses
Salaries 3,500

Rent 5,000
Repair of office equipment 2,000
TOTAL 10,500

NOTE \# 3
Selling expenses

| Sales salaries <br> Freight on sales | 3,000 |  |
| :--- | :---: | :---: |
| TOTAL | 1,000 | $\mathbf{4 , 0 0 0}$ |

NOTE \# 4
Financial expenses
Interest on loan 5,000
Bank charges 500
TOTAL 5,500

BALANCE SHEET

| Saeed \& co. |  |  |  |
| :---: | :---: | :---: | :---: |

| Net Profit |  | 10,000 |

## Rules of debit \& credit

- Any account that obtains a benefit is Debit and
- Anything that will provide benefit to the business is Credit.
- Both these statements may look different but in fact if we consider that whenever an account benefits as a result of a transaction it will have to return that benefit to the business then both the statements will look like different sides of the same picture.
Rules of debit \& credits can also be explained like:
- EXPENDITURE

O Increase in Expenditure is Debit
o Decrease in Expenditure is Credit

- INCOME
o Increase in Income is Credit
o Decrease in Income is Debit
- ASSETS
o Increase in Asset is Debit
o Decrease in Asset is Credit

## - LIABILITY

O Increase in Liability is Credit
o Decrease in Liability is Debit
Now we will explain these rules with the help of the following illustration:

| No. | Date | Particulars |
| :---: | :---: | :---: |
| 01 | Jan 01 | Mr. Rizwan invests Rs. 100,000 to commence his business. |
| 02 | Jan 03 | He opened an account with bank \& deposited Rs. 30,000. |
| 03 | Jan 05 | He borrows Rs. 50,000 from Mr. Saleem at 12\% per annum. |
| 04 | Jan 07 | He purchased furniture worth Rs. 20,000 for cash. |
| 05 | Jan 09 | He purchased goods (for resale) worth of Rs. 10,000 from Mr. Afza on credit. |
| 06 | Jan 10 | He sold goods for cash Rs. 5,000 |
| 07 | Jan 12 | He sold goods for Rs. 5,000 to Mr. Naeem on credit basis. |
| 08 | Jan 15 | Cash deposited in bank Rs. 5,000 |
| 09 | Jan 16 | He purchased stationery fore Rs. 3,000. |
| 10 | Jan 18 | He purchased office equipment for Rs. 10,000 and paid by cheque. |
| 11 | Jan 19 | He returned defective goods to Mr. Afzal worth Rs. 1,000. |
| 12 | Jan 25 | Goods are returned by Mr. Naeem Rs. 500 to the business. |
| 13 | Jan 30 | Cash paid to Mr. Afzal Rs. 9,000 in full settlement of his claim. |
| 14 | Jan 31 | Cash received from Mr. Naeem Rs. 4,500 in full settlement of his account. |
| 15 | Jan 31 | Cash withdrawn from the bank Rs. 500. |

Now first document that we prepare in accounting is the voucher. We will book first entry in voucher, i.e.

| Name Of Company |  |
| :--- | :--- |
|  | Type Of Voucher |
| Date: $\frac{1-1-02--}{}$ | No: $\frac{01}{2}$ |

| Description | Code <br> $\#$ | Debit <br> Amount | Credit Amount |
| :--- | :---: | ---: | ---: |
| Cash | 01 | 100,000 |  |
| Capital | 02 |  | 100,000 |
|  |  |  |  |
| Total: |  | 100,000 | 100,000 |

| Narration: | Capital Introduced in Cash by Mr. Rizwan. |
| :--- | :--- | :--- |
| Prepared By: | Checked by: |

Same entry is presented in simpler form:

| Date | Particulars | Code \# | Amount(Dr.) <br> Rs. | Amount(Cr.) <br> Rs. |
| :---: | :---: | :---: | :---: | :---: |
| $01-01-2002$ | Cash A/c | 01 | 100,000 |  |
|  | Capital A/c | 02 |  | 100,000 |
|  | Capital Introduced in Cash by Mr. <br> Rizwan |  |  |  |

In this case, cash account is debited because cash account has obtained benefit and Capital account is credited because business has obtained benefit because of capital account.
This statement can also be interpreted like this:
As cash is an asset and it is increased in this case, so cash is debited. Capital is a liability and increase in liability is credit. In this case capital is increased, hence it is credited.

## ENTRY \# 2

First, we will book this entry in voucher.

| Name Of Company |  |  |  |
| :--- | :---: | ---: | ---: |
| Type Of Voucher | Code <br> $\#$ | Debit <br> Amount | Credit Amount |
| Date: $3-1-02--$ | 03 | 30,000 |  |
| Description | 01 |  | 30,000 |
| Bank |  |  |  |
| Cash |  | 30,000 | 30,000 |
|  |  |  |  |
| Total: |  |  |  |
| Narration: | Deposited cash in bank. |  |  |
| Prepared By: |  |  |  |

Again, the same entry in simple form

| Date | Particulars | Code \# | Amount(Dr.) <br> Rs. | Amount(Cr.) <br> Rs. |
| :---: | ---: | :---: | :---: | :---: |
| 03-01-2002 | Bank A/c |  | 03 | 30,000 |
|  | Cash A/c | 01 |  |  |
|  | Deposited cash in bank. |  |  | 30,000 |

Again, bank account is debited because bank account has obtained benefit and Cash account is credited because business has obtained benefit because of cash account.
This statement can also be interpreted like this:
As bank is an asset and it is increased in this case, so bank is debited. Cash is an asset and decrease in asset is credit. In this case cash is decreased, hence it is credited
From now onward, we will present entry in simple form.

## ENTRY \# 3

| Date | Particulars | Code \# | Amount(Dr.) <br> Rs. | Amount(Cr.) <br> Rs. |
| :---: | :---: | :---: | :---: | :---: |
| 05-01-2002 | Cash A/c |  | 01 | 50,000 |

Cash account is debited because cash account has obtained benefit and Loan account is credited because business has obtained benefit because of Loan account.
This statement can also be interpreted like this:
As cash is an asset and it is increased in this case, so cash is debited. Loan is a liability and increase in liability is credit. In this case Loan is increased, hence it is credited

ENTRY \# 4

| Date | Particulars | Code \# | Amount(Dr.) <br> Rs. | Amount(Cr.) <br> Rs. |
| :---: | :--- | :---: | :---: | :---: |
| $07-01-2002$ | Furniture A/c | 05 | 20,000 |  |
|  | Cash A/c | 01 |  | 20,000 |
|  | Purchased furniture for cash |  |  |  |

Again, furniture account is debited because furniture account has obtained benefit and Cash account is credited because business has obtained benefit because of cash account.
This statement can also be interpreted like this:
As furniture is an asset and it is increased in this case, so furniture is debited. Cash is an asset and decrease in asset is credit. In this case cash is decreased, hence it is credited.

ENTRY \# 5

| Date | Particulars | Code \# | Amount(Dr.) <br> Rs. | Amount(Cr.) <br> Rs. |
| :---: | :--- | :---: | :---: | :---: |
| $09-01-2002$ | Purchases A/c <br> Mr. Afzal(Creditors) A/c <br> Purchased goods from Mr. Afzal on <br> credit | 06 | 10,000 |  |

Purchase account is debited because purchase account has obtained benefit and Creditors account is credited because business has obtained benefit because of Creditors account.
This statement can also be interpreted like this:
As purchase is an expense and it is increased in this case, so purchase is debited. Creditors are liabilities and increase in liability is credit. In this case Creditors are increased, hence it is credited.

## Creditor is any third person or organization, to whom business has to pay in future.

ENTRY \# 6

| Date | Particulars | Code \# | Amount(Dr.) <br> Rs. | Amount(Cr.) <br> Rs. |
| :---: | :---: | :---: | :---: | :---: |
| $10-01-2002$ | Cash A/c |  | 01 | 5,000 |
|  | Sale A/c | 08 |  |  |
|  | Sold goods for cash |  |  | 5,000 |

Cash account is debited because cash account has obtained benefit and Sale account is credited because business has obtained benefit because of Sale account.
This statement can also be interpreted like this:
As cash is an asset and it is increased in this case, so cash is debited. Sale is an income and increase in income is credit. In this case income is increased, hence it is credited

## ENTRY \# 7

| Date | Particulars | Code \# | Amount(Dr.) <br> Rs. | Amount(Cr.) <br> Rs. |
| :---: | :---: | :---: | :---: | :---: |
| 12-01-2002 | Mr. Naeem(Debtors) A/c | 09 | 5,000 |  |
|  | Sale A/c | 08 |  | 5,000 |
|  | Sold goods to Mr. Naeem on credit |  |  |  |

Debtors account is debited because Debtors account has obtained benefit and Sale account is credited because business has obtained benefit because of Sale account.
This statement can also be interpreted like this:
As Debtors is an asset and it is increased in this case, so debtors account is debited. Sale is an income and increase in income is credit. In this case income is increased, hence it is credited
Debtor is any third person or organization, from whom cash is receivable by the business.

ENTRY \# 8

| Date | Particulars | Code \# | Amount(Dr.) <br> Rs. | Amount(Cr.) <br> Rs. |
| :---: | :---: | :---: | :---: | :---: |
| 15-01-2002 | Bank A/c |  |  |  |
|  | Cash A/c | 03 |  |  |
|  | Cash deposited in bank | 01 |  | 5,000 |

## ENTRY \# 9

| Date | Particulars | Code \# | Amount(Dr.) <br> Rs. | Amount(Cr.) <br> Rs. |
| :---: | :--- | :---: | :---: | ---: |
| $16-01-2002$ | Stationery A/c | 10 | 3,000 |  |
| Cash A/c | 01 |  | 3,000 |  |
|  | Stationery purchased for cash |  |  |  |

Stationery account is debited because stationery account has obtained benefit and Cash account is credited because business has obtained benefit because of Cash account.
This statement can also be interpreted like this:
As stationery is an expense and it is increased in this case, so stationery is debited. Cash is an asset and decrease in asset is credit. In this case Cash is decreased, hence it is credited

ENTRY \# 10

| Date | Particulars | Code \# | Amount(Dr.) <br> Rs. | Amount(Cr.) <br> Rs. |
| :---: | :---: | :---: | :---: | :---: |
| $18-01-2002$ | Office Equipment A/c <br> Bank A/c <br> Office equipment purchased by <br> cheque | 11 | 10,000 |  |

Office Equipment account is debited because Office Equipment account has obtained benefit and Bank account is credited because business has obtained benefit because of Bank account.
This statement can also be interpreted like this:
As Office Equipment is an asset and it is increased in this case, so Office Equipment is debited. Bank is an asset and decrease in asset is credit. In this case bank account is decreased, hence it is credited

## ENTRY \# 11

| Date | Particulars | Code \# | Amount(Dr.) <br> Rs. | Amount(Cr.) <br> Rs. |
| :---: | :---: | :---: | :---: | :---: |
| 19-01-2002 | Mr. Afzal(Creditors) A/C | 07 | 1,000 |  |
|  | Purchase return A/C | 12 |  | 1,000 |
|  |  |  |  |  |

Creditors account is debited because Creditors account has obtained benefit and Purchase return account is credited because business has obtained benefit because of Purchase return account.
This statement can also be interpreted like this:
As Creditors is a liability and it is decreased in this case, so Creditors is debited. Purchase return is an expense and decrease in expense is credit, So it is credited.

## ENTRY \# 12

| Date | Particulars | Code \# | Amount(Dr.) <br> Rs. | Amount(Cr.) <br> Rs. |
| :---: | :---: | :---: | :---: | :---: |
| 25-01-2002 | Sales return A/C | 13 |  | 500 |
|  | Mr. Naeem(Debtors) A/C |  |  |  |
|  | Goods returned by Mr. <br> Naeem(Debtors) | 09 |  | 500 |

Sales return account is debited because Sales return account has obtained benefit and Debtors is credited because business has obtained benefit because of Debtors account.
This statement can also be interpreted like this:
As sales return is decrease in income and decrease in income is debit, so it is debited. Debtors account is decreased and decrease in asset is credit, so it is credited.

ENTRY \# 13

| Date | Particulars | Code \# | Amount(Dr.) <br> Rs. | Amount(Cr.) <br> Rs. |
| :---: | :---: | :---: | :---: | :---: |
| 30-01-2002 | Mr. Afzal(Creditors) A/C | 07 | 9,000 |  |
|  | Cash A/C | 01 |  | 9,000 |
|  | Cash paid to Mr. Afzal(Creditors) |  |  |  |

ENTRY \# 14

| Date | Particulars | Code \# | Amount(Dr.) <br> Rs. | Amount(Cr.) <br> Rs. |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $31-01-2002$ | Cash A/C | 01 | 4,500 |  |  |  |  |  |  |
| Mr. Naeem(Debtors) A/C <br> Cash received from Mr. <br> Naeem(Debtors) |  |  |  |  |  |  | 09 |  | 4,500 |

ENTRY \# 15

| Date | Particulars | Code \# | Amount(Dr.) <br> Rs. | Amount(Cr.) <br> Rs. |
| :---: | :---: | :---: | :---: | :---: |
| $31-01-2002$ | Cash A/C |  |  |  |
|  | Bank A/C | 01 |  |  |
|  | Cash withdrawn from bank | 03 |  | 500 |
|  |  |  |  |  |

## CASH AND BANK BOOK

- Ledger is a book that keeps separate record for each account;
- The Account or Head of Account is a systematic record of transactions of one type; and
- Like other things, a separate account is also required to record the movements in cash (usually called cash in hand) and bank account (usually called cash at bank).
- If the volume of transactions is high then we can separate books for cash and bank account.
- These separate books for cash and bank account are called cash book and bank book respectively.
- The Cash Book records all the movements in the cash account.
- A cash book would look like one of the two samples shown here

| Cash Book Account Code 01 |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Receipt Side |  |  |  |  | Payment Side |  |  |  |  |
| Date | No. | Narration / <br> Particulars | $\begin{aligned} & \text { Ledger } \\ & \text { Code } \end{aligned}$ | Receipt <br> Amount | Date | No. | Narration / <br> Particulars | Ledger Code | Payment <br> Amount |
|  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |

OR

| Cash Book Account Code 01 |  |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :---: |
| Date | Voucher <br> Number | Narration / <br> Particulars | Ledger <br> Code | Receipt <br> Amount | Payment <br> Amount | Balance <br> Dr/(Cr) |  |
|  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |

## THE CASH BOOK

- In the first format / presentation, receipts (Debits) are written on left hand side of the page and payments (Credits) on the right hand side.
- In the second presentation, instead of using two pages, we use two columns on the same page.
- Both these presentations are correct.
- In the second format, we have an additional facility of knowing the balance of the account after every transaction.
- Whereas in the first one, we have to add up the receipts and payments every time we need to know the balance.
- Moreover, the second format utilizes less space, therefore, we will use this format in our future discussions

## THE BANK BOOK

- The Bank book records all the movements in the bank account.
- The format of the bank book is the same as that of cash book axcept for an additional column for Cheque Number.
- Again, we can use either two pages OR two columns to present the bank book.

| Bank Book (Bank Account Number) |  |  |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Date | Voucher <br> Number | Chq. <br> No. | Narration / <br> Particulars | Ledger <br> Code | Receipt <br> Amount | Payment <br> Amount | Balance <br> Dr/(Cr) |
|  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |

- As you can see that except for a few minor differences, the formats of Cash and Bank book are almost similar to that of the General Ledger.
- The differences are explained here:
- The title of debit and credit columns has been changed to receipt and payment respectively. It is not necessary to make this change. But, it is done to simplify things as we know that in case of cash and bank, debit side would signify receipt and credit side would represent payment.
- There is an additional column titled ledger code. In this column, we write the code of the other head of account that is affected by the transaction. This helps in understanding the complete transaction at a glance.
- There may be a column for cheque number in the bank book.
- It may be noted that in case the organization operates more than one bank account, separate ledger accounts will be opened in bank book for each account.

Now we will summarize all cash transactions in both two page cash book $\&$ one page cash book for the convenience of the reader.

Two page cash book will be presented asunder:

| Cash Account Account Code 01 |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Receipt Side |  |  |  |  | Payment Side |  |  |  |  |
| Date | No. | Narration / Particulars | Ledger Code | Receipt Amount | Date | No. | Narration / Particulars | Ledger Code | Payment Amount |
| Jan-1 |  | Capital introduced | 02 | 100,000 J | Jan-3 |  | Deposited in bank | 03 | 30,000 |
| Jan-5 |  | Loan received | 04 | 50,000 | Jan-7 |  | Furniture purchased | 05 | 20,000 |
| Jan-10 |  | Goods sold | 08 | 5,000 | Jan-15 |  | Deposited in bank | 03 | 5,000 |
| Jan-31 |  | Received <br> debtors from | 09 | 4,500 | Jan-16 |  | Stationery purchased | 10 | 3,000 |
| Jan-31 |  | Cash drawn from bank | 03 |  | Jan-30 |  | Paid to creditors | 07 | 9,000 |
|  |  |  |  |  |  |  |  |  |  |

Same record will be presented in two column cash book now

| Date | Voucher Number | Narration / Particulars | Ledger Code | Receipt Amount | Payment Amount | Balance $\mathrm{Dr} /(\mathrm{Cr})$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Jan-1 |  | Capital introduced | 02 | 100,000 |  | 100,000 |
| Jan-3 |  | Deposited in bank | 03 |  | $(30,000)$ | 70,000 |
| Jan-5 |  | Loan received | 04 | 50,000 |  | 120,000 |
| Jan-7 |  | Furniture purchased | 05 |  | $(20,000)$ | 100,000 |
| Jan-10 |  | Goods staloods sold | 08 | 5,000 |  | 105,8,00 |
| Jan-15 |  | Deposited in bank | 03 |  | $(5,000)$ | 100,000 |
| Jan-16 |  | Stationery purchased | 10 |  | $(3,000)$ | 97,000 |
| Jan-30 |  | Paid to creditors | 07 |  | $(9,000)$ | 88,000 |
| Jan-31 |  | Received from debtors | 09 | 4,500 |  | 92,500 |
| Jan-31 |  | Cash drawn from bank | 03 | 500 |  | 93,000 |

Now, we will present Bank entries in bank book.

| Bank Book (Bank Account \# xxx) Account Code 02 |  |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Date | Voucher <br> Number | Chq. <br> No. | Narration / <br> Particulars | Ledger <br> Code | Receipt <br> Amount | Payment <br> Amount | Balance <br> Dr/(Cr) |
| Jan-3 |  |  | Cash deposited | 01 | 30,000 |  | 30,000 |
| Jan-15 |  |  | Cash deposited | 01 | 5,000 |  | 35,000 |
| Jan-18 |  |  | Off. Equip. <br> purchased | 11 |  | $(10,000)$ | 25,000 |
| Jan-31 |  |  | Cash drawn | 01 |  | $(500)$ | 24,500 |

## RECOMMENDED READING

After reading this lecture, you will be able to read

- Chapter \# 2 of business accounting by Frank Woods
- Chapter \# 2, 3 of accounting by M. Arif \& Sohail Afzal

## ILLUSTRATION

Nawab Sons started their business in the month of March, 2002. Following are their transactions for the month. Pass journal entries, prepare ledger accounts, and make their profitability analyses.

| No. | Date | Particulars |
| :--- | :--- | :--- |
| 01 | Mar. 01 | Started business with Rs. 150,000 |
| 02 | Mar. 05 | Purchased office furniture for cash Rs. 2,000 |
| 03 | Mar. 07 | Purchased goods for cash Rs. 9,000 |
| 04 | Mar. 10 | Paid carriage on purchases Rs. 250 |
| 05 | Mar. 12 | Purchased goods from Saleem \&co. Rs. 7,000 |
| 06 | Mar. 13 | Sold goods for cash Rs. 12,000 |
| 07 | Mar. 15 | Sold goods to Usman \& Sons Rs. 25,000 |
| 08 | Mar. 21 | Received cash From Usman \& Sons Rs. 25,000 |
| 09 | Mar. 21 | Paid cash to Saleem \&co Rs. 7,000 |
| 10 | Mar. 23 | Paid salaries for the month Rs. 2,500 |
| 11 | Mar. 25 | Paid rent Rs. 3,000 |
| 12 | Mar. 29 | Purchased stationery Rs.2,000 |
| 13 | Mar. 31 | Utility bills are accrued Rs. 5,000 |

## RECOMMENDED READING

After reading this lecture, you will be able to read

- Chapter \# 3 of business accounting by Frank Woods
- Chapter \# 5 of accounting by M. Arif \& Sohail Afzal.

## THE ACCOUNTING EQUATION

## Resources in the business $=$ Resources supplied by the owner

In accounting, terms are used to describe things. The amount of resources supplied by the owner is called capital. The actual resources which are in the business are called assets. This means that the accounting equation above, when the owner has supplied all the resources, can be shown as:

## Assets=Capital

Usually, people, other than the owner has supplied some of the assets. Liabilities are the name given to the amounts owing to these people for these assets. The equation has now changed to:

## Assets=Capital + Liabilities

It can be seen that two sides of the equation will have the same totals. This is because we are dealing with the same thing with two different points of view. It is:

## Resources in the business $=$ Resources: who supplied them <br> Assets $=$ Capital + Liabilities

It is a fact that total of each side will always equal one another, and this will always be true no matter how many transactions there may be. The actual assets, capital and liabilities may change, but the total of the assets will always equal to the total of capital and liabilities.
Assets consist of property of all kinds, such as buildings, machinery, stocks of goods and motor vehicles. Also benefits such as debts owned by customers and the amount of money in the bank accounts are included.
Liabilities consist of money owing for goods supplied to the business and for expenses. Also loans made to the firm are included.
Capital is often called the owner's net worth.

## Working capital

Working capital of the business is the net value of current assets \& current liabilities.
Current assets are the resources of the business that are expected to be received within 12 months in an accounting period.

Current liabilities are the amount owing to the business that is expected to be paid within one year in a financial year.
So, working capital is the net of what is receivable in an accounting year \& what is payable in that year or:

> Working Capital = Current Assets - Current Liabilities

For instance, current assets of the business worth Rs.100,000 \& current liabilities of the business has the value of Rs. 75,000. Then working capital is Rs. 25,000.
i.e., (100,000-75,000).

## STOCK

Stock is termed as "value of goods available to the business that are ready for sale". For accounting purposes, stock is of two types:

- Opening stock
- Closing stock

Opening stock is the value of goods available for sale in the beginning of an accounting year. For purpose of financial reporting, opening stock is added to the purchases for the year to become a part of cost of goods sold. As this is available in the beginning of the year, it is assumed that it will be consumed in the accounting year. That is why; it becomes a part of cost of goods sold. Stock of previous year is the opening stock in present year.

Closing stock is the value of goods unsold at the end of accounting year. For purposes of making financial statements, it is deducted from cost of goods sold \& is shown as an asset in the balance sheet. As this is the value of goods that are yet to be sold, so it cannot be included in cost of goods sold. That is why it is deducted from cost of good sold. On the other hand, its benefit will be received in the next accounting year, so it is shown as an asset in the balance sheet.

## Now, the contents of cost of goods sold are:

> Opening stock
> Plus: purchases
> Plus: Freight/ carriage paid on purchases
> Less: closing stock

For instance, opening stock of a business worth Rs. 15,000, business purchased goods of Rs. 12,000 for the year \& also paid Rs. 1,500 as carriage on purchases. The value of closing stock at the end of the year is Rs. 10,000 . Then, value of closing stock is calculated as under:

| Opening stock | 15,000 |
| :--- | ---: |
| Add: purchases | 12,000 |
| Add: carriage on purchase | 1,500 |
| Less: closing stock | $(10,000)$ |
| Cost of goods sold | 18,500 |

| Ali Traders |  |  |  |
| :--- | :---: | ---: | ---: |
| Trial Balance As On January 31, 20-- |  |  |  |
| Title of Account | Code | Dr. Rs. | Cr. Rs. |
| Cash Account | 01 | 35,000 |  |
| Bank Account | 02 | 130,000 |  |
| Capital Account | 03 |  | 200,000 |
| Furniture Account | 04 | 15,000 |  |
| Vehicle Account | 05 | 50,000 |  |
| Purchases Account | 06 | 60,000 |  |
| Mr. A (Creditor) | 07 |  | 15,000 |
| Sales | 08 |  | 95,000 |
| Mr. B (Debtor) | 10 |  | 15,000 |
| Salaries |  | 5,000 |  |

| Expenses | 11 | 20,000 |  |
| :--- | ---: | ---: | ---: |
| Expenses Payable | 12 |  | 20,000 |
| Total |  | 330,000 | 330,000 |

The Accounting Equation.
Assets = Capital + Liabilities
Assets $=35,000+130,000+15,000+50,000+15,000=\mathbf{2 4 5 , 0 0 0}$
Capital $=200,000$
Liabilities $=15,000+20,000=35,000$
Capital + Liabilities $=\mathbf{2 3 5 , 0 0 0}$

We ignore the Net Profit Rs. 10000 (Net profit is added in capital account)
When we added Net profit in capital then;
Assets $=$ Capital + Liabilities
$245000=210000+35000$
$245000=245000$

Account form Balance Sheet

| Total |  |  |

## Treatment of Depreciation

In Profit and Loss Account it is considered as expense and in Balance Sheet it is deducted from the concerned asset.

If useful life of an asset is 50 month and considered that there is no residual value then,

- Dividing total cost by life of the asset.
- Rs. $65,000 / 50$ months $=$ Rs.1,300 monthly charge

Illustration
Consider the trial balance given hereunder:

| Saeed \& co. |  |  |  |
| :--- | :---: | ---: | ---: |
| Trial Balance As On (January 31, 2002) |  |  |  |
| Title of Account | Code | Dr. Rs. | Cr. Rs. |
| Cash Account | 01 | 161,250 |  |
| Capital Account | 02 |  | 150,000 |
| Furniture Account | 03 | 2,000 |  |
| Purchases Account | 04 | 16,000 |  |
| Carriage on purchase account | 05 | 250 |  |
| Salim\& co. (Creditor) | 06 |  | 0 |
| Sales | 07 |  | 37,000 |
| Usman \& co. (Debtor) | 08 |  |  |
| Salaries | 09 | 2,500 |  |
| sRent | 10 | 3,000 |  |
| Stationery | 11 | 2,000 |  |
| Utility billst | 12 | 5,000 |  |
| Accrued expenses | 13 |  | 5,000 |
| Total |  | $\mathbf{1 9 2 , 0 0 0}$ | $\mathbf{1 9 2 , 0 0 0}$ |

(This trial balance is extracted from the solved illustration, in lecture 11)
Let's say, the value of closing stock at the end of the period is Rs. 2,000. Then profit \& loss account will bear the following change.

| Saeed \& Co. |  |  |
| :--- | :---: | ---: |
| Profit \& Loss Account for the period ended January 31, 2002 |  |  |
| Particulars | Amount <br> Rs. | Amount <br> Rs. |
| Income / Sales / Revenue (See Note <br> \#1) <br> Less: Cost of Goods Sold - Closing <br> stock | $16,250-2,000$ | 37,000. <br> $(14,250)$ |
| Gross Profit |  |  |
| Less: Admin. Expenses |  | $\mathbf{( 1 2 , 5 0 0 )}$ |
| See Note \# 2) |  |  |
|  |  |  |
| Net Profit/ (Loss) |  | $\mathbf{1 0 , 2 5 0}$ |

Its effect in the balance sheet is as follows:

| Saeed \& Co. |  |  |  |
| :--- | ---: | :--- | :---: |
| Balance Sheet As At January 31, 2002 |  |  |  |
| Liabilities |  | Assets |  |
| Particulars | Amount <br> Rs. | Particulars | Amount <br> Rs. |
| Capital <br> Profit and Loss Account | $\mathbf{1 5 0 , 0 0 0}$ <br> $\mathbf{1 0 , 2 5 0}$ | Fixed Assets <br> Furniture Account | 2,000 |
| Current Liabilities <br> Accrued Expenses | $\mathbf{1 6 0 , 2 5 0}$ |  | Current Assets <br> Cash <br> Closing Stock |
| Total | 5,000 | 161,250 |  |
| 2,000 |  |  |  |$|$| $\mathbf{1 6 5 , 2 5 0}$ |
| :--- | :--- |

This is a practical demonstration of the treatment of closing stock. But, we are not mentioning the journal entry of closing stock at this stage. It will be discussed in detail, when we will study the topic of fixed assets.

## DEPRECIATION

Depreciation is the method of charging cost of fixed assets to the profit \& loss account as an expense. Fixed Assets are those assets which are:

- Of long life
- To be used in the business
- Not bought with the main purpose of resale.

When an expense is incurred, it is charged to profit \& loss account of the same accounting period in which it has incurred. Fixed assets are used for longer period of time. Now, the question is how to charge a fixed asset to profit \& loss account. For this purpose, estimated life of the asset is determined. Estimated life is the number of years in which a fixed asset is expected to be used. Then, total cost of the asset is divided by total number of estimated years. The value, so determined, is called 'depreciation for that year' and is charged to profit \& loss account. The same amount is deducted from total cost of fixed asset. The net amount (after deducting depreciation) is called "Written Down Value".
For instance, an asset has a cost of Rs. 150,000. It is expected to be used for ten years. Depreciation to be charged to profit \& loss account is Rs. 15,000, i-e. cost of asset/estimated life. In this case, it will be $150,000 / 10=15,000$.
That is why depreciation is called an accounting estimate.
To understand its accounting treatment, consider the above mentioned illustration
Let's suppose the useful life of furniture is five years. Then, depreciation for the year will be $(2,000 / 5=400)$. Now, the profit \& loss account will show the following picture:

| Saeed \& Co. |  |  |
| :---: | :---: | :---: |
| Profit \& Loss Account for the year ended January 31, 2002 |  |  |
| Particulars | $\begin{gathered} \text { Amount } \\ \text { Rs. } \end{gathered}$ | Amount Rs. |
| Income / Sales / Revenue (See Note \#1) Less: Cost of Goods Sold |  | $\begin{array}{r} \hline 37,000 . \\ (16,250) \end{array}$ |
| Gross Profit <br> Less: Admin. Expenses + Depreciation | $12,500+400$ | $\begin{gathered} 20,750 . \\ (12,900) \end{gathered}$ |
| Net Profit/ (Loss) |  | 9,850 |

Balance sheet will look like this:

| Saeed \& Sons |  |  |  |
| :---: | :---: | :---: | :---: |
| Balance Sheet As At January 31, 2002 |  |  |  |
| Liabilities |  | Assets |  |
| Particulars | Amount Rs. | Particulars | Amount Rs. |
| Capital <br> Profit and Loss Account | $\begin{array}{r} \hline 150,000 \\ 9,850 \end{array}$ | Fixed Assets Furniture Account Less: depreciation | $\begin{aligned} & 2,000 \\ & (400) \end{aligned}$ |
|  | 159,850 |  | 1,600 |
| Current Liabilities Accrued Expenses | 5,000 | Current Assets Cash Closing Stock | $\begin{array}{r} 161,250 \\ 2,000 \end{array}$ |
| Total | 164,850 | Total | 164,850 |

Treatment of depreciation is practically demonstrated at this point. Its journal entry will be discussed in detail, when we cover the topic 'Fixed Assets'.

## DRAWING

Capital is the cash or kind invested by the owner of the business. Sometimes, the owner wants to take cash or kind out of the business for personal use. This is known as drawing. Any money taken out as drawings will reduce capital.
The capital account is very important account. To stop it getting full of small details, cash items of drawings are not entered in the capital account. Instead, a drawing account is opened, and all transactions are entered there.

Sometimes goods are also taken by the owner of the business. These are also known as drawings.
To understand the accounting treatment of drawings, look into the following trial balance:

| Saeed \& co. |  |  |  |
| :--- | :---: | ---: | ---: |
| Trial Balance As On ( January 31, 2002) |  |  |  |
| Title of Account | Code | Dr. Rs. | Cr. Rs. |
| Cash Account | 01 | 161,250 |  |
| Capital Account | 02 |  | 160,000 |
| Furniture Account | 03 | 2,000 |  |
| Drawings | 04 | 10,000 |  |
| Profit \& loss account | 05 |  | 8,250 |
| Salim\& co. (Creditor) | 06 |  | 0 |
| Usman \& co. (Debtor) | 07 |  | 0 |
| Accrued expenses | 08 |  |  |
| Total |  | $\mathbf{1 7 3 , 2 5 0}$ | $\mathbf{1 7 3 , 2 5 0}$ |

BALANCE SHEET

| Saeed \& Sons |  |  |  |
| :---: | :---: | :---: | :---: |
| Balance Sheet As At January 31, 2002 |  |  |  |
| Liabilities |  | Assets |  |
| Particulars | Amount Rs. | Particulars | Amount Rs. |
| Capital <br> Profit and Loss <br> Account <br> Less: Drawings | $\begin{array}{r} \hline 160,000 \\ 8,250 \\ (10,000) \end{array}$ | Fixed Assets <br> Furniture <br> Account | 2,000 |
|  | 158,250 |  |  |
| Current <br> Liabilities <br> Accrued Expenses | 5,000 | Current <br> Assets <br> Cash | 161,250 |
| Total | 163,250 | Total | 163,250 |

## LEARNING OBJECTIVE

After studying this lecture, you should be able to:

- Understand different types of vouchers.
- How to book entry in voucher.
- Carrying forward the balance of an account.

## VOUCHER

In book keeping, voucher is the first document to record an entry. Normally three types of vouchers are used. i-e.:

- Receipt voucher
- Payment voucher
- Journal voucher

## RECEIPT VOUCHER

Receipt voucher is used to record cash or bank receipt. Receipt vouchers are of two types. i-e.

- Cash receipt voucher
- Bank receipt voucher

Cash receipt voucher denotes receipt of cash; bank receipt voucher indicates receipt of cheque or demand draft. Standard format of cash receipt voucher is given below:

## PAYMENT VOUCHER

Payment voucher is used to record a payment of cash or cheque. Payment vouchers are of two types. i.e.

- Cash Payment voucher
- Bank Payment voucher

Cash Payment voucher denotes Payment of cash, bank Payment voucher indicates payment by cheque or demand draft. Standard format of cash Payment voucher is given below:

| Name of the Organization |  |  |
| :---: | :---: | :---: |
| Bank Payment / Cash Payment OR Payment Voucher |  |  |
| Date: | No: |  |
| Cash / Bank code: | Description / Title: |  |
| Description / Title of Account | $\begin{gathered} \text { Code } \\ \# \end{gathered}$ | Credit |
|  |  |  |
|  |  |  |
|  |  |  |
| Total: |  |  |
| Naration |  |  |
| Prepared By: | Checked By: |  |

## JOURNAL VOUCHER

Journal voucher is used to record transactions that do not affect cash or bank. Standard format of journal voucher is given hereunder:

## HOW TO CARRY FORWARD A BALANCE

It is already mentioned that in ' $T$ ' account, at the end of accounting period, if one side is greater than the other side, balancing figure will be written on the lesser side as balance. For instance, if amount on debit side is greater than the amount on credit side, the balancing figure is written on the credit side as balance \& it is known as Debit Balance. On the other hand, if amount on the credit side is greater than that of amount on the debit side, the balance is shown on the debit side. It is called the Credit Balance.
At the start of next accounting period, these balances are carried forward. Debit balance is written on the credit side, but it is the excess of debit side over the credit side, when it is carried forward, it is written on the debit side. For example, ledger account of cash is given below:

| Cash Account |  |  |  | Account code \# 1 |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Date | Particulars | $\begin{gathered} \text { Code } \\ \# \\ \hline \end{gathered}$ | Amount Rs. (Dr.) | Date | Particulars | Code \# | Amount Rs. (Cr.) |
| 1-3-02 | Commenced business | 02 | 150,000 | 5-3-02 | Office furniture purchased | 03 | 2,000 |
| 13-3-02 | Goods sold | 07 | 12,000 | 7-3-02 | Goods purchased | 04 | 9,000 |
| 21-3-02 | Received from |  |  | 10-3-02 | Carriage paid | 05 | 250 |
|  | debtors | 08 | 25,000 | 21-3-02 | Paid to creditors | 06 | 7,000 |
|  |  |  |  | 23-3-02 | Paid salaries | 09 | 2,500 |
|  |  |  |  | 25-3-02 | Paid rent | 10 | 3,000 |
|  |  |  |  | 29-3-02 | Paid for stationery |  |  |
|  |  |  |  |  |  | 11 | 2,000 |
|  |  |  |  |  | BALANCE |  |  |
|  |  |  |  |  |  |  | 161,250 |
|  | Total |  | 187,000 |  | Total |  | 187,000 |

This cash account is showing the balance of Rs. 161,250 on the credit side. This balance is excess of debit side over the credit side and, therefore, is called the debit balance. When it is carried forward it is written on the debit side because debit side of the cash account is greater \& Rs. 161,250 is the balancing amount of the debit side of cash account. So, it is an asset \& it will be used for further expenses in the forth coming period.

This is another example of accrued expenses:

| Accrued Expenses Account |  |  |  |  |  |  |  |  | Account code \# 13 |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Date | Particulars | Code <br> $\#$ | Amount <br> Rs. (Dr.) | Date | Particulars | Code <br> $\#$ | Amount <br> Rs. (Cr.) |  |  |  |  |  |
| $31-3-02$ |  |  |  |  | Accrued utility <br> bills | 12 | 5,000 |  |  |  |  |  |
|  | BALANCE |  | 5,000 |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |
|  | Total |  | 5,000 |  | Total |  | 5,000 |  |  |  |  |  |

In this account, balance is written on the debit side \& it is called the credit balance. As this balance represents excess of credit side over debit side, when it is carried forward it is again written on the credit side.
It can also be explained like this:

- Debit balance when carried forward, is written on the debit side
- Credit balance when carried forward, is written on the credit side

This is further explained with the help of the following solved illustration:

## ILLUSTRATION

Following is the trial balance of Saeed \& sons for the month ended January 31, 2002

| Saeed \& Sons. |  |  |  |
| :--- | :--- | ---: | ---: |
| Trial Balance As On ( January 31, 2002) |  |  |  |
| Title of Account | Code | Dr. Rs. | Cr. Rs. |
| Cash Account | 01 | 55,000 |  |
| Accrued expense Account | 02 |  | 10,000 |
| Bank Account | 03 | 25,000 |  |
| Loan Account | 04 |  | 100,000 |
| Furniture Account | 05 | 20,000 |  |
| Office Equipment | 06 | 10,000 |  |
| Total |  |  |  |

In the month of February, following transactions took place:

| No. | Date | Particulars |
| :--- | :--- | :--- |
| 01 | Feb 07 | They purchased stationery worth of Rs. 5,000 |
| 02 | Feb 10 | They paid their first installment of loan Rs. 10,000 |
| 03 | Feb 12 | They received a cheque from a customer of Rs. 5,000 |
| 04 | Feb 17 | Accrued expenses of Rs. 5,000 are paid. |
| 05 | Feb 20 | They purchased furniture of Rs. 1,000 |
| 06 | Feb 23 | Office equipment of Rs. 2,000 is sold |
| 07 | Feb 25 | Staff salaries are paid by cheque Rs. 10,000 |
| 08 | Feb 28 | Sold goods for cash Rs.2,000 |

## SOLUTION

The ledger accounts of Saeed \& Sons will bear the following changes:

| Loan Account |  |  |  |  |  |  |  |  | Account code \# 4 |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Date | Particulars | Code <br> $\#$ | Amount <br> Rs. (Dr.) | Date | Particulars | Code <br> $\#$ | Amount <br> Rs. (Cr.) |  |  |  |  |  |  |  |
| $10-2-02$ | Installment paid | 01 | 10,000 |  | Balance c/f |  | 100,000 |  |  |  |  |  |  |  |
|  | Balance c/d |  |  |  |  |  |  |  |  |  |  |  |  |  |

| Furniture Account |  |  |  | Account code \# 5 |  |  | AmountRs. (Cr.) |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Date | Particulars | Code \# | Amount Rs. (Dr.) | Date | Particulars | Code \# |  |
| $\begin{aligned} & 10-2-02 \\ & 20-2-02 \end{aligned}$ | Balance c/f <br> Furniture <br> purchased | 01 | $\begin{array}{r} 20,000 \\ 1,000 \end{array}$ | 23-2-02 |  |  |  |
|  |  |  |  |  | Balance c/d |  | 21,000 |
|  | Total |  | 21,000 |  | Total |  | 21,000 |

| Office Equipment Account |  |  |  |  | Account code \# 6 |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Date | Particulars | Code \# | Amount <br> Rs. (Dr.) | Date | Particulars | Code \# | Amount <br> Rs. (Cr.) |
| 10-2-02 | Balance c/f |  | 10,000 |  | Office Equipment sold <br> Balance c/d | 01 | 2,000 8,000 |
|  | Total |  | 10,000 |  | Total |  | 10,000 |

Balance $\mathrm{c} / \mathrm{f}$ is balance carried forward \& balance $\mathrm{c} / \mathrm{d}$ is balance Carried down.

We have demonstrated the carrying forward of balances in lecture-13. Another solved example is given below:

## ILLUSTRATION

Following is the trial balance of Rahil \& co. for the month ended January 31, 2002.

| Rahil \& co.. |  |  |  |
| :--- | :--- | ---: | ---: |
| Trial Balance As On (January 31, 2002) |  |  |  |
| Title of Account | Code | Dr. Rs. | Cr. Rs. |
| Cash Account | 01 | 30,000 |  |
| Accrued expense Account | 02 |  | 10,000 |
| Bank Account | 03 | 50,000 |  |
| Loan Account | 04 |  | 100,000 |
| Furniture Account | 05 | 20,000 |  |
| Office Equipment | 06 | 10,000 |  |
| Debtors account | 07 | 12,000 |  |
| Creditors account | 08 |  | 10,000 |
| Sales account | 09 |  | 20,000 |
| Purchase account | 10 | 18,000 |  |
| Total |  | $\mathbf{1 4 0 , 0 0 0}$ | $\mathbf{1 4 0 , 0 0 0}$ |

During the month, following entries took place:

| No. | Date | Particulars |
| :--- | :--- | :--- |
| 01 | Feb 07 | They purchased stationery worth of Rs. 3,000 |
| 02 | Feb 10 | They paid their first installment of loan Rs. 12,000 |
| 03 | Feb 12 | They received a cheque from a customer of Rs. 5,000 |
| 04 | Feb 13 | They paid a cheque of Rs. 8,000 to a creditor |
| 05 | Feb 15 | Purchased goods of Rs 6,000 \& paid through cheque |
| 06 | Feb 17 | Accrued expenses of Rs. 5,000 are paid. |
| 07 | Feb 20 | They purchased furniture of Rs. 2,000 |
| 08 | Feb 21 | Sold goods for cash Rs.5,000 |
| 09 | Feb 22 | Purchased goods on credit Rs. 5,000 |
| 10 | Feb 23 | Office equipment of Rs. 5,000 is Purchased |

| 11 | Feb 25 | Staff salaries are paid by cheque Rs. 15,000 |
| :--- | :--- | :--- |
| 12 | Feb 28 | Utility expenses of Rs. 3,000 are accrued. |

Leger accounts of Rahil \& co. during the month will show following picture:

| Cash Account |  |  |  | Account code \# 1 |  | Code <br> \# |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Total |  | $\mathbf{1 2 8 , 0 0 0}$ | $\mathbf{1 2 8 , 0 0 0}$ |

## Difference between expenses \& Purchases

- If business purchases items for its own use (items that are not meant to be resold) are charged to expense account.
- If business purchases items for resale purposes are charged to purchases account.

## STOCK

- Stock is the quantity of unutilized or unsold goods lying with the organization.
- Stock is termed as "the value of goods available to the business that are ready for sale". For accounting purposes, stock is of two types

## Type of Stock

- In trading concern, Stock consists of goods that are purchased for the purpose of resale, but not sold in that accounting period. Trading concern is that organization, which purchases items for resale purposes.
- In manufacturing concern(an organization that converts raw material into finished product by putting it in a process), stock consists of:
o Raw material
o Work in process
o Finished goods

## Raw material

Raw material is the basic part of an item, which is processed to make a complete item.

## Work in process

In manufacturing concern, raw material is put in a process to convert it into finished goods. At the end of the year, some part of raw material remains under process. i-e. it is neither in shape of raw material nor in shape of finished goods. Such items are taken in stock as work in process.

## Finished goods

Finished goods contain items that are ready for sale, but could not be sold in that accounting period.

## Stock Account

- Stock Account is Debited with the Value of the Goods Purchased
- Stock account is Credited with the Purchase Price of the Goods Sold / Issued for Production.
- Stock Account shows the cost / purchase value of unsold goods.

## In manufacturing concern, entries for stock are:

## Purchase of stock

Debit: $\quad$ Stock Account
Credit: $\quad$ Cash/Supplier /Creditors Account

When the stock is purchased, stock account gets the benefit, so it is debited \& cash or supplier account provides the benefit, so it is credited.

## Payment to creditors

$$
\begin{array}{lc}
\text { Debit: ` } & \text { Supplier / Creditors account } \\
\text { Credit: } & \text { Cash account }
\end{array}
$$

## Consumption of goods

| Debit: | Cost of goods sold |
| :--- | :--- |
| Credit: | Stock Account |

## Cost of goods sold

Cost of goods sold is different in both form of organization

- In trading concern, cost of goods sold is the value of goods unsold(goods stands for the items purchased for resale purpose)
- In manufacturing concern, cost of goods sold is the value of raw material consumed plus any other manufacturing cost. e.g., salaries of labour cost of machinery etc.

## Stock and cost of goods sold in manufacturing concern

In manufacturing concern, Raw material stock is put into process. For accounting purposes, all value of stock and other manufacturing costs are charged to work in process account. When the process is completed and the goods are prepared, all the value of work in process is charged to finished goods account. The business sells finished goods for the whole accounting year. At the end of the year, goods that are unsold are deducted from cost of goods sold account.

## Lesson-15

## STOCK

Stock is termed as "the value of goods available to the business that are ready for sale". For accounting purposes, stock is of two types:

- Opening stock
- Closing stock

Opening stock is the value of goods available for sale in the beginning of an accounting period. Closing stock is the value of goods unsold at the end of the accounting period.

## Journal Entries

## (In Case of Trading Concern)

Journal entries for those goods which are bought for resale purposes are as follows:
Purchase of goods:
Debit:
Stock/Material Account
Credit:
Cash/Bank/Creditor

Consumption of goods
$\begin{array}{ll}\text { Debit: } & \text { Cost of goods sold } \\ \text { Credit: } & \text { Stock }\end{array}$
Payment in case of credit purchase

| Debit: | Creditors Account |
| :--- | :--- |
| Credit: | Cash/Bank |

## ( In Case of Manufacturing Concern)

- In case of manufacturer there are at least two types of Stock Accounts:
o Raw Material Stock Account
o Finished Goods Stock Account

## Raw material

Raw material is the basic part of an item, which is processed to make a complete item

## Finished goods

Finished goods contain the items that are ready for sale, but could not be sold in that accounting period.

## Work in process

In manufacturing concern, raw material is put in a process to convert it into finished goods. At the end of accounting period, some part of raw material remains under process. i-e. it is neither in shape of raw material nor in shape of finished goods. Such items are taken in stock as work in process.

Flow of costs

In manufacturing concern, Raw material stock is put into process. For accounting purposes, all value of stock and other manufacturing costs are charged to work in process account. When the process is completed and the goods are prepared, all the value of work in process is charged to finished goods account. The business sells finished goods for the whole accounting year. At the end of the year, goods that are unsold are deducted from cost of goods sold account.

## Journal Entries (Manufacturing Concern)

Purchase of raw material

| Debit: | Stock $/$ Material Account |
| :--- | ---: |
| Credit: | Cash/Bank/Creditors |

Other direct costs incurred
Debit: Relevant cost/Expense Head
Credit: Cash/Bank/Payables
Raw material issued and other costs allocated to production of units

Debit:
Work in process
Credit:

Debit:
Credit:
Work in process
Relevant Expense Head Account

When production is completed
Debit: Finished Goods Stock Account
Credit: Work in process account

Entry for Cost of sale
Debit:
Cost of Goods Sold Account
Credit:
Finished Goods Stock Account
Entry for sale of goods
Debit:
Cash/Account receivable Account

## Credit: Sales Account

Return of purchased material
There are two options for recording purchase material return

- Option 1

| Debit: | Goods Return Account |
| :--- | :--- |
| Credit: | Stock Material Account |

AND
$\begin{array}{ll}\text { Debit: } & \text { Cash/Bank Account } \\ \text { Credit: } & \text { Goods Return Account }\end{array}$

## OR

If our supplier supplies us some other material in exchange of material returned. Then:

```
Debit Raw Material Stock Account
Credit: Goods Return Account
```

In the first case above, cash is received in return of goods. In the second case, defective goods are exchanged with quality goods. That is why, we debited our stock account. Both entries are correct for return of purchased items.

Option 2
Debit:
Credit:
Cash/Creditor Account
Stock Account

## Example 1

- Record the following transactions:

1. Purchased goods for cash Rs. 10,000
2. Purchased goods on credit from ABC Co. Rs. 25,000
3. Sold goods whose cost was Rs. 20,000
4. Returned goods to ABC Co. that originally cost Rs. 5,000
5. Paid to ABC Co. Rs. 15,000 through cheque
6. Sold goods whose cost was Rs. 5,000

- Answer following questions.

1. What is the cost of goods sold?
2. What is the value of closing stock?
3. What amount is payable to ABC Co.?

1 - Purchased goods for cash Rs. 10,000

| Cash Account Code -- |  |  |  |  | Dr. Rs. |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Date | No. | Narration |  | 10,000 | (10,000) |
|  | 1 | Purchased goods for cash |  |  |  |
|  |  |  |  |  |  |
|  |  |  |  |  |  |

| Stock Account Code -- |  |  |  |  | Nr. Rs. |
| :--- | :--- | :--- | :--- | :--- | :--- |

Q1 - What is the cost of goods sold?

| Cost of Goods Sold Code -- |  |  |  |  | Cr. Rs. |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Date | No. | Narration | Br. Rs. | Dr/(Cr) |  |
|  | 3 | Goods sold | 20,000 |  | 20,000 |
|  | 6 | Goods sold | 5,000 |  | 25,000 |
|  |  |  |  |  |  |
|  |  |  |  |  |  |

Q2 - What is the value of closing stock?

| Stock Account Code -- |  |  |  |  | Dr. Rs. |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Date | No. | Narration | 10,000 |  | 10,000 |
|  | 1 | Purchased goods for cash | Bal. Dr/(Cr) |  |  |
|  | 2 | Purchased goods from ABC | 25,000 |  | 35,000 |
|  | 3 | Goods sold |  | 20,000 | 15,000 |
|  | 4 | Returned goods to ABC |  | 5,000 | 10,000 |
|  | 6 | Goods sold |  | 5,000 | $\mathbf{5 , 0 0 0}$ |

Q3 - What amount is payable to ABC Co.?

| ABC Code -- |  |  |  |  | Cor. Rs. |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Date | No. | Narration | Cr. Rs. | Bal. Dr/(Cr) |  |
|  | 2 | Purchased goods from ABC |  | 25,000 | $(25,000)$ |
|  | 4 | Returned goods to ABC | 5,000 |  | $(20,000)$ |
|  | 5 | Paid to ABC | 15,000 |  | $(5,000)$ |
|  |  |  |  |  |  |

Example 2

- Using the following data calculate the Cost of Goods Sold of XYZ Co.
- Stock levels

Raw material
Work in process
Finished goods

Opening Rs.
Closing Rs.
100,000
85,000

- Purchase of raw material during the period Rs. 200,000

200,000

- Paid to labour Rs. 180,000 out of which Rs. 150,000 used on production.
- Other production costs Rs. 50,000

## ILLUSTRATION \# 1

Record the following transactions

- Purchased goods for cash Rs, 10,000
- Purchased goods from Ali Brothers. worth of Rs. 20,000
- Sold goods having cost of Rs.15,000
- Returned goods to Ali Brothers. worth of Rs. 4,000
- Sold goods having cost of Rs. 5,000
- Paid to Ali Brothers. Rs. 10,000.

Also ascertain

- Cost of goods sold.
- Value of closing stock.
- Payable to Ali Brothers.

## SOLUTION

First, we will pass journal entries

| Particulars | Amount(Dr.) <br> Rs. | Amount(Cr.) <br> Rs. |
| :---: | :---: | :---: |
| Stock Account | 10,000 |  |
| Cash Account |  | 10,000 |

## ILLUSTRATION \# 2

- Using the following data calculate the Cost of Goods Sold of XYZ Co.
Stock levels
Opening Rs.
Closing Rs.
Raw material
100,000 85,000

| Work in process | 90,000 | 95,000 |
| :--- | ---: | :--- |
| Finished goods | 150,000 | 140,000 |

o Purchase of raw material during the period Rs. 200,000
o Paid to labour Rs. 180,000 out of which Rs. 150,000 used on production.
o Other production costs Rs. 50,000

## SOLUTION

| Raw Material Stock Account |  |  |  |
| :--- | ---: | :--- | ---: |
| Debit |  | Credit |  |
| O/S | 100,000 |  |  |
| Purchases | 200,000 | WIP | 215,000 |
|  |  | C/S | 85,000 |
| Total | $\mathbf{3 0 0 , 0 0 0}$ | Total | $\mathbf{3 0 0 , 0 0 0}$ |

| Labour Account |  |  |  |
| :--- | :--- | :--- | :--- |
| Debit |  | Credit |  |
| Cost | 180,000 | Charged | 150,000 |
|  |  |  |  |
|  |  |  |  |
| Total | $\mathbf{1 8 0 , 0 0 0}$ | Total | $\mathbf{1 8 0 , 0 0 0}$ |

| Other Costs Account |  |  |  |
| :--- | :--- | :--- | ---: |
| Debit |  | Credit |  |
| Paid | 50,000 | Charge | 50,000 |
|  |  |  |  |
|  |  |  |  |
|  |  |  |  |
| Total | $\mathbf{5 0 , 0 0 0}$ | Total | $\mathbf{5 0 , 0 0 0}$ |

| Work in Process Account |  |  |  |
| :--- | ---: | :--- | :--- |
| Debit |  | Credit |  |
| O/B | 90,000 |  |  |
| Raw M | 215,000 |  |  |
| Labor | 150,000 | F/G | 410,000 |
| O/H | 50,000 | C/B | 95,000 |
| Total | $\mathbf{5 0 5 , 0 0 0}$ | Total | $\mathbf{5 0 5 , 0 0 0}$ |

| Finished Goods Stock Account |  |  |  |
| :--- | ---: | :--- | ---: |
| Debit |  | Credit |  |
| O/S | 150,000 | COS | 420,000 |
| WIP | 410,000 | C/S | 140,000 |
| Total | $\mathbf{5 6 0 , 0 0 0}$ | Total | $\mathbf{5 6 0 , 0 0 0}$ |

| Cost of Goods Sold Account |  |  |  |
| :--- | :--- | :--- | :--- |
| Debit |  | Credit |  |
| F/G | 420,000 |  |  |
|  |  |  |  |
|  |  |  |  |

- In the Raw Material Account, the debit side contains:

O Opening balance 100,000
O Purchases 200,000

- On the credit side, closing balance of Rs. 85,000 is shown along with the balancing figure of Rs. 215,000 which is charged to work in process OR WIP account through the following entry:

```
Debit:
Work in process OR WIP Account
Credit:
Raw Material Account
```

- Labour cost of Rs. 180,000 is given, out of which Rs. 150,000 is charged to production. (Remaining cost of Rs. 30,000 will be explained in some later stage). That means Rs. 150,000 are charged to work in process OR WIP account through the following entry:
Debit:
Credit:
Work in process OR WIP Account
Labour Cost Account
- Other costs of Rs. 50,000 is also charged to work in process OR WIP account through the following entry:
Debit:
Work in process OR WIP Account
Credit:
Other Costs Account
- Work in process account has the opening balance of Rs. 90,000 and closing balance of Rs. 95,000. After charging all the above mentioned accounts to WIP. Balancing figure of work in process of Rs. 410,000 is charged to finished goods account through the following entry:

| Debit: | Finished Goods Account |
| :--- | :--- |
| Credit: | Work in process Account |

- Finished goods account has the opening balance of Rs. 150,000 and closing balance of Rs. 140,000. After charging WIP account to Finished goods, the balancing figure of Rs. 420,000, is charged to cost of goods sold account through the following entry:

```
Debit:
Cost of Goods Sold Account
Credit: Finished Goods Account
```

## Lesson-16

## COST OF GOODS SOLD STATEMENT

In manufacturing concern, separate books are maintained to keep the record of every single work done in manufacturing process to ascertain cost incurred on production of goods. This record gives information about total cost incurred on manufacturing process and per unit cost of goods manufactured. When goods are produced, these are sold to the customers of the business and goods unsold are taken into stock. At the end of the financial year, manufacturing concern prepares a statement which gives the brief summary of the whole process.

This statement shows the value of raw material consumed, amount spent on labour and other factory expenses, finished goods produced and goods unsold (in stock). Such statement is called 'cost of goods sold statement'. Manufacturing concerns, while presenting financial statements, also present cost of goods sold statement.

Standard format of cost of goods sold statement is given below:

| Raw Material: | O/S Raw Material <br> + Purchases <br> + Cost Incurred to Purchase RM <br> - C/S Raw Material <br> Cost of Material Consumed |
| :---: | :---: |
| Conversion Cost: | + Direct Labour Cost <br> + Factory Overheads <br> Total Factory Cost |
| Work in Process | $\begin{aligned} & +\mathrm{O} / \mathrm{S} \text { of WIP } \\ & \quad-\mathrm{C} / \mathrm{S} \text { of WIP } \\ & \quad \begin{array}{\|c} \text { Cost of Goods Manufactured } \end{array} \end{aligned}$ |
| Finished Goods | $+\mathrm{O} / \mathrm{S}$ of Finished Goods <br> - C/S of Finished Goods Cost of Good Sold |

Cost of material consumed - is the cost of material used for consumption that has been put in the production process. This head shows the raw material left unused from the previous year(opening stock), raw material purchased in the current year, expenses incurred in bringing the purchased material into the business premises and raw material that is not used in the current year(closing stock).

Over Heads are the other costs incurred in relation of manufacturing of goods.
Examples are factory utilities, supervisor salaries, equipment repairs etc.
Total factory cost - is the cost of material consumed plus labour and over heads. In other words it is the total cost incurred in the factory.

Cost of goods manufactured - is total factory cost plus opening stock of work in process less closing stock of work in process.

Cost of goods sold - is the cost of goods manufactured plus opening stock of finished goods less closing stock of finished goods.

Prime/Basic Cost $=$ Cost of Direct Material Consumed + Direct Labour cost

Conversion cost it is the cost incurred to convert raw material to finished goods.
Conversion cost $=$ Labour cost + factory overhead

## Example

- Using the following data calculate the Cost of Goods Sold of XYZ Co.

| $\quad \square \quad$ Stock levels | O/S Rs. | C/S Rs. |
| :--- | ---: | :---: |
| Raw material | 100,000 | 85,000 |
| Work in process | 90,000 | 95,000 |
| Finished goods | 150,000 | 140,000 |

- Purchase of raw material during the period Rs. 200,000
- Paid to labour Rs. 180,000 out of which Rs. 150,000 used on production.
- Other production costs Rs. 50,000

Solution
XYZ Co.
Cost of Goods Sols Statement For the period ended-------

Cost of Goods Sold
420000

## ILLUSTRATION

Following information of Ahmad \& Company is given. Prepare a cost of goods sold statement.

| Stock levels | O/S Rs. | C/S Rs. |
| :--- | ---: | ---: |
| Raw material | 150,000 | 115,000 |
| Work in process | 50,000 | 55,000 |
| Finished goods | 120,000 | 100,000 |

- Purchase of raw material during the period Rs. 100,000
- Transportation charges of items purchased Rs. 5,000

Paid to labour Rs. 100,000.

- Other production costs(FOH) Rs. 80,000

## SOLUTION

## STOCK CARD

Stock card is used to keep the record of what has come in stock and what has gone out of it. Standard format of stock card is given below:

| Stock Account Item 01 |  |  |  |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Date | Receipts | Qty | Rate | Amount | Date | Issues | Qty | Rate | Amount |
|  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |

Stock card has two parts.

- Receipt side
- Issue side

Both sides have similar columns that include:

- Nature of item to be kept in stock
- Quantity of items
- Rate at which it was purchased
- Total value of items

Receipt side is used to record data of items coming in the stock and issue side is used to record information of goods issued for manufacturing process.

## VALUATION OF STOCK

Any manufacturing organization purchases different material through out the year. The prices of purchases may be different due to inflationary conditions of the economy. The question is, what item should be issued first \& what item should be issued later for manufacturing. For this purpose, the organization has to make a
policy for issue of stock. All the issues for manufacturing and valuation of stock are recorded according to the policy of the organization. Mostly these three methods are used for the valuation of stock:

- First in first out (FIFO)
- Last in first out (LIFO)
- Weighted average

## FIRST IN FIRST OUT (FIFO)

The FIFO method is based on the assumption that the first merchandise purchased is the first merchandised issued. The FIFO uses actual purchase cost. Thus, if merchandise has been purchased at several different costs, the inventory (stock) will have several different cost prices. The cost of goods sold for a given sales transaction may involve several different cost prices.

## CHARACTERISTICS

- This is widely used method for determining values of cost of goods sold and closing stock.
- In the FIFO method, oldest available purchase costs are transferred to cost of goods sold. That means the cost if goods sold has a lower value and the profitability of the organization becomes higher.
- As the current stock is valued at recent most prices, the current assets of the company have the latest assessed values.

## LAST IN FIRST OUT (LIFO)

As the name suggests, the LIFO method is based on the assumption that the recently purchased merchandise is issued first. The LIFO uses actual purchase cost. Thus, if merchandise has been purchased at several different costs, the inventory (stock) will have several different cost prices. The cost of goods sold for a given sales transaction may involve several different cost prices.

## CHARACTERISTICS

- This is alternatively used method for determining values of cost of goods sold and closing stock.
- In the LIFO method recent available purchase costs are transferred to cost of goods sold. That means the cost of goods sold has a higher value and the profitability of the organization becomes lower.
- As the current stock is valued at oldest prices, the current assets of the company have the oldest assessed values.

## WEIGHTED AVERAGE METHOD

When weighted average method is in use, the average cost of all units in inventory, is computed after every purchase. This average cost is computed by dividing the total cost of goods available for sale by the number of units in inventory. Under the average cost assumption, all items in inventory are assigned the same per unit cost. Hence, it does not matter which units are sold; the cost of goods sold is always based on current average unit cost.

## CHARACTERISTICS

- Under the average cost assumption, all items in inventory are assigned same per unit cost (the average cost). Hence it does not matter which units are sold first. The cost of goods sold is always on the current average unit cost.
- Since all inventories are assigned same cost, this method does not make any effect on the profitability and does not increase/decrease any asset in the financial statements.
- This is the alternatively used method for determining values of cost of goods sold and closing stock. Example
- Receipts:

| ■ 01 Jan 20--, | 10 units @ Rs. 150 per unit |
| :--- | :--- | :--- |
| ■ 02 Jan 20--, | 15 units @ Rs. 200 per unit |
| ■ 10 Jan 20--, | 20 units @ Rs. 210 per unit |

- Issues:
■ 05 Jan 20--, 05 units
- 06 Jan 20--, 10 units
- 15 Jan 20--, 15

FIFO Method of Stock Valuation

| Date | Receipts | Issues | Value of Stock |
| :---: | :---: | :---: | :---: |
| 01-01-20-- | 10 @ Rs. 150 |  | $10 \times 150=15001500$ |
| 02-01-20-- | 15 @ Rs. 200 |  | $\begin{aligned} & 10 \times 150=1500 \\ & 15 \times 200=30004500 \end{aligned}$ |
| 05-01-20-- |  | 5 @ $150=750750$ | $\begin{aligned} 5 \times 150 & =750 \\ 15 \times 200 & =30003750 \end{aligned}$ |
| 06-01-20-- |  | $\begin{aligned} & 5 @ 150=750 \\ & 5 @ 200=10001750 \end{aligned}$ | $\begin{aligned} 0 \times 150 & =0 \\ 10 \times 200 & =20002000 \end{aligned}$ |
| 10-01-20-- | 20 @ Rs. 210 |  | $\begin{aligned} & 10 \times 200=2000 \\ & 20 \times 210=42006200 \end{aligned}$ |
| 15-01-20-- |  | $\begin{aligned} & 10 @ 200=2000 \\ & 5 @ 210=10503050 \end{aligned}$ | $\begin{aligned} \hline 0 \times 200 & =0 \\ 15 \times 210 & =31503150 \end{aligned}$ |

Weighted Average Method of Stock Valuation

| Date | Receipts | Issues | Value of Stock | Average Cost |
| :--- | :--- | :--- | :--- | :--- |
| $01-01-20--$ | $10 \times 150=1500$ |  | 1500 | $1500 / 10=150$ |
| $02-01-20--$ | $15 \times 200=3000$ |  | $1500+3000=4500$ | $4500 / 25=180$ |
| $05-01-20--$ |  | $5 \times 180=900$ | $4500-900=3600$ | $3600 / 20=180$ |
| $06-01-20--$ |  | $10 \times 180=1800$ | $3600-1800=1800$ | $1800 / 10=180$ |
| $10-01-20--$ | $20 \times 210=4200$ |  | $1800+4200=6000$ | $6000 / 30=200$ |
| $15-01-20--$ |  | $15 \times 200=3000$ | $6000-3000=3000$ | $3000 / 15=200$ |

## Effects of Valuation Method on Profit

FIFO Method

- Cost of Sales $=750+1750+3050=5,550$

Gross Profit $=7500-5550=1,950$
Weighted Average Method

- Cost of Sales $=900+1800+3000=5,700$

Gross Profit $\quad=7500-5700 \quad=1,300$

Valuation of stock by weighted average method:
$\left.\begin{array}{|c|l|l|c|c|c|c|c|}\hline \text { Date } & \text { Receipts } \\ \text { Issues }\end{array} \begin{array}{c}\text { Value of } \\ \text { Stock }\end{array} \quad \begin{array}{c}\text { Total } \\ \text { Amount(Rs.) }\end{array}\right]$

## LIFO METHOD WILL BE DISCUSSED AT SOME LATER STAGE

## DEPRECIATION

Depreciation is a systematic allocation of the cost of a depreciable asset to expense over its useful life. It is a process of charging the cost of fixed asset to profit \& loss account.

Fixed Assets are those assets which are:

- Of long life
- To be used in the business to generate revenue
- Not bought with the main purpose of resale.

> Fixed assets are also called "Depreciable Assets"

When an expense is incurred, it is charged to profit \& loss account of the same accounting period in which it has incurred. Fixed assets are used for longer period of time. Now, the question is how to charge a fixed asset to profit \& loss account. For this purpose, estimated life of the asset is determined. Estimated useful life is the number of years in which a fixed asset is expected to be used efficiently. It is the life for which a machine is estimated to provide more benefit than the cost to run it. Then, total cost of the asset is divided by total number of estimated years. The value, so determined, is called 'depreciation for the year' and is charged to profit \& loss account. The same amount is deducted from total cost of fixed asset in the financial year in which depreciation is charged. The net amount (after deducting depreciation) is called 'Written down Value'.

WDV $=$ Original cost of fixed asset - Accumulated Depreciation
Accumulated Depreciation is the depreciation that has been charged on a particular asset from the time of purchase of the asset to the present time. This is the amount that has been charged to profit and loss account from the year of purchase to the present year.
Depreciation accumulated over the years is called accumulated depreciation.

## Useful life

- Useful Life / Economic Life is the time period for machine is expected to operate efficiently.
- It is the life for which a machine is estimated to provide more benefit than the cost to run it.

## GROUPINGS OF FIXED ASSETS

Major groups of Fixed Assets:

- Land
- Building
- Plant and Machinery
- Furniture and Fixtures
- Office Equipment
- Vehicles

No depreciation is charged for 'Land'. In case of 'Leased Asset/Lease Hold Land' the amount paid for it is charged over the life of the lease and is called Amortization.

## RECORDING OF JOURNAL ENTRIES

Purchase of fixed asset:
Debit: Relevant asset account
Credit: Cash, Bank or Payable Account

For recording of depreciation, following two heads of accounts are used:

- Depreciation Expense Account
- Accumulated Depreciation Account

Depreciation expense account contains the depreciation of the current year. Accumulated depreciation contains the depreciation of the asset from the financial year in which it was bought up to the present financial year. . Depreciation of the following years in which asset was used is added up in this account. In other words, this head of account shows the cost of usage of the asset up to the current year. Depreciation account is charged to profit $\&$ loss account under the heading of Administrative Expenses. In the balance sheet, fixed assets are presented at written down value. i-e.

$$
\text { WDV }=\text { Actual cost of fixed asset }- \text { Accumulated Depreciation. }
$$

Journal entry for the depreciation is given below:
Debit: Depreciation Expenses Account
Credit: Accumulated Depreciation Account

## PRESENTATION OF DEPRECIATION

Charging depreciation to any head in profit $\&$ loss account depends upon the nature of work performed by the asset. Consider an organization has purchased computers. If computers are being used by the management, this means that administrative work is done by computers. So, depreciation of computers will be charged to Administrative Expenses. On the other hand, if machines working in the factory are computerized. The value of depreciation of the computers attached with the machines will be charged to cost of goods sold. The reason being, the computers are the part of manufacturing process \& depreciation of computers will be charged to the cost of production. Again consider the selling department of the business is very large. Depreciation of computers used in selling department will be charged to selling expenses.

You can see that computer is a single asset and its depreciation is charged in three different heads depending upon the nature of work done by the computer.

Depreciation for the year is charged to:
i. Cost of Goods Sold
ii. Administrative Expenses
iii. Selling Expenses

- In balance sheet Fixed Assets are shown at Cost less Accumulated Depreciation i.e. Written Down Value (WDV)

## METHODS OF CALCULATING DEPRECIATION

There are several methods for calculating depreciation. At this stage, we will discuss only two of them namely:

- Straight line method or Original cost method or Fixed installment method
- Reducing balance method or Diminishing balance method or written down method.

## STRAIGHT LINE METHOD

Under this method, a fixed amount is calculated by a formula. That fixed amount is charged every year irrespective of the written down value of the asset. The formula for calculating the depreciation is given below:

$$
\text { Depreciation }=(\text { cost }- \text { Residual value }) / \text { Expected useful life of the asset }
$$

Residual value is the cost of the asset after the expiry of its useful life.
Under this method, at the expiry of asset's useful life, its written down value will become zero. Consider the following example:

- Cost of the Asset = Rs.100,000
- Life of the Asset $=5$ years
- Annual Depreciation $=20 \%$ of cost or Rs.20,000

## Written down value method

- Cost of the Asset = Rs. 100,000
- Annual Depreciation $=20 \%$

| $\square$ | Year 1 Depreciation | $=20 \%$ of 100,000 |
| :--- | :--- | :--- |
| Year 1 WDV | $=100,000-20,000$ | $=80,000$ |
| $\square$ Year 2 Depreciation | $=20 \%$ of 80,000 | $=16,000$ |
| $\square$ Year 2 WDV | $=80,000-16,000$ | $=64,000$ |

## Example

Cost of an asset: Rs. 120,000
Residual value: Rs. 20,000
Expected life: Rs. 5 years
Calculate depreciation and the written down value of the asset for five years.

## SOLUTION

## Straight line method

$$
\text { Depreciation }=(120,000-20,000) / 5=\text { Rs. } 20,000
$$

| Particulars | Depreciation <br> (Rs) | Written <br> Down <br> Value (Rs.) |
| :--- | ---: | ---: |
| Depreciable cost | $(20,000)$ | 100,000 |
| Dep. Of the 1 ${ }^{\text {st }}$ year | $(20,000)$ | 60,000 |
| Dep. Of the 2 $2^{\text {nd }}$ year | $(20,000)$ | 40,000 |
| Dep. Of the 3 ${ }^{\text {rd }}$ year | $(20,000)$ | 20,000 |
| Dep. Of the 4 | 0 |  |
| Dep. Of the 5ear | $(20,000)$ |  |
|  |  |  |

## REDUCING BALANCE METHOD

Under this method, depreciation is calculated on written down value. In the first year, depreciation is calculated on cost. Afterwards written down value is calculated by deducting accumulated depreciation from the cost of that asset(cost - accumulated depreciation) and depreciation is charged on that value. In this method, the value of asset never becomes zero. Consider the following example:
Cost of an asset: Rs. 100,000
Expected life: Rs. 5 years
Depreciation rate: $\quad 20 \%$

## SOLUTION

| Particulars | Depreciation (Rs) | Accumulated Depreciation (Rs.) | Written <br> Down <br> Value (Rs.) |
| :---: | :---: | :---: | :---: |
| Depreciable cost |  |  | 100,000 |
| Dep. Of the $1^{\text {st }}$ year |  |  |  |
| 100,000 x 20\% | 20,000 | 20,000 | 80,000 |
| Dep. Of the $2^{\text {nd }}$ year |  |  |  |
| 80,000 x 20\% | 16,000 | 36,000 | 64,000 |
| Dep. Of the $3^{\text {rd }}$ year |  |  |  |
| 64,000 x 20\% | 12,800 | 48,800 | 51,200 |
| Dep. Of the $4^{\text {th }}$ year |  |  |  |
| 51,200 x 20\% | 10,240 | 59,040 | 40,960 |
| Dep. Of the $5^{\text {th }}$ year $40,960 \times 20 \%$ | 8,192 | 67,232 | 32,768 |

You see, at the end of five years, WDV of the asset is Rs. 32,768, not zero. But in case of straight line method, the WDV, after five years was zero. So, in the opinion of some people, reducing balance method is better than that of straight line method, but both methods are effective. It is the management that has to decide, which method is best suited to their business.
Once an asset has been fully depreciated, no more depreciation should be recorded on it, even though the property may be in good condition and may be in use. The objective of depreciation is to spread the cost of an asset over the periods of its usefulness; in no case can depreciation be greater than the amount paid for the asset. When a fully depreciated asset is in use beyond the original estimate of useful life, the asset account
and the accumulated depreciation account should remain in the accounting records without further entries until the asset is retired.

## Lesson-18

## DEPRECIATION

It is a systematic allocation of the cost of a depreciable asset to expense over its useful life".

## GROUPINGS OF FIXED ASSETS

Major groups of Fixed Assets:

- Land
- Building
- Plant and Machinery
- Furniture and Fixtures
- Office Equipment
- Vehicles

No depreciation is charged for 'Land'. In case of ‘Leased Asset/Lease Hold Land’ the amount paid for it is charged over the life of the lease and is called Amortization.

## RECORDING OF JOURNAL ENTRIES

Purchase of fixed asset:
Debit: Relevant asset account
Credit: Cash, Bank or Payable Account
For recording of depreciation, following two heads of accounts are used:

- Depreciation Expense Account
- Accumulated Depreciation Account

Depreciation expense account contains the depreciation of the current year. Accumulated depreciation contains the depreciation of the asset from the financial year in which it was bought. Depreciation of the following years in which asset was used, is added up in this account. In other words, this head of account shows the cost of usage of the asset up to the current year. Depreciation account is charged to profit \& loss account under the heading of Administrative Expenses. In the balance sheet, fixed assets are presented at written down value. i-e.
WDV = Actual cost of fixed asset - Accumulated Depreciation.

Journal entry for the depreciation is given below:

$$
\begin{array}{lc}
\text { Debit: } & \text { Depreciation Account } \\
\text { Credit: } & \text { Accumulated Depreciation Account }
\end{array}
$$

## METHODS OF CALCULATING DEPRECIATION

There are several methods of calculating depreciation. At this stage, we will discuss only two of them namely:

- Straight line method
- Reducing balance method

## STRAIGHT LINE METHOD

In this method, a fixed amount is calculated by a formula. That fixed amount is charged every year irrespective of the written down value of the asset. The formula for calculating the depreciation is given below:

$$
\text { Depreciation }=(\text { cost }- \text { Residual value }) / \text { Expected useful life of the asset }
$$

Residual value is the cost of the asset after the expiry of its useful life.

## REDUCING BALANCE METHOD

In this method, depreciation is calculated on written down value. In the first year, depreciation is calculated on cost. Afterwards written down value is calculated by deducting accumulated depreciation from the cost of that asset(cost - accumulated depreciation) and depreciation is charged on that value.

- Cost of Asset - Price at which the asset was initially recorded.
- Written Down Value / Book Value - Cost minus Accumulated Depreciation.

In reducing balance method, a formula is used for calculation of depreciation rate. ie.

- Rate $=1-\sqrt[2]{\mathrm{RV} / \mathrm{C}}$

Where:
"RV" = Residual Value
"C" = Cost
" $n$ " = Life of Asset
Calculate the rate if:

- Cost $=100,000$
- Residual Value (RV) $=20,000$
- Life $=3$ years
- $\quad$ Rate $=1-₹ 0000 / 100000$

$$
=42 \%
$$

Year 1

## Disposal of Asset

Cost of Asset
Life of the Asset
Depreciation Method

$$
\begin{gathered}
\quad=100,000 \\
=5 \text { Years } \\

## POLICY FOR DEPRECIATION

The management of the business selects the policy for charging depreciation. There is no law binding on the management. The management is free to choose method of depreciation and policy of charging depreciation. Normally two policies are commonly used:

- Depreciation on the basis of use
- In the year of purchase, full year's depreciation is charged; where as, in the year of sale no depreciation is charged.
Now it is up to the management to decide, what method and what policy is better and effective for their business.

## DISPOSAL OF FIXED ASSET

When depreciable asset is disposed off at any time during the financial year, an entry should be made to give effect of the disposal. Since, the residual value of asset is only estimated, it is common for asset to be sold at price that differs from its book value at the date of disposal. When asset is sold, any profit or loss is computed by comparing book value with the amount received from sale. As you know, book value is obtained by deducting accumulated depreciation from original cost of the asset. A sale price in excess of the book value produces profit; a sale price below the book value produces loss. This profit or loss should be shown in the profit $\&$ loss account.

## ENTRIES FOR RECORDING DISPOSAL

| Debit <br> Credit | Fixed Asset Disposal A/c <br> Fixed Asset Cost A/c <br> (With the cost of asset) |
| :--- | :--- |
| Debit <br> Credit | Accumulated Dep. A/c <br> Fixed Asset Disposal A/c <br> (With the depreciation accumulated to date) |
|  | Cash / Bank / Receivable A/c <br> Debit <br> Credit |
| Fixed Asset Disposal A/c |  |
| (With the price at which asset is sold) |  |

- An asset is purchased for Rs. 500,000 on Nov. 01, 2001.
- Depreciation rate is $10 \%$ p.a.
- The Asset is sold on Apr. 30, 2004.
- Financial Year is July 1 to June 30

## Question

- Calculate the WDV For both policies

Depreciation is Charged on the Basis of USe

| Year | On the Basis of Use | Rs. |
| :--- | :--- | :--- |
| $1-11-2001$ | Cost | 500,000 |
| $2001-2002$ | Dep. $500,000 \times 10 \% \times 8 / 12$ | $(33,333)$ |
| $30-6-2002$ | WDV | 466,667 |
| $2002-2003$ | Dep. 466,666 x 10\% | $(46,667)$ |
| $30-6-2003$ | WDV | 420,000 |
| $2003-2004$ | Dep. 420,000 $\times 10 \% \times 10 / 12$ | $(35,000)$ |
| $30-4-2004$ | WDV | 385,000 |
|  |  |  |

Full Dep. In the Year of Purchase

| Year | Full Dep. in year of Purchase | Rs. |
| :--- | :--- | :--- |
| $1-11-2001$ | Cost | 500,000 |
| $2001-2002$ | Dep. $500,000 \times 10 \%$ | $(50,000)$ |
| $30-6-2002$ | WDV | 450,000 |
| $2002-2003$ | Dep. $450,000 \times 10 \%$ | $(45,000)$ |
| $30-6-2003$ | WDV | 405,000 |
| $2003-2004$ | Dep. 00 in the year of sale | 00 |
| $30-6-2004$ | WDV | 405,000 |
|  |  |  |

## Contents of Fixed Assets Register

- Different record for each class of assets
- Date of purchase
- Detailed particulars of asset
- Location of asset
- Record of depreciation

## ILLUSTRATION

Cost of asset
Life of the asset
Depreciation method
Residual value
Sale price after 5 years

Rs. 200,000
5 years
Straight line
Rs. 20,000
30,000

Calculate profit/Loss on the sale of the asset?
SOLUTION

Written down value $=200,000-20,000=180,000$
Depreciation/year $=180,000 / 5=36,000$ (Straight line method)

| Particulars | Depreciation <br> (Rs) | $\begin{gathered} \text { Written } \\ \text { Down } \\ \text { Value (Rs.) } \end{gathered}$ |
| :---: | :---: | :---: |
| Depreciable cost |  | 200,000 |
| Dep. Of the $1^{\text {st }}$ year | $(36,000)$ | 164,000 |
| Dep. Of the $2^{\text {nd }}$ year | $(36,000)$ | 128,000 |
| Dep. Of the $3^{\text {rd }}$ year | $(36,000)$ | 92,000 |
| Dep. Of the $4^{\text {th }}$ year | $(36,000)$ | 56,000 |
| Dep. Of the $5^{\text {th }}$ year | $(36,000)$ | 20,000 |

Book value after five years
Rs. 20,000
Sale price
Rs. 30,000
Profit on sale
Rs. 10,000 (30,000-20,000)

## Same illustration is solved by reducing balance method

Cost of asset
Rs. 200,000
Residual value
Estimated useful life

## Calculation of depreciation rate

$$
\begin{aligned}
\text { Depreciation Rate } & =1-\mathrm{n} \sqrt{ } \mathrm{Rv} \overline{\mathrm{c}} \\
& =1-5 \sqrt{ } 20,000 / 200,000 \\
& =37 \%
\end{aligned}
$$

Allocation of depreciation is given below:

| Particulars | Depreciation (Rs) | Accumulated Depreciation (Rs.) | Written Down Value (Rs.) |
| :---: | :---: | :---: | :---: |
| Depreciable cost |  |  | 200,000 |
| Dep. Of the $1^{\text {st }}$ year |  |  |  |
| 200,000 x 37\% | 74,000 | 74,000 | 126,000 |
| Dep. Of the $2^{\text {nd }}$ year |  |  |  |
| 126,000 x 37\% | 46,620 | 120,620 | 79,380 |
| Dep. Of the $3^{\text {rd }}$ year |  |  |  |
| 79,380 x 37\% | 29,371 | 149,991 | 50,009 |
| Dep. Of the $4^{\text {th }}$ year |  |  |  |
| 50,009 x 37\% | 18,503 | 168,494 | 31,506 |
| Dep. Of the $5^{\text {th }}$ year |  |  |  |
| $31,506 \times 37 \%$ | 11,657 | 180,151 | 19,849 |
| Book value after five years |  | Rs. 19,849 |  |
| Sale price |  | Rs. 30,000 |  |
| Profit on sale |  | Rs. 10,151 | 30,000-19,8 |

## CAPITAL WORK IN PROGRESS

If an asset is not completed at that time when balance sheet is prepared, all costs incurred on that asset up to the balance sheet date are transferred to an account called Capital Work in Progress Account. This account is shown separately in the balance sheet below the fixed asset. Capital work in progress account contains all expenses incurred on the asset until it is converted into working condition. All these expenses will become part of the cost of that asset. When an asset is completed and it is ready to work, all costs in the capital work in progress account will transfer to the relevant asset account through the following entry:

$$
\begin{array}{ll}
\text { Debit: } & \text { Relevant asset account } \\
\text { Credit: } & \text { Capital work in progress account }
\end{array}
$$

## ILLUSTRATION \# 1

A machine is purchased for Rs. 400,000. Its useful life is estimated to be five years. Its residual value is Rs. 25,000 . After four years, it was sold for Rs. 40,000 . For the purpose of WDV, its depreciation rate is $40 \%$.

You are required to show calculation of depreciation for four years. Also calculate profit or loss on disposal.

## SOLUTION

## Calculation of depreciation and profit $\&$ loss on the basis of straight line method:

Depreciation/year $=(400,000-25,000) / 5=75,000$ (Straight line method)
As, machine was sold after four years but its useful life was estimated for five years, when we calculate depreciation of the asset under straight line method, we will divide its WDV over five years, not on four years.

| Particulars | Depreciation <br> (Rs) | Written <br> Down <br> Value (Rs.) |
| :--- | ---: | ---: |
| Depreciable cost | $(75,000)$ | 375,000 |
| Dep. Of the $1^{\text {st }}$ year | $(75,000)$ | 225,000 |
| Dep. Of the 2 $2^{\text {nd }}$ year | $(75,000)$ | 150,000 |
| Dep. Of the $3^{\text {rd }}$ year | $(75,000)$ | 75,000 |
| Dep. Of the 4 $4^{\text {th }}$ year |  |  |

Book value after four years
Rs. 75,000
Sale price
Rs. 40,000
Profit/(loss) on sale
Rs. $(35,000)$ i-e. $(40,000-75,000)$

## Calculation of depreciation and profit $\&$ loss on the basis of reducing balance method:

Depreciation rate $=40 \%$

| Particulars | Depreciation <br> (Rs) | Accumulated <br> Depreciation <br> (Rs.) | Written <br> Down <br> Value (Rs.) |
| :--- | ---: | ---: | ---: |
| Depreciable cost <br> Dep. Of the $1^{\text {st }}$ year <br> $400,000 \times 40 \%$ <br> Dep. Of the 2 <br> nd <br> $240,000 \times 40 \%$ <br> Dep. Of the 3 3rd <br> $144,000 \times 40 \%$ <br> Dep. Of the $4^{\text {th }}$ year <br> $86,400 \times 40 \%$$\quad 160,000$ | 160,000 | 240,000 |  |

Book value after four years
Sale price
Profit/(loss) on sale

Rs. 51,840
Rs. 40,000
Rs. $(11,840)$ i-e. $(40,000-51,840)$

## ILLUSTRATION \# 2

Following information of machinery account is available in Year 2004:

- Machine \# 1 is purchased on September 1, 2000 for Rs. 100,000
- Machine \# 2 is purchased on January 31, 2002 for Rs. 200,000
- Machine \# 3 is purchased on July 1, 2003 for Rs. 50,000
- Machine \# 1 is disposed on March 31, 2004

Depreciation is charged @ $25 \%$ reducing balance method. Financial year is closed on June 30 every year.
Show the calculation of depreciation on machinery for four years using the following policies:

- Depreciation is charged on the basis of use
- Full depreciation is charged in the year of purchase and no depreciation is charged in the year of disposal.

## SOLUTION

Depreciation on the basis of use

| Date | Purchase of machine (Rs.) | Depreciation <br> (Rs.) | Accumulated depreciation (Rs.) | Total Accum. Dep. | Written Down Value (Rs.) | Total Written Down Value (Rs.) |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 01-09-2000 | 100,000 | $\begin{array}{\|l\|} \hline \text { Machine \# } 1 \\ 100,000 \times 25 \% \\ \mathbf{x} 10 / 12=\mathbf{2 0 , 8 3 3} \\ \hline \end{array}$ | Machine \# 1 $20,833$ | 20,833 | $\begin{array}{r} \hline \text { Machine \# } \\ 79,167 \end{array}$ | 79,167 |
| 2001-2002 31-01-2002 | 200,000 | $\begin{aligned} & \hline \text { Machine \# 1 } \\ & 79,167 \times 25 \% \\ & =\mathbf{1 9 , 7 9 2} \\ & \text { Machine \# 2 } \\ & 200,000 \times 25 \% \times 5 / \\ & 12=\mathbf{2 0 , 8 3 3} \end{aligned}$ | Machine \# 1 40,625 Machine \#2 20,833 | 61,458 | Machine \# 1 $59,375$ <br> Machine \# 2 $179,167$ | 238,542 |
| 2002-2003 |  | $\begin{aligned} & \hline \text { Machine \# 1 } \\ & 59,375 \times 25 \% \\ & =14,844 \\ & \text { Machine \#2 } \\ & 179,167 \times 25 \% \\ & =\mathbf{4 4 , 7 9 2} \\ & \hline \end{aligned}$ | $\begin{gathered} \hline \text { Machine \# 1 } \\ 55,469 \\ \text { Machine \#2 } \\ 65,625 \end{gathered}$ | 121,094 | Machine \# 1 44,531 Machine \# 2 134,375 | 178,906 |
| 2003-2004 01-07-2003 | 50,000 | Machine \# 1 <br> $44,531 \times 25 \% x$ <br> $9 / 12=\mathbf{8 , 3 5 0}$ <br> Machine \# 2 <br> 134,375x25\% <br> = 33,594 <br> Machine \# 3 <br> 50,000x25\% <br> $=12,500$ | Machine \# 1 63,819 Machine \# 2 99,219 Machine \#3 12,500 | 175,538 | Machine \# 1 $\mathbf{( 3 6 , 1 8 1 )}$ (sold) Machine \# 2 100,781 Machine \# 3 37,500 | 138,281 |

Figure in blue color is the written down value of machine \# 1, which is disposed of by the management.

Full year depreciation in the year of purchase and no depreciation in the year of sale:

| Date | Purchase of machine (Rs.) | Depreciation (Rs.) | Accumulated depreciation (Rs.) | Total Accum. Dep. | Written Down Value (Rs.) | Total Written Down Value (Rs.) |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 01-09-2000 | 100,000 | $\begin{aligned} & \text { Machine \# 1 } \\ & 100,000 \times 25 \% \\ & =\mathbf{2 5 , 0 0 0} \end{aligned}$ | Machine \# 1 $25,000$ | 25,000 | $\begin{array}{r} \text { Machine \# 1 } \\ 75,000 \end{array}$ | 75,000 |

## CAPITAL WORK IN PROGRESS

If an asset is not completed at that time when balance sheet is prepared, all costs incurred on that asset up to the balance sheet date are transferred to an account called Capital Work in Progress Account. This account is shown separately in the balance sheet below the fixed asset. Capital work in progress account contains all expenses incurred on the asset until it is converted into working condition. All these expenses will become part of the cost of that asset. When any expense is incurred or paid, it is included in the Capital Work in Progress Account through the following entry:

$$
\begin{array}{ll}
\text { Debit: } & \text { Work in Progress Account } \\
\text { Credit: } & \text { Cash/Bank/Payable Account }
\end{array}
$$

When an asset is completed and it is ready to work, all costs will transfer to the relevant asset account through the following entry:

$$
\begin{array}{ll}
\text { Debit: } & \text { Relevant asset account } \\
\text { Credit: } & \text { Capital work in progress account }
\end{array}
$$

## PRESENTATION

It is already mentioned that Work in Progress Account is shown separately in the balance sheet below the fixed asset. i-e.

| Name of the Entity |  |  |
| :---: | :---: | :---: |
| Balance Sheet As At |  |  |
| Particulars | Amount Rs. | Amount Rs. |
| Assets <br> Fixed Assets <br> Capital Work in Progress <br> Other Long Term Assets <br> Current Assets |  | $\begin{aligned} & x y z \\ & \text { xyz } \\ & \text { xyz } \end{aligned}$ |
| Total |  | Xyz |
| Liabilities <br> Capital <br> Profit | $\begin{aligned} & x y z \\ & \text { xyz } \end{aligned}$ | Xyz |
| Long Term Liabilities Current Liabilities |  | Xyz |
| Total |  | Xyz |

Consider the solved illustration in the previous lecture:
Depreciation on the basis of use

| Date | Purchase <br> of | Depreciation <br> (Rs.) | Accumulated <br> depreciation | Total <br> Accum. | Written <br> Down Value | Total <br> Written |

## ILLUSTRATION \# 2

Following information of machinery account is available in Year 2004:

- Machine \# 1 is purchased on August 1, 2000 for Rs. 50,000
- Machine \# 2 is purchased on April 1, 2002 for Rs. 100,000
- Machine \# 3 is purchased on March 1, 2004 for Rs. 150,000
- Machine \# 1 is disposed on May 31, 2004

Depreciation is charged @ $20 \%$ reducing balance method. Financial year is closed on June 30 every year.
Show the calculation of depreciation on machinery for four years using the following policies:

- Depreciation is charged on the basis of use
- Full depreciation is charged in the year of purchase and no depreciation is charged in the year of disposal,
SOLUTION
Depreciation on the basis of use

| Date | Purchase of machine (Rs.) | Depreciation (Rs.) | Accumulated depreciation (Rs.) | Total Accum. Dep. | Written Down Value (Rs.) | Total Written Down Value (Rs.) |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 01-08-2000 | 50,000 | $\begin{aligned} & \text { Machine \# } 1 \\ & 50,000 \text { x } 20 \% \\ & \mathrm{x} 11 / 12=\mathbf{9 , 1 6 7} \\ & \hline \end{aligned}$ | Machine \# 1 $9,167$ | 9,167 | $\begin{array}{r} \hline \text { Machine \# } 1 \\ 9,167 \end{array}$ | 40,833 |
| $\begin{aligned} & 2001-2002 \\ & 01-04-2002 \end{aligned}$ | 100,000 | $\begin{aligned} & \text { Machine \# 1 } \\ & 40,833 \times 20 \% \\ & =8,167 \\ & \text { Machine \# 2 } \\ & 100,000 \times 20 \% \times 3 / \\ & 12=5,000 \end{aligned}$ | Machine \# 1 $17,334$ <br> Machine \# 2 $5,000$ | 22,334 | $\begin{gathered} \hline \text { Machine \# 1 } \\ 32,666 \\ \text { Machine \#2 } \\ 95,000 \end{gathered}$ | 127,666 |
| 2002-2003 |  | $\begin{aligned} & \text { Machine \# 1 } \\ & 32,666 \times 20 \% \\ & =6,533 \\ & \text { Machine \# 2 } \\ & 95,000 \times 20 \% \\ & =19,000 \end{aligned}$ | $\begin{gathered} \hline \text { Machine \# 1 } \\ 23,867 \\ \text { Machine \#2 } \\ 24,000 \end{gathered}$ | 47,867 | $\begin{array}{r} \hline \text { Machine \# } 1 \\ 26,133 \\ \text { Machine \#2 } \\ 76,000 \end{array}$ | 102,133 |
| 2003-2004 01-03-2004 | 150,000 | Machine \# 1 <br> $26,133 \times 20 \% x$ <br> $11 / 12=4,791$ <br> Machine \# 2 <br> 76,000x20\% <br> $=15,200$ <br> Machine \# 3 <br> 150,000x20\%x <br> $4 / 12=\mathbf{1 0 , 0 0 0}$ | Machine \# 1 <br> 28,658 <br> Machine \# 2 <br> 39,200 <br> Machine \# 3 <br> 10,000 | 77,858 | Machine \# 1 <br> $(21,342)$ <br> (sold) <br> Machine \# 2 <br> 60,800 <br> Machine \# 3 <br> 140,000 | 200,800 |

## PRESENTATION IN THE BALANCE SHEET

| Year | Cost of Machinery | Accumulated <br> Depreciation | Written Down <br> Value |
| :--- | :--- | :--- | :--- |
| $2000-2001$ | 50,000 | 9,167 | 40,833 |
| $2001-2002$ | 150,000 | 22,334 | 127,666 |
| $2002-2003$ | 150,000 | 47,867 | 102,133 |

Written Down Value of the year 2003-2004

Opening Written Down Value: Rs. 102,133
Add: Cost of machine purchased:
Less: Depreciation of Machine \# 1 in 2003-2004: $(4,791)$
Less: Depreciation of other assets:

## REVALUATION OF FIXED ASSETS

Fixed assets are purchased to be used for longer period. In the subsequent years, the value of asset could be higher or lower than its present book value due to inflationary condition of the economy. Assets are valued at Historical Cost in the books of accounts. Historical Cost is the original cost of the asset at which it was purchased plus additional costs incurred on the asset to bring it in working condition. Sometimes, the management of the business, if it thinks fit, revalues the asset to present it on current market value. Once the asset is revalued to its market value, then its value has to be constantly monitored to reflect the changes in the market value.
If an asset is revalued at higher cost than its original cost, the excess amount will be treated as profit on revaluation of fixed assets and it is credited to Revaluation Reserve Account.
On the other hand, if an asset is revalued at lower cost than its original cost, the balance amount will be treated as loss on revaluation of fixed assets and it is shown in the profit \& loss account of that year in which asset was revalued.

## REVALUATION OF FIXED ASSETS

Fixed assets are purchased to be used for longer period. In the subsequent years, the value of asset could be higher or lower than its present book value due to inflationary condition of the economy. Assets are valued at Historical Cost in the books of accounts. Historical Cost is the original cost of the asset at which it was purchased plus additional costs incurred on the asset to bring it in working condition. Sometimes, the management of the business, if it thinks fit, revalues the asset to present it at current market value. Once the asset is revalued to its market value, then its value has to be constantly monitored to reflect the changes in the market value.
If an asset is revalued at higher cost than its original cost, the excess amount will be treated as profit on revaluation of fixed assets and it is credited to Revaluation Reserve Account.
On the other hand, if an asset is revalued at lower cost than its original value, the balance amount will be treated as loss on revaluation of fixed assets and it is shown in the profit \& loss account of that year in which asset was revalued.

## FAIR VALUE

It is the value, which an asset would bring to the management, when sold to a knowledgeable party in a fair deal.

## RULES FOR REVALUATION

- Revaluation has to be carried out at regular intervals.
- The change in the value should be permanent.
- Whole class of asset has to be revalued.

## ILLUSTRATION

An asset is purchased at the cost of Rs. 300,000 . It was decided by the management that depreciation would be charged @ $20 \%$ on the basis of straight line method. At the end of third year, following information is given:

- Accumulated Depreciation

Rs. 180,000

- Written Down Value

Rs. 120,000

- The management has decided to revalue it to the current market value. The current market value of the asset is 180,000 . You are required to make the necessary adjustments.

## SOLUTION

There are two options for making adjustments for the above mentioned changes:

- Charge the accumulated depreciation to the cost of asset and increase the value of asset with the difference of current market value and WDV.
- Calculate the proportion of increase and increase the cost of asset and accumulated depreciation with that proportion.

## Option \# 1

The accumulated depreciation is charged off against the cost of asset with the help of following entry:

$$
\begin{array}{lcl}
\text { Debit: } & \text { Accumulated Depreciation } & 180,000 \\
\text { Credit: } & \text { Cost of asset A/c } & 180,000
\end{array}
$$

Cost of asset is increased to current market value, i-e., Rs. 180000 . The difference between current market value and WDV is Rs. $60,000(180,000-120,000)$. The credit is given to Revaluation Reserve Account.

| Debit: | Cost of asset A/c | 60,000 |
| :--- | :--- | :---: |
| Credit: | Revaluation Reserve A/c | 60,000 |

## Option \# 2

Both Cost and Accumulated Depreciation are increased in a proportionate manner so that the resulting Book Value is equal to the revalued amount.

Desired increase in WDV

$$
180,000-120,000=60,000
$$

Rs. 60000 is $50 \%$ of 120,000 . Therefore desired increase in Cost and Accumulated Depreciation is $50 \%$.
Cost is increased by $50 \%$ by following entry:

| Debit: | Cost of asset A/c | 150,000 |
| :--- | :--- | :---: |
| Credit: | Revaluation Reserve A/c | 150,000 |

Accumulated depreciation is increased by $50 \%$ with the help of the following entry:

| Debit: | Revaluation Reserve A/c | 90,000 |
| :--- | :--- | :--- |
| Credit: | Accumulated Depreciation A/c | 90,000 |

## CAPITAL AND REVENUE EXPENSES

Capital Expenses are those expenses for which benefit is enjoyed for more than one accounting period. For example, the business has bought a car. Now, car will be used for many years. So, it is a capital expense. Capital Expenditure generally adds Fixed Asset Units or increases Economic Life, Capacity or Efficiency of existing fixed assets. The term used for Capital expenditures is 'Capitalized'.
Revenue Expenses are those expenses for which, the benefit is enjoyed within one accounting period. For example, the business has purchased stationery for office use. Now, the stationery is used within one year in the office. So, this is a revenue expense. The term u1sed for Revenue Expenditures is 'Charged Off'.
Revenue Expenses are those expenses that are:

- Incurred in day to day running of the business.
- Incurred to maintain fixed assets in their original / useable condition.

All Capital Expenses are grouped in balance sheet \& all Revenue expenses are grouped in Profit \& Loss account.

## TYPES OF CAPITAL EXPENDITURE

Capital Expenditure is of two types:

- When an asset is acquired, and
- When an improvement is made in an existing asset.

All the expenditure incurred up to the point of bringing the asset to its intended use is capitalized as the initial cost of asset.
An expenditure that improves the performance of an asset from its originally assessed performance is capital expenditure. However, the expenditure incurred on the maintenance of an asset is treated as Revenue Expense.

## DISTINCTION BETWEEN CAPITAL EXPENDITURE \& REVENUE EXPENDITURE

| Capital Expenditure | Revenue Expenditure |
| :--- | :--- |
| Its effect is long term, i-e. It is not exhausted <br> within the current accounting period. Its benefit is | Its effect is short term, i-e. The benefit is received <br> within one accounting period. |

| received for a number of years in future. |  |
| :--- | :--- |
| Expenditure is said to be capital expenditure when <br> an asset is acquired or performance of an existing <br> asset is increased. | Neither an asset is acquired nor is the performance <br> of any asset increased. |
| It does not occur again and again. It is <br> non- recurring and irregular. | It is recurring and regular and it occurs repeatedly. |
| This expenditure improves the financial position of <br> the business. | This expenditure helps to maintain the business. |
| A portion of this expenditure (Depreciation on <br> asset) is shown in the profit \& loss account and the <br> balance is shown in the balance sheet on asset side. | The whole amount of this expenditure is shown in <br> the profit \& loss account or income statement. |
| It appears in the balance sheet until its benefit is <br> fully exhausted. | It does not appear in the balance sheet. |
| It does not reduce the profit of the concern. | It reduces the profit of the concern. |

## DEFERRED EXPENDITURE

The revenue expenditure that provides benefit for more than one year is called deferred expenditure. It is initially shown in balance sheet. Subsequently, it is charged to profit and loss account over the period in which benefit is derived from it.

## THE GENERAL RULE

The general rule for distinguishing between capital and revenue expenditure:

- The expense whose benefit lasts for a period longer than an accounting period is called capital expenditure, and
- The expense whose benefit is obtained within an accounting period is termed as a revenue expense.

## EXCEPTIONS

- Depending upon the size of expenditure and policy of the organization expenditure can be "Charged to Profit and Loss" instead of "Capitalizing".
- Legal Charges - are as per rule charged to P \& L but when these are incurred to acquire an asset these should be capitalized with the asset.
- Repairs - are also charged to P\&L but when it is of such nature that it enhances the performance of an asset from its original performance than it should be capitalized.
- Wages - are normally revenue expense but when these are paid to men employed to create an asset these should be capitalized as the cost of asset.
- Freight and Carriage - normally a revenue expense, but when paid to bring an asset to its intended use then it is treated as capital.
- Interest on Loan - is normally revenue expenditure but when the loan is taken to purchase an asset its interest is treated as Capital and is added to cost of the asset.

## CAPITAL AND REVENUE RECEIPTS

## CAPITAL RECEIPTS

Receipts which are non-recurring and whose benefit is enjoyed over a long period are called 'Capital Receipts’. For instance, Capital invested, Loan from bank, Sale proceed of fixed assets etc. Capital receipts are shown on the liability side of the balance sheet.

REVENUE RECEIPTS

Receipts which are recurring by nature and which are available for meeting all day to day expenses of a business concern are known as 'Revenue Receipts'. For example, sale proceeds of goods, interest received, rent received etc.

## AREAS COVERED IN THIS LECTURE

In this lecture we will learn about:

- Banking transactions, and
- Bank reconciliation statements.

## BANK BOOK AND BANK STATEMENT

Bank statement is the detail of transactions in one's account provided by the bank. We should understand one thing that our money lying in the bank is an asset for us. But for bank, it is a liability as the bank has a responsibility to return that money to us.

Therefore, when we see a bank statement, it looks like a mirror image of our bank book.
That is, when we pay money into bank account, our asset increases. So we Debit our account whereas for bank, its liability to pay us increases. So our account is credited in its books.

Standard format of Bank book is given hereunder:

| XYZ Traders |  |  | Bank Book (Bank Account Number) |  |  | Account Code -- |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $\begin{aligned} & \hline \text { Date } \\ & 20-- \end{aligned}$ | $\begin{gathered} \hline \text { Vr. } \\ \# \end{gathered}$ | Chq. <br> No. | Narration / Particulars | Ledger Code | Receipt Amount | Payment <br> Amount | Balance <br> Dr/(Cr) |
| Jul 01 |  |  | Opening Balance |  | 50,000 |  | 50,000 |
| Jul 02 |  | 12345 | Paid to Mr. Umer |  |  | 10,000 | 40,000 |
| Jul 03 |  |  | Cash Deposit in Bank |  | 5,000 |  | 45,000 |
| Iul 03 |  | 12346 | Paid to Mr. Ali |  |  | 12,000 | 33,000 |

Standard format of Bank Statement is given hereunder:

| ABC Bank | Bank Statement Account No. xxxxx |  |  |  |
| :---: | :--- | ---: | ---: | ---: |
| Date <br> $20--$ | Narration / <br> Particulars | Withdrawals <br> Amount | Deposits <br> Amount | Balance <br> Dr/(Cr) |
| Iul 01 | Opening Balance as on Jul 01 |  | 50,000 | $(50,000)$ |
| Jul 02 | Chq \# 12345 | 10,000 |  | $(40,000)$ |
| Jul 03 | Cash paid in |  | 5,000 | $(45,000)$ |
| Jul 03 | Chq \# 12346 | 12,000 |  | $(33,000)$ |

At times, banks show the amount in balance column against our General Rule (a credit figure is shown in brackets), just to facilitate the customers. The rule, then becomes, a balance favorable to the customer is shown without brackets.

Our bank statement of previous example will look like as follows.

| ABC Bank | Bank Statement Account No. xxxxx |  |  |  |
| :--- | :--- | :--- | :--- | :--- |
| Date <br> 20-- | Narration / <br> Particulars | Withdrawals <br> Amount | Deposits <br> Amount | Balance |
| Jul 01 | Opening Balance as on Jul 01 |  | 50,000 | 50,000 |
| Jul 02 | Chq \# 12345 | 10,000 |  | 40,000 |
| Jul 03 | Cash paid in |  | 5,000 | 45,000 |
| Jul 03 | Chq \# 12346 | 12,000 |  | 33,000 |

At times, banks record transactions in our account without our knowledge. e.g. bank charges, profit, tax. Sometimes, someone deposits money directly in our account that escapes recording in our books.
This problem is solved by tracing figures from bank book to bank statement on periodic basis in order to update our record.

## EXAMPLE \# 1

The Bank book of Ali Traders shows the following picture for the month of July, 2002:

| Ali Traders |  |  |  | Bank Book (Bank Account Number) |  |  |  | Account Code -- |  |
| :--- | :--- | :--- | :--- | :--- | ---: | ---: | ---: | ---: | :---: |
| Date <br> $20--$ | Vr. <br> $\#$ | Chq. <br> No. | Narration / <br> Particulars | Ledger <br> Code | Receipt <br> Amount | Payment <br> Amount | Balance <br> Dr/(Cr) |  |  |
| Jul 01 |  |  | Opening Balance |  | 150,000 |  | 150,000 |  |  |
| Jul 05 |  | 0001 | Paid to XYZ |  |  | 20,000 | 130,000 |  |  |
| Jul 10 |  |  | Cash Deposit in Bank |  | 5,000 |  | 135,000 |  |  |
| Jul 15 |  | 0002 | Paid to ABC |  |  | 25,000 | 110,000 |  |  |
| Jul 20 |  | 0003 | Paid to creditors |  |  | 50,000 | 60,000 |  |  |
|  |  |  |  |  |  |  |  |  |  |

Balance as per bank book on Jul 31, is Rs. 60,000

The Bank Statement of Ali Traders shows the following record for the month of July, 2002:

| ABC BankBank Statement Account No. xxxxx <br> Date <br> $20--$ <br> Narration / <br> Particulars <br> Jul 01 <br> Opening BalanceWithdrawals <br> Amount |  |  |  | Deposits <br> Amount |
| :--- | :--- | ---: | ---: | ---: |
| Jul 05 | Chq \# 0001 |  | 150,000 | 150,000 |
| Jul 10 | Cash Deposit in Bank | 20,000 |  | 130,000 |
| Jul 15 | Chq \# 0001 |  | 5,000 | 135,000 |
| Jul 20 | Chq \# 0001 | 50,000 |  | 110,000 |
| Jul 31 | Bank charges | 500 |  | 60,000 |
| Jul 31 | Profit |  | 50,500 |  |

Balance as per bank statement on Jul 31, is Rs. 60,200
When we trace the figures, we come to know that there are two transactions that have not been recorded in our books. i-e. Transactions of 'Bank charges' and 'Profit'.

After recording these two transactions, the bank book of Ali Traders looks like as follows:

| Ali Traders | Bank Book (Bank Account Number) |  |  |  | Account Code -- |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Date <br> 20-- | Vr. <br> \# | Chq. <br> No. | Narration / <br> Particulars | Ledger <br> Code | Receipt <br> Amount | Payment <br> Amount | Balance <br> Dr $/(\mathrm{Cr})$ |  |
| Jul 01 |  |  | Opening Balance |  | 150,000 |  | 150,000 |  |
| Jul 05 |  | 0001 | Paid to XYZ |  |  | 20,000 | 130,000 |  |
| Jul 10 |  |  | Cash Deposit in Bank |  | 5,000 |  | 135,000 |  |
| Jul 15 |  | 0002 | Paid to ABC |  |  | 25,000 | 110,000 |  |
| Jul 20 |  | 0003 | Paid to creditors |  |  | 50,000 | 60,000 |  |
| Jul 31 |  |  | Bank charges |  |  | 500 | 59,500 |  |
| Jul 31 |  |  | Profit |  |  | 700 |  | 60,200 |

After recording the missing transactions, Balance as per bank book on Jul 31, is Rs. 60,200, which is the same as bank statement balance.

In the above example, dates of payments in bank book and bank statement are taken to be the same. In actual life, this is not always the case. We write out cheque to our creditor today, he will deposit in his bank tomorrow. The cheque will be presented in our bank, by the bank of the creditor, on the day after tomorrow. We have recorded the transaction today but the payment in our statement will appear at least 2 days later. This period can even be greater.

Similarly, we receive a cheque from our debtor today and record it in our books. The cheque will be deposited in bank tomorrow and it will take a few days to clear. Again, there will be a difference in date of our receipt and that of our bank.

## BANK RECONCILIATION STATEMENT

In the above example, it is assumed that a payment of Rs. 10,000 is made on 31 Jul , and it appears in the bank on Aug, 02. When figures will be traced from bank book to bank statement, this amount will remain un-ticked in the bank book in the month of July. No recording will be made in the books as they are already correct.

In circumstances like these, a statement is made called Bank Reconciliation Statement. This reconciles those differences in Bank Book and Bank Statement that cannot be adjusted by an accounting entry at that date on which balances are being reconciled.

The event discussed above, where a cheque is issued but it has not been presented in the account is called Un-presented Cheques. When this cheque is recorded, the bank book is credited with Rs. 10,000. Therefore, the balance as per Bank Book is Rs. $50,200(60,200-10,000)$, whereas, the bank is still showing a balance of Rs. 60,200.

So, if we want to reconcile these balances, we will remove the effect of this entry (not in actual books but in the statement only). So the Statement Would:

- Balance As Per Bank Book
Dr.
50,200
- Un-presented Cheques
Dr. $\quad 10,000$
- Balance as Per Bank Statement
Cr.
60,200

Note following things in this statement.

- We have started with the balance of Bank Book
- To reverse the effect of Cr. entry in bank book, we have written Dr. with the figure.
- Since both figures $(50,200$ and 10,000$)$ are Dr. therefore, they are added.
- We also know that balances in bank book and bank statement are exactly opposite to each other, therefore, Cr. has been written with the resulting figure $(60,200)$

## UN-CREDITED CHEQUES

The other event discussed was of a receipt of a cheque that has not been cleared in the bank account as yet. To record a receipt, bank book should have been debited. Therefore, to reverse the effect Credit will be written with the figure in the statement.

Assume, the above Rs. 10,000 was a receipt rather than a payment. Then, the balance in the bank book would be Rs. 70,200 ( $60,200+10,000$ ).

The bank reconciliation will be as follows:

- Balance As Per Bank Book

## Dr.

Cr. $\quad(10,000)$

- Balance As Per Bank Statement Cr.

70,200

60,200

## EXAMPLE \# 2

The Bank book of Usman Traders gives the following record for the month of December, 2002:

| Usman Traders |  |  | Bank Book (Bank Account Number) |  | Account Code -- |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Date 20-- | $\begin{aligned} & \mathrm{Vr} . \\ & \# \end{aligned}$ | Chq. <br> No. | Narration / Particulars | Ledger Code | Receipt Amount | Payment Amount | Balance $\mathrm{Dr} /(\mathrm{Cr})$ |
| Dec 01 |  |  | Opening Balance |  | 150,000 |  | 150,000 |
| Dec 07 |  |  | Received form Anwer |  | 10,000 |  | 160,000 |
| Dec 08 |  | 57000 | Paid to Tariq |  |  | 19,500 | 140,500 |
| Dec 15 |  | 57001 | Paid to Shabbir |  |  | 4,000 | 136,500 |
| Dec 22 |  |  | Received from Javed |  | 9,700 |  | 146,200 |
| Dec 28 |  | 57002 | Paid to Salim |  |  | 9,100 | 137,100 |
| Dec 31 |  |  | Received from Javed |  | 20,000 |  | 157,100 |
| Dec 31 |  |  | Received form Rashid |  | 17,800 |  | 174,900 |
| Dec 31 |  |  |  |  |  |  |  |

The Bank Statement of Usman Traders shows the following picture:

| ABC Bank | Bank Statement Account No. xxxxx |  |  |  |
| :--- | :--- | ---: | ---: | ---: |
| Date <br> 20-- | Narration / <br> Particulars | Withdrawals <br> Amount | Deposits <br> Amount | Balance |
| Dec 1 | Balance B/f |  |  | 150,000 |
| Dec 7 | deposits |  | 10,000 | 160,000 |
| Dec 11 | 57000 | 19,500 |  | 140,500 |
| Dec 20 | 57001 | 4,000 |  | 136,500 |
| Dec 22 | deposits |  | 9,700 | 146,200 |
| Dec 31 | Charges | 2,200 |  | 144,000 |

You are required to reconcile Bank book with Bank Statement and prepare Bank Reconciliation Statement.

## SOLUTION

While tracing figures from bank book to bank reconciliation statement, it is noticed that bank charges deducted by bank are not booked in bank book. So, bank charges will be booked through the following entry:

| Debit: | Bank charges | 2,200 |
| :--- | :--- | :--- |
| Credit: | Bank A/c | 2,200 |

The corrected bank book is hereunder:

| Usman Traders |  |  |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Date <br> $20--$ | Vr. <br> $\#$ | Chq. <br> No. | Narration / <br> Particulars | Ledger <br> Code | Receipt <br> Amount | Payment <br> Amount | Balance <br> Dr $/(C r)$ |  |
| Dec 01 |  |  | Opening Balance |  | 150,000 |  | 150,000 |  |
| Dec 07 |  |  | Received form Anwer |  | 10,000 |  | 160,000 |  |
| Dec 08 |  | 57000 | Paid to Tariq |  |  | 19,500 | 140,500 |  |
| Dec 15 |  | 57001 | Paid to Shabbir |  |  | 4,000 | 136,500 |  |
| Dec 22 |  |  | Received from Javed |  | 9,700 |  | 146,200 |  |
| Dec 28 |  | 57002 | Paid to Salim |  |  | 9,100 | 137,100 |  |
| Dec 31 |  |  | Received from Javed |  | 20,000 |  | 157,100 |  |
| Dec 31 |  |  | Received form Rashid |  | 17,800 |  | 174,900 |  |
| Dec 31 |  |  | Bank charges |  |  | 2,200 | 172,700 |  |

It was also noticed that a cheques of Rs. 9,100 given to Salim on December 28 was not paid by bank as yet. So, it is an un-presented cheque. Cheques received from Javed and Rashid worth of Rs. 20,000 and 17,800 respectively are not credited by bank till December 31,2002. These are un-credited cheques of Usman Traders.
Bank Reconciliation Statement of Usman Traders shows the following picture:

## Bank Reconciliation Statement

Usman Traders

Dr. 9,100
Un-credit cheques
$(20,000)$
$(17,800)$ Cr.
$(37,800)$

Balance as per bank statement $\quad$ Cr. $\quad 144,000$

## RECAP

In the last lecture we studied, what is Bank Statement and how does it differ from our Bank Book. We told you that money lying in our bank account is our asset. Therefore, it usually has a DEBIT BALANCE. Also, when we deposit cash in our Bank, we DEBIT the Bank Book / Bank Account. Whereas, for Bank, the money lying in our Bank Account is a liability that bank has to return to us. Therefore, in Bank Statement which is a ledger account for bank normally has a CREDIT BALANCE. When we deposit cash in our bank account the liability of the bank to pay us increases. Therefore, our account in Books of Bank is CREDITED. Bank Statement is, therefore, a MIRROR IMAGE of our bank book.

Then, we studied about the reasons that create differences between our bank book and bank statement. Such as:

- Bank Charges debited to our bank account by the bank without our knowledge.
- Profit credited to our bank account.
- Payments made on our behalf by the bank, through our standing instructions, that we did not record in our books.
- Money paid in our account by our customers, dealers, agents, etc. without our knowledge.
- Un-presented cheques.
- Un-cleared cheques.

The last two arise because we record payment or receipt in our books when we receive / issue a cheque. But the bank records the transaction in our account at the time of actual receipt or payment. These differences are included in the bank reconciliation statement. The first four items are either adjusted in the bank book or shown in the reconciliation statement, depending upon whether we have closed our books for the period or not. If we have closed our books of accounts, these differences will be presented in the bank reconciliation statement. If our books of accounts are not closed as yet, we will adjust our bank book and give effect of all these adjustments in the bank book.

The main idea behind bank reconciliation is that we adjust our bank book for the transactions, that remain untraced, either through a Voucher (charges, profit, standing instruction) or through a Reconciliation Statement (un-presented, un-credited cheques).

## EXAMPLE \# 1

From the following particulars, prepare Bank reconciliation statement of Mr. Naveed as on June 30, 2002.

- Balance as per bank book

Dr. 32,000

- Cheques deposited but not yet collected by bank 20,200
- Cheques issued but not yet paid by bank
- Dividend credited by bank on June 30, but the intimation was received later.
- Interest credited by bank 250
- Bank charges debited by bank

It is assumed that books of accounts are not closed as yet.

## SOLUTION

As books of accounts are not closed, we will find out the adjusted balance first:

| Add/Debit Interest credited by bank | Dr. | 250 |
| :--- | :--- | :--- |
| Less/Credit Bank charges | Cr. | $(50)$ |

| Adjusted balance as per bank book | Dr. | 34,200 |
| :--- | :--- | :--- |

These adjustments in the ledger account of bank will look like as follows:

| Mr. Naveed |  | Bank Book (Bank Account Number) |  |  |  | Account Code -- |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :---: |
| Date <br> 20-- | Vr. <br> $\#$ | Chq. <br> No. | Narration / <br> Particulars | Ledger <br> Code | Receipt <br> Amount | Payment <br> Amount | Balance <br> Dr $/(C r)$ |  |
| Jun30 |  |  | Balance B/f |  | 32,000 |  | 32,000 |  |
| Jun30 |  |  | Dividend received |  | 2,000 |  | 34,000 |  |
| Jun30 |  |  | Interest received |  | 250 |  | 34,250 |  |
| Jun30 |  |  | Bank charges |  |  | 50 | 34,200 |  |

## BANK RECONCILIATION STATEMENT

|  | Rs. |  |
| :--- | :--- | ---: |
| Balance as per bank book | Dr. | 34,200 |
| Add: Un-presented cheques | Dr. | 13,000 |
| Less: Un-credited cheques | (Cr. $)$ | $(20,200)$ |

| Balance as per bank statement | Cr. | 27,000 |
| :--- | :--- | :--- |

In this example, books of accounts are not closed, all other transactions except un-presented cheques and un-credited cheques, will be recorded in the bank book by passing journal entries and adjusted balance of bank book will be presented in the bank reconciliation statement.

To this point, we have considered a favourable balance i.e. Debit in bank book and Credit in bank statement. But there is a possibility that we may have an unfavourable balance. This can happen if we have taken a loan from our bank.We can also call it an overdraft i.e. we have drawn more money from our bank than we had deposited in it. The reconciliation procedure would be the same as before.

The solution of above example will show the following picture:

## SOLUTION

As books of accounts are not closed, we will find out the adjusted balance first:
Rs.
Balance as per bank book
Cr. $\quad(32,000)$
Add/Debit Dividend credited by bank
Dr.
Add/Debit Interest credited by bank
Dr.
250
Less/Credit Bank charges
Cr.
(50)
Adjusted balance as per bank book $\quad$ Dr. $\quad(34,200)$

These adjustments in the ledger account of bank will look like as follows:

| Mr. Naveed |  |  | Bank Book (Bank Account Number) |  | Account Code -- |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Date 20-- | $\begin{aligned} & \mathrm{Vr} . \\ & \# \\ & \# \end{aligned}$ | Chq. <br> No. | Narration / <br> Particulars | Ledger Code | Receipt Amount | Payment <br> Amount | Balance $\mathrm{Dr} /(\mathrm{Cr})$ |
| Jun30 |  |  | Balance B/f |  |  | 32,000 | $(32,000)$ |
| Jun30 |  |  | Dividend received |  | 2,000 |  | $(34,000)$ |
| Jun30 |  |  | Interest received |  | 250 |  | $(34,250)$ |
| Jun30 |  |  | Bank charges |  |  | 50 | $(34,200)$ |

## BANK RECONCILIATION STATEMENT

Balance as per bank book
Cr.

## Rs.

Add: Un-presented cheques
Dr.
$(34,200)$
13,000
(Cr.)
$(20,200)$

| Balance as per bank statement | Dr. | $(41,400)$ |
| :--- | :--- | :--- |

In this case the balance of bank statement is debit because this amount is receivable by bank; it is an asset of the bank. On the other hand, this balance is a credit balance in bank book, it is payable to bank by the business. So, it is a liability of the business. Balance of bank statement in the first case does not match with the balance calculated above. The reason being, the balance in the first solution was debit, i-e. balance was our asset and drawing more money from bank reduced our asset. On the other hand, balance in this case is credit, i-e. we have already drawn more than what we have deposited in the bank. So, it is our liability. This balance is shown with negative sign. So, when we add/debit any amount, it will reduce our liability and when we less/credit any amount from bank, it will enhance our liability. This difference in treatment will result in a different balance of bank statement.

## EXAMPLE \# 2

From the following data ascertain the balance as per bank statement of Rashid \& Co on March 31, 20--

- Balance as per bank book Rs. 79,000
- Cheques issued but not presented for payment Rs. 24,000.
- Cheques deposited but not cleared Rs. 35,000
- Interest on deposit was credited by bank but not debited in bank book Rs. 1,000.
- A customer paid into bank directly Rs. 13,000 but the same was not recorded in bank book.
- Other receipts in bank that were not recorded in bank book Rs. 20,000.

## SOLUTION

In such an example, where bank reconciliation statement is not required the answer will show only what is required i.e. the balance that should appear in Bank Statement. Whereas, the reconciliation statement is prepared in WORKING / Rough Work
Let's see the solution now:
Rashid \& Co.
Balance As per Bank Statement Rs. 80,000

## WORKING

| Balance as per Bank Book | 79,000 |
| :--- | ---: |
| 1 | Add Un presented cheques |
| 2 | Less Un credited cheques |
| 3 | Add Interest received |
| 4 | Add amount deposited by customer |
| 5 | Add other receipts in bank |
| Balance as per bank statement | 1,000 |

As this is a working, therefore, we have put all the items in the statement. If the question had required the adjusted bank book balance, then, we would have adjusted items 3,4 and 5 first and then prepared the reconciliation statement.

Similarly the question could have given us the balance as per bank statement and required us to calculate bank book balance.
Let's see how we will work out the balance of bank book:

Rashid \& Co.

| Balance as per Bank Statement | 102,000 |  |
| :--- | :--- | ---: |
| 1 | Less Un presented cheques | $(24,000)$ |
| 2 | Add Un credited cheques | 35,000 |
| 3 | Less Interest received | $(1,000)$ |
| 4 | Less amount deposited by customer | $(13,000)$ |
| 5 | Less other receipts in bank | $(20,000)$ |
| Balance as per bank book | 79,000 |  |

## RECTIFICATION OF ERROR

In the beginning of this lecture, we also said that one reason for a difference between balance of bank book and bank statement could be a mistake made by us in recording transactions. Such differences are removed by making an adjusting entry through Journal Voucher, which is also called rectification of error.
Any other error when rectified / corrected would also be termed as Rectification of Error.
For Example, assume that we received cash Rs. 50,000 from a debtor and instead of Debiting the Cash Book / Cash Account, we debited the Bank Book. Whereas, the credit was given to the correct account. Now we have overstated bank book by Rs. 50,000 and understated the cash book by the same amount. To correct this, we will have to reduce / credit bank and increase / debit cash by Rs. 50,000.
So the entry will be:

$$
\begin{array}{lll}
\text { Debit } & \text { Cash Account } & 50,000 \\
\text { Credit } & \text { Bank Account } & 50,000
\end{array}
$$

After posting this transaction, our bank book will be reconciled if all other items have been taken into account.
We can prepare a general procedure for rectification of errors.
Step $1 \quad$ Note down the correct entry

| Debit: | Cash |  | 50,000 |  |
| :--- | :--- | :--- | :--- | :--- |
| Credit: | Creditors |  | 50,000 |  |
| Note down the incorrect entry |  |  |  |  |
| Debit: | Bank |  | 50,000 |  |
| Credit: |  | Creditors |  | 50,000 |

Step 3 See that Credit effect is correct. In case of Debit, effect has been given to Bank, instead of cash. Therefore, we will give the due effect to Cash by debiting it and Remove the incorrect effect from bank by crediting it.
Debit: Cash Account
Credit: Bank Account 50,000

This is one type of error where entry has been posted in incorrect account but with the correct amount.
Other errors that may occur while recording are as follows:

- A transaction is completely omitted. For example, in our above examples, we had not recorded the bank charges or the payment made by our customers directly in our bank.
- This type of errors is simple to rectify. The entry that was required at the time of event is recorded when it comes to our knowledge.
- The entry is recorded in correct account but with incorrect amount. For example, Electricity bill of Rs. 1000 paid in cash is recorded as Rs. 100 in correct head. In this case, rectification will be done by following entry:

$$
\begin{array}{lcc}
\text { Debit } & \text { Electricity } & 900 \\
\text { Credit } & \text { Cash } &
\end{array}
$$

900
(This will increase the expense to Rs. 1000 and decrease the cash to the correct amount.)

- On the other hand, if the entry was recorded at 10,000 . Then a reversal entry will be posted to correct the effect.

| Debit: |  | 9 Cash | 9000 |  |
| :--- | :--- | :--- | :--- | :--- |
| Credit: |  |  | 9000 |  |

- Another type of error could be Wrong Head of Account with wrong amount. For example, Purchase of vehicle worth Rs. 500,000 through cheque is recorded as vehicle repair Rs. 50,000.
- The Correct Entry would have been:

| Debit: | Vehicle | Bank | 500,000 |
| :--- | :--- | :--- | :--- |
| Credit: | Bank |  | 500,000 |

- The wrong entry that we posted is:

Debit: Vehicle repair
50,000
Credit: Bank
50,000

- Rectification will be as follows:

Debit: Vehicle 500,000
$\begin{array}{lll}\text { Credit: } & \text { Bank } & \text { 450,000 } \\ \text { Credit: } & \text { Vehicle Repair } & 50,000\end{array}$
We can, therefore, use this method to rectify any mistake.

## RECORDING OF PROVISION FOR BAD DEBTS

- Debit: $\quad$ Provision for Bad Debts (P\&L)

Credit: Provision for Bad Debts
The debit account is charged against current years profit and the credit head is shown as a deduction from debtors in the balance sheet.

$(3,100) 58,900$

## CONTROL ACCOUNTS

We have studied about Purchases, Sales, Debtors and Creditors in our previous lectures. We have also studied that trial balance works as a check of mathematical accuracy of the book keeping. If the trial balance is not balanced, then it indicates an error in recording of transactions. To detect this error one has to go through all the transactions during the year to detect the error. Now, if the size of the business is small, it would be easier to detect the difference. But if the business is large, then it becomes difficult to detect the difference. To solve this problem, a system of checks is devised so that the ledger accounts are distributed in smaller groups and a trial is prepared for every group.

Usually with the growth of business, the number of suppliers (creditors) and customers (debtors) grow. So, if we open a separate ledger account for every creditor and debtor, then the general ledger and trial balance would become too voluminous to manage. Therefore, in order to simplify things, one ledger each is maintained for Debtors and Creditors. The Debtors Ledger is called Total Debtors Ledger or Sales Ledger Control Account (as Credit sales are recorded in this account). The Creditors Ledger is called Total Creditors Ledger or Purchase Ledger Control Account (as Credit purchases are recorded in this ledger). In General Ledger one account is kept for all the Debtors, called Debtors Control Account, and one for Creditors, called Creditors Control Account.

The principle on which control accounts are based is simple and is as follows:

- If the opening balance of an account is known, together with the total of deductions and additions entered in the account, the closing balance can be calculated.
- The same method is applied to the whole ledger, the total of opening balances together with the additions and deductions during the period should give the total of closing balances.
- Therefore, individual creditor's and debtor's accounts are opened in the total creditors' ledger and total debtors ledger and their summarized figures are posted in the respective Control Accounts in the General Ledger.

The principle described above can be illustrated as follows:
Take the example of Total Debtors Account:

- Total of Opening Balances Dr. Rs. 200,000
- Add. Total of Debit entries
- Less Total of Credit entries

Rs. $\quad \underline{650,000}$ 850,000
Rs. $\quad(300,000)$ 650,000

The balance of Debtors control account in the general ledger should be Rs. 650,000 . If this is not so, then there is an error in the procedure of recording, which should be traced out.

## INFORMATION FOR CONTROL ACCOUNTS - DEBTORS

In the above illustration, we used some information. Now we will study the sources from which the information is obtained.

| Type of <br> Information | Source of Information |
| :--- | :--- |
| Opening balance <br> of debtors | List of debtors balances drawn up to the end of previous period. |
| Credit Sales | A separate book is maintained to record individual transactions. <br> Totals are drawn from this book |
| Sales Return | A separate book is maintained to record individual transactions. <br> Totals are drawn from this book |
| Cheques/Cash <br> Received | List of receipts is extracted from cash and bank book. <br> Closing Balance <br> This is the balancing figure that can also be checked from the list of <br> individual balance of debtors. |

Consider the following data:

| Sales Journal |  |  |  |
| :--- | :--- | :--- | :--- |
| Date | Invoice \# | Name | Amount |
| Ian, 20-- |  | A | 10,000 |
| Ian, 20-- |  | B | 12,500 |
| Ian, 20-- |  | C | 15,000 |
|  |  | Total | 37,500 |

Total of sales journal will be recorded in the Debtors Control Account through the following entry:

| Debit: | Debtors Control Account | 37,500 |  |
| :--- | ---: | :---: | :---: |
| Credit: | Sales Account |  | 37,500 |

Note that cash sales are not included in this whole process. They are directly recorded in the general ledger.

## INFORMATION FOR CONTROL ACCOUNTS - CREDITORS

The information flow in case of creditors is similar to debtors, which is listed here:

| Opening balance of <br> debtors | List of creditors balances drawn up to the end of previous period. |
| :--- | :--- |
| Credit Purchases | A separate book is (purchase journal) is maintained to record <br> individual transaction. Totals are drawn from this book |
| Purchase Return | A separate book is (purchase return journal) is maintained to record <br> individual transaction. Totals are drawn from this book |
| Cheques/Cash Paid | List of payments is extracted from cash and bank book. Or a separate <br> column is maintained in cash and bank books for this purpose. |
| Closing Balance | This is the balancing figure that can also be checked from the list of <br> individual balance of debtors. |

Consider the following data:

| Purchase Journal |  |  |  |
| :--- | :--- | :--- | :--- |
| Date | Invoice \# | Name | Amount |
| Jan, 20-- |  | X | 5,500 |
| Jan, 20-- |  | Y | 9,000 |
| Jan, 20-- |  | Z | 8,500 |
|  |  | Total | 23,000 |

Total of purchase journal will be recorded in the Creditors Control Account through the following entry:
Debit:
Purchases Account
23,500
Credit: Creditors Control Account 23,500

Note that cash purchases are not included in this whole process. They are directly recorded in the general ledger.

EXAMPLE \# 1
Prepare a Creditors Control Account from the following data and work out the closing balance on April 30, of creditors.
Apr. 1
Opening Balance
44,500

Totals for May:

| Total Credit Purchases | 32,000 |  |
| :--- | ---: | ---: |
| Purchase Return | 6,200 |  |
| Cheques and Cash paid | 28,800 |  |
| Discounts received |  | 2,500 |

## SOLUTION

\begin{tabular}{|l|l|l|l|l|l|l|l|}
\hline \multicolumn{8}{|c|}{ Creditors Control Account } <br>

\hline Date \& No. \& Narration \& Dr. Rs. \& Date \& No. \& Narration \& Cr. Rs. <br>
\hline April 30 \& \& Purchase return \& 6,200 \& April 01 \& \& Balance B/F \& 44,500 <br>
\hline April 30 \& \& Payments \& 28,800 \& April 30 \& \& Total Purchases \& `32,000 <br>

\hline April 30 \& \& | Discounts |
| :--- |
| received | \& 2,500 \& \& \& \& <br>

\hline \& \& \& \& \& \& \& <br>
\hline \& \& Balance C/F \& 39,000 \& \& \& \& <br>
\hline \& \& Total \& $\mathbf{7 6 , 5 0 0}$ \& \& \& Total \& $\mathbf{7 6 , 5 0 0}$ <br>
\hline
\end{tabular}

EXAMPLE \# 2
Prepare a Debtors control Account from the following data and work out the closing balance on May 31, of debtors.

| May 1 Opening Balance | 70,000 |  |
| :--- | ---: | ---: |
| Totals for May |  |  |
| Total Credit Sales (Sales Journal) | 26,000 |  |
| Returns Inward (Sales Inward Journal) | 3,400 |  |
| Cheques and Cash received |  | 46,000 |
| Discounts allowed | 3,700 |  |

## SOLUTION

| Debtors Control Account |  |  |  |  |  | Account Code -- |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :---: |
| Debit Side | Credit Side |  |  |  |  |  |  |  |  |
| Date | No. | Narration | Dr. Rs. | Date | No. | Narration | Cr. Rs. |  |  |
| May1 |  | Bal B/F | 70,000 | May31 |  | Returns | 3,400 |  |  |
| May31 |  | Total sales | 26,000 | May31 |  | Receipts | 46,000 |  |  |
|  |  |  |  | May31 |  | Discounts | 3,700 |  |  |
|  |  |  |  |  |  |  |  |  |  |
|  |  |  | $\mathbf{9 6 , 0 0 0}$ |  |  | Total | $\mathbf{9 6 , 0 0 0}$ |  |  |

## Lesson-26

## SUBSIDIARY BOOKS

A number of books are opened in connection with control accounts to reduce the volume of general ledger. These books are called 'Subsidiary Books'.

It is important to note that only credit sales/purchases become part of control accounts. Cash sales/purchases are not included in the control accounts.

## SUBSIDIARY BOOKS FOR SALES/DEBTORS

Three subsidiary books are maintained in case of sales / debtors.

- Sales Journal / Sales Day Book - individual invoice wise sales are recorded in this Journal. This book serves as source for all the recording of Credit sales.
- Sales Return / Return Inward Journal if volume of returns is also high then, these are also recorded in a separate register.
- Debtors Ledger - this ledger maintains record of individual debtor.

The information flows to the debtors control account in the general ledger as follows:

| Opening balance of <br> debtors | List of debtors balances drawn up to the end of previous period. <br> This also confirms with the aggregate balance of the debtors ledger. |
| :--- | :--- |
| Credit Sales | Individual credit sale is recorded in the sales journal. Periodical total <br> of this journal is posted into the debtors control account. |
| Sales Return | In case, the transaction volume of sales return is high, then these are <br> recorded in the sales return journal. The total is posted in the <br> debtors control account periodically. |
| Cheques / Cash <br> Received | List of receipts is extracted from cash and bank book. Or a separate <br> column is maintained in cash and bank books for this purpose. |
| Closing Balance | This is the balancing figure. It can also be checked with the total of <br> balances in debtors' ledger. |

EXAMPLE \# 1
Let's suppose that the sales journal provides the following record for the month of March, 2002:

| Sales Journal |  |  |  |
| :---: | :---: | :---: | :---: |
| Date | Invoice \# | Name / Debtor | Amount |
| Mar 01, 2002 | 01 | A | 10,000 |
| Mar 15, 2002 | 02 | B | 15,000 |
| Mar 31, 2002 | 03 | C | 20,000 |
|  |  | Total | 45,000 |

The above mentioned record will be posted in the personal ledger accounts of $A, B \& C$ (Debtors ledger account) in the following manner:

| A's Account |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Date | Particulars | Code <br> $\#$ | Amount <br> Rs. (Dr.) | Date | Particulars | Code <br> $\#$ | Amount <br> Rs. (Cr.) |  |
| $01 / 03$ |  |  | 10,000 |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |

| B's Account |  |  |  |  |  |  |  |  | Account code---- |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Date | Particulars | Code <br> $\#$ | Amount <br> Rs. (Dr.) | Date | Particulars | Code <br> $\#$ | Amount <br> Rs. (Cr.) |  |  |  |  |  |  |
| $15 / 03$ |  |  | 15,000 |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |

| C's Account |  |  |  |  |  |  |  |  |
| :--- | :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Date | Particulars | Code <br> $\#$ | Amount <br> Rs. (Dr.) | Date | Particulars | Code <br> $\#$ | Amount <br> Rs. (Cr.) |  |
| $31 / 03$ |  |  | 20,000 |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |

In the general ledger, the amount of total sales will be booked in the following manner:

| Debtors Control Account |  |  |  |  |  |  |  |  | Account code---- |
| :---: | :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Date | Particulars | Code <br> $\#$ | Amount <br> Rs. (Dr.) | Date | Particulars | Code <br> $\#$ | Amount <br> Rs. (Cr.) |  |  |
| $31 / 03$ | Total sales for <br> the month of <br> march, 2002 |  | 45,000 |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |

Now if we total the balance of three accounts of the debtors' ledger on Mar 31, 2002:

| A | 10,000 |
| :--- | ---: |
| B | 15,000 |
| C | 20,000 |
| Total | 45,000 |

It will be the same as the balance in the debtors control account of the general ledger.

## RECORDING OF SALES RETURN

Let's say that sales return journal for the month of March, 2002 give the following record:

| Sales Journal |  |  |  |
| :--- | ---: | :--- | ---: |
| Date |  | Name / Debtor | Amount |
| Jan 15, 20-- |  | A | 1,000 |
| Jan 20, 20-- |  | B | 2,000 |
| Jan 25, 20-- |  | C | 3,000 |
|  | Total | 6,000 |  |

The above mentioned record will be posted in the personal ledger accounts of $\mathrm{A}, \mathrm{B} \& \mathrm{C}$ (Debtors ledger account) in the following manner:
A's Account Account code----

| Date | Particulars | Code <br> $\#$ | Amount <br> Rs. (Dr.) | Date | Particulars | Code <br> $\#$ | Amount <br> Rs. (Cr.) |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $01 / 03$ |  |  | 10,000 | $15 / 03$ |  |  | 1,000 |
|  |  |  |  |  |  |  |  |

| B's Account |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Date | Particulars | Code <br> $\#$ | Amount <br> Rs. (Dr.) | Date | Particulars | Code <br> $\#$ | Amount <br> Rs. (Cr.) |  |
| $15 / 03$ |  |  | 15,000 | $20 / 03$ |  |  | 2,000 |  |
|  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  | 13,000 |  |
|  |  |  |  |  |  |  |  |  |

| C's Account |  |  |  |  |  |  |  |  | Account code---- |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Date | Particulars | Code <br> $\#$ | Amount <br> Rs. (Dr.) | Date | Particulars | Code <br> $\#$ | Amount <br> Rs. (Cr.) |  |  |
| $31 / 03$ |  |  | 20,000 | $25 / 03$ |  |  | 3,000 |  |  |
|  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  | 17,000 |  |  |
|  |  |  |  | 20,000 |  | Total |  |  |  |
|  |  |  |  |  |  |  |  |  |  |

In the general ledger, the amount of total sales return will be booked in the following manner:

| Sales Account |  |  |  |  | Account code---- |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Date | Particulars | Code \# | Amount Rs. (Dr.) | Date | Particulars | Code \# | Amount Rs. (Cr.) |
|  | Total sales return for the month of march, 2002 <br> Balance b/d |  | $6,000$ 39,000 | 31/03 | Total sales for the month of march, 2002 |  | 45,000 |
|  | Total |  | 45,000 |  | Total |  | 45,000 |

| Debtors Control Account Account code- |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Date | Particulars | Code \# | Amount Rs. (Dr.) | Date | Particulars | Code \# | Amount Rs. (Cr.) |
| 31/03 | Total sales for the month of march, 2002 |  | 45,000 |  | Total sales return for the month of march, 2002 <br> Balance b/d |  | 6,000 |
|  | Total |  | 45,000 |  | Total |  | 45,000 |

Again if we total the balance of three accounts of the debtors ledger on Mar 31,2002:

| A | 9,000 |
| :--- | ---: |
| B | 13,000 |
| C | 17,000 |
|  | 39,000 |

It will be the same as the balance in the debtors control account of the general ledger.

## RECEIPTS FROM DEBTORS

Here, we need a total figure of receipts from debtors. Therefore, when control accounts are used, we maintain cash and bank books with separate pages for receipts and payments i.e. two column cash/bank books are not used. On the receipts side of the cash and bank book, a column is added in which receipts from debtors are separately noted. This type of cash / bank book is also called multi column cash / bank book.

A sample of the receipt side of cash / bank book is given hereunder:

| Cash / Bank Book |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Receipt Side |  |  |  |  |  |
| Date | No | Narration / Particulars | Ledger Code | Receipt Amount | Receipt from Debtors |
|  |  |  |  | 10,000 |  |
|  |  |  |  | 500 |  |
|  |  | Received from A |  | 5,000 | 5,000 |
|  |  |  |  | 300 |  |
|  |  | Received from B |  | 2,500 | 2,500 |
|  |  | Received from A |  | 1,000 | 1,000 |
|  |  | Received from C |  | 1,500 | 1,500 |
|  |  |  |  | 950 |  |
|  |  |  |  | 1,000 |  |
|  |  | Total |  | 22,750 | 9,000 |

## SUBSIDIARY BOOKS FOR PURCHASES/CREDITORS

Recording of creditors is similar to debtors. The subsidiary books maintained in case of purchases / creditors are:

- Purchase Journal / Purchase Day Book - individual purchases are recorded in this Journal.
- Purchase Return / Return outward Journal - If the volume of returns is also high, then these are also recorded in a separate register.
- Creditors Ledger - this ledger maintains record of individual creditors.

The information flows to the creditor control account in the general ledger as follows:

| Opening balance of <br> creditors | List of creditor balances drawn up to the end of previous period. <br> This also confirms with the aggregate balance of the creditors ledger. |
| :--- | :--- |
| Credit Purchases | Individual credit purchase is recorded in the purchase journal. Total <br> of this journal is posted into the creditors control account <br> periodically. |
| Purchase Return | In case the transaction volume of purchase return is high, then, <br> these are recorded in the purchase return journal. Periodically, the <br> total is posted in the creditors control a/c. |
| Cheques / Cash Paid | List of payments is extracted from cash and bank book. Or a <br> separate column is maintained in cash and bank books for this <br> purpose. |
| Closing Balance | This is the balancing figure. It can also be checked with the total of <br> balances in creditors' ledger. |

## EXAMPLE \# 2

Let's consider the following data for the month of March, 2002:

| Purchase Journal |  |  |  |
| :---: | :---: | :---: | ---: |
| Date |  | Name / Debtor | Amount |
| Mar 01, 2002 |  | X | 5,000 |
| Mar 10, 2002 |  | Y | 10,000 |
| Mar 25, 2002 |  | Z | 15,000 |
|  |  | Total | 30,000 |

The above mentioned record will be posted in the personal ledger accounts of X, Y \& Z (Creditors ledger account) in the following manner:

| X's Account |  |  |  |  |  |  |  |  | Account code---- |
| :---: | :--- | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Date | Particulars | Code <br> $\#$ | Amount <br> Rs. (Dr.) | Date | Particulars | Code <br> $\#$ | Amount <br> Rs. (Cr.) |  |  |
|  |  |  |  | $01 / 03$ |  |  | 5,000 |  |  |
|  |  |  |  |  |  |  |  |  |  |

| Y's Account Account code--- |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Date | Particulars | Code <br> $\#$ | Amount <br> Rs. (Dr.) | Date | Particulars | Code <br> $\#$ | Amount <br> Rs. (Cr.) |
|  |  |  |  | $10 / 03$ |  |  | 10,000 |
|  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |
|  | Balance b/d |  | 10,000 |  |  |  |  |
|  |  |  |  |  |  |  |  |

| Z's Account |  | Account code---- |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Date | Particulars | Code <br> $\#$ | Amount <br> Rs. (Dr.) | Date | Particulars | Code <br> $\#$ | Amount <br> Rs. (Cr.) |
|  |  |  |  | $25 / 03$ |  |  | 15,000 |
|  | Balance b/d |  | 15,000 |  |  |  |  |
|  |  |  |  |  |  |  |  |
|  | Total |  | 15,000 |  | Total |  |  |

In the general ledger, the amount of total purchases will be booked in the following manner:

| Purchases Account |  |  |  |  |  |  |  |  | Account code---- |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Date | Particulars | Code <br> $\#$ | Amount <br> Rs. (Dr.) | Date | Particulars | Code <br> $\#$ | Amount <br> Rs. (Cr.) |  |  |  |  |  |  |  |  |
| $31 / 03$ | Total purchases <br> for the month <br> of march, 2002 |  | 30,000 |  |  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
|  | Total |  | 30,000 |  | Total | 30,000 |  |  |  |  |  |  |  |  |  |

| Creditors Control Account Account code---- |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Date | Particulars | Code \# | Amount <br> Rs. (Dr.) | Date | Particulars | Code \# | Amount <br> Rs. (Cr.) |
| 31/03 | Balance b/d |  | 30,000 |  | Total purchases for the month of march, 2002 |  | 30,000 |
|  | Total |  | 30,000 |  | Total |  | 30,000 |

Now, if we total the balance of three accounts of the creditor's ledger on Mar 31, 2002:

| X | 5,000 |
| :--- | ---: |
| Y | 10,000 |
| Z | 15,000 |
| Total | 30,000 |

It will be the same as the balance in the creditors control account of the general ledger.

## RECORDING OF PURCHASE RETURN

Let's say that the purchase return journal show the following picture for the month of March, 2002:

| Purchase Return Journal |  |  |  |
| :---: | :---: | :---: | ---: |
| Date |  | Name / Debtor | Amount |
| Mar 01, 2002 |  | X | 500 |
| Mar 10, 2002 |  | Y | 1,000 |
| Mar 25,2002 |  | Z | 1,500 |
|  |  | Total | 3,000 |

The above mentioned record will be posted in the personal ledger accounts of $\mathrm{X}, \mathrm{Y} \& \mathrm{Z}$ (Creditors ledger account) in the following manner:

| X's Account |  | Account code---- |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Date | Particulars | Code <br> $\#$ | Amount <br> Rs. (Dr.) | Date | Particulars | Code <br> $\#$ | Amount <br> Rs. (Cr.) |
| $01 / 03$ |  |  | 500 | $01 / 03$ |  |  | 5,000 |
|  |  |  |  |  |  |  |  |

| Y's Account |  | Account code---- |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Date | Particulars | Code <br> $\#$ | Amount <br> Rs. (Dr.) | Date | Particulars | Code <br> $\#$ | Amount <br> Rs. (Cr.) |  |
| $10 / 03$ |  |  | 1,000 | $10 / 03$ |  |  | 10,000 |  |
|  |  |  |  |  |  |  |  |  |
|  | Balance b/d |  | 9,000 |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |

| Z's Account |  | Account code---- |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Date | Particulars | Code <br> $\#$ | Amount <br> Rs. (Dr.) | Date | Particulars | Code <br> $\#$ | Amount <br> Rs. (Cr.) |
| $25 / 03$ |  |  | 1,500 | $25 / 03$ |  |  | 15,000 |
|  | Balance b/d |  | 13,500 |  |  |  |  |
|  |  |  |  |  |  |  |  |
|  | Total |  | 15,000 |  | Total |  |  |

In the general ledger, the amount of total purchases will be booked in the following manner:

| Purchases Account |  |  |  |  |  |  |  |
| :---: | :--- | :---: | :---: | :---: | :---: | :---: | :---: |
| Date | Particulars | Code <br> $\#$ | Amount <br> Rs. (Dr.) | Date | Particulars | Code <br> $\#$ | Amount <br> Rs. (Cr.) |
| $31 / 03$ | Total purchases <br> for the month <br> of march, 2002 |  | 30,000 | $31 / 03$ | Total purchases <br> return for the <br> month of march, <br> 2002 <br> Balance b/d |  | 3,000 |
|  |  |  |  |  |  |  |  |
|  | Total |  | 30,000 |  | Total | 27,000 |  |

| Creditors Control Account |  |  |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :---: | :---: |
| Date | Particulars | Code <br> $\#$ | Amount <br> Rs. (Dr.) | Date | Particulars | Code <br> $\#$ | Amount <br> Rs. (Cr.) |  |
| $31 / 03$ | Total purchases <br> return for the <br> month of <br> march, 2002 <br> Balance b/d |  | 3,000 | $31 / 03$ | Total purchases for <br> the month of <br> march, 2002 |  | 30,000 |  |
|  |  | 27,000 |  |  |  |  |  |  |
|  | Total |  | 30,000 |  | Total |  |  |  |

Now, if we total the balance of three accounts of the creditor's ledger on Mar 31, 2002:

| X | 4,500 |
| :--- | ---: |
| Y | 9,000 |
| Z | 13,500 |
| Total | 27,000 |

It will be the same as the balance in the creditors control account of the general ledger.

## PAYMENT TO CREDITORS

Here, we need a total figure of payment to creditors. Therefore, when control accounts are used, we maintain cash and bank books with separate pages for receipts and payments i.e. two column cash/bank books are not used. On the payment side of the cash and bank book, a column is added in which payments to creditors are separately noted. This type of cash / bank book is also called multi column cash / bank book.

A sample of the payment side of cash / bank book is given hereunder:

| Cash / Bank Book |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Payment Side |  |  |  |  |  |
| Date | No | Narration / <br> Particulars | Ledger <br> Code | Payment <br> Amount | Payment to <br> Creditors |

|  |  | Received from B |  | 1,500 | 1,500 |
|  |  |  |  | 1,000 |  |
|  |  | Received from C |  | 1,500 | 1,500 |
|  |  |  |  | 1,950 |  |
|  |  |  |  | 1,500 |  |
|  |  | Total |  | 18,450 | 5,500 |

## A PERSON IS BOTH DEBTOR AND CREDITOR

This happens so many times in business that a person is both your debtor and creditor. This means that you are purchasing one thing from him. So, you have to pay him against that purchase and at the same time you are selling him another thing for which he has to pay you. For example, you purchase item X from Mr . A for Rs. 50,000 and sell him item Y for Rs. 25,000 . Now, one way of settling the payable and receivable is that you can pay Mr. X 50,000 and ask him to pay you Rs. 25,000 . The other and may be the wiser method is that you pay him Rs. 25,000 and both transactions are settled. This is how such transactions are handled in real life.

## JOURNAL ENTRIES

- Normally where no control accounts are maintained, following entries will be recorded:

$$
\begin{array}{lccc}
\text { Debit: A (payable/creditor) account } & 25,000 \\
\text { Credit: } & \text { A (receivable/debtor) account } & & 25,000
\end{array}
$$

o This will bring down the balance of A (receivable/debtor) account to 0 and that of A (payable/creditor) account to 25,000 . The other entry will be:

$$
\begin{array}{lcc}
\text { Debit: A (payable/creditor) account } & 25,000 \\
\text { Credit: } & \text { Cash / Bank } & 25,000
\end{array}
$$

o This will settle the payable account fully.

- Where control accounts are being maintained the above two entries are still recorded but with slight modification:

$$
\begin{array}{lcl}
\text { Debit: } & \text { Creditors Control account } & 25,000 \\
\text { Credit: } & \text { Debtors Control account } & 25,000
\end{array}
$$

- At the same time A's account in Creditor's ledger is debited with 25,000 and Credited in Debtors' ledger with the same amount.

$$
\begin{array}{lcc}
\text { Debit: A (payable/creditor) account } & 25,000 \\
\text { Credit: } & \text { Cash / Bank } & 25,000
\end{array}
$$

- This entry comes from the creditor's column of cash / bank book payment side as usual.

## BAD DEBTS

Provision does not affect debtors account in simple books. It will, therefore, have no effect either on debtor control account or debtors ledger.

At the time of actual bad debt, the journal entry

$$
\begin{array}{lc}
\text { Debit } & \text { Provision / Bad Debts } \\
\text { Credit } & \text { Individual Debtors Account }
\end{array}
$$

If control account system is in operation, the debit entry will be same but the credit effect will go to Debtors control account with a credit effect to Individual Debtors Account in Debtors Ledger.

Similar treatment is given to discounts received and allowed.

## RECORDING OF BAD DEBTS IN CONTROL ACCOUNTS

To record bad debts in control accounts, following entries are recorded:

- In case no provision was created for doubtful debts:
$\begin{array}{lc}\text { Debit: } & \text { Bad Debts } \\ \text { Credit: } & \text { Debtors Control Account }\end{array}$
- In case provision was created for doubtful debts:

Debit: Provision for Doubtful Debts
Credit: Debtors Control Account

Recording is also made in the respective accounts of the debtor in subsidiary ledger.

## RECORDING OF DISCOUNTS RECEIVED IN CONTROL ACCOUNTS

To record discount received in control accounts, following entry is recorded:
Debit: Creditors Control Account
Credit: Discount Received Account

Recording is also made in respective accounts of the creditors in subsidiary ledger.

## RECORDING OF DISCOUNTS ALLOWED IN CONTROL ACCOUNTS

To record discount allowed in control accounts, following entry is recorded:

| Debit: | Discount Allowed Account |
| :--- | ---: |
| Credit: | Debtors Control Account |

Recording is also made in the respective account of the debtors in subsidiary ledger.

## ILLUSTRATION \# 1

Following information is given from the books of Mr. A(Debtor) for the month of June, 2002. You are required to prepare Debtors Control Account and work out the closing balance of debtors control account of Mr. A.

| Opening Balance Dr. | 85,500 |
| :--- | :---: |
| Transactions during the month: | 90,000 |
| Sales for the month | 2,500 |
| Sales return for the month | 140,000 |
| Payments received | 5,000 |
| Discount allowed | 4,000 |

## SOLUTION

| Debtors Control Account |  |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | ---: |
| Debit Side |  |  |  | Credit Side |  |  |  |
| Date | No. | Narration | Dr. Rs. | Date | No. | Narration | Cr. Rs. |
| Jun 01 |  | Bal B/F | 150,000 | Jun |  | Receipts(N2) | 170,000 |
| Jun |  | Sales(N1) | 260,000 | Jun |  | Discount allowed | 15,000 |
|  |  |  |  |  |  | Bad Debts | 25,000 |
|  |  |  |  |  |  |  |  |
|  |  |  |  | Jun 31 |  | Bal C/F | 200,000 |
|  |  | Total | 410,000 |  |  | Total | 410,000 |

| Creditors Control Account |  |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Debit Side |  |  |  | Credit Side |  |  |  |
| Date | No. | Narration | Dr. Rs. | Date | No. | Narration | Cr. Rs. |
| Jun |  | Payments | 130,000 | Jun 01 |  | Bal B/F | 250,000 |
| Jun |  | Discounts <br> received | 10,000 | Jun |  | Total purchases | 200,000 |
|  |  |  |  |  |  |  |  |
| Jun 31 |  | Bal C/F | 310,000 |  |  |  |  |
|  |  | Total | $\mathbf{4 5 0 , 0 0 0}$ |  |  | Total | 450,000 |

Notes to the accounts

1. In control accounts, only cash sales/purchases are dealt with. Credit sales/purchases are not included in control accounts,
2. Receipts/Payments include both cash and credit receipts/payments. So, we enter the figures in control accounts, after deducting cash sales/purchases from total receipts/payments. i. e.

$$
\begin{aligned}
& \text { Receipts }=350,000-180,000=170,000 \\
& \text { Payments }=250,000-120,000=130,000
\end{aligned}
$$

3. Provision for doubtful debts has no effect on control accounts. So, any change in provision will not affect actual bad debts.

## BENEFITS OF SUBSIDIARY LEDGERS

- Subsidiary ledgers contain the record of all individuals Debtors and Creditors.
- Subsidiary ledgers give information about the main clients and slow moving clients which is helpful for the management in decision making.
- If the business has distributors in different areas, subsidiary ledger gives information about sale of different distributors in different areas which are helpful for the management in decision making.

## RECTIFICATION OF ERROR

In financial accounting, every single event occurring in monetary terms is recorded. Sometimes, it just so happens that some events are either not recorded or it is recorded in the wrong head of account or wrong figure is recorded in the correct head of account.

Whatever the reason may be, there is always a chance of error in the books of accounts. These errors in accounting require rectification. The procedure adopted to rectify errors in financial accounting is called "Rectification of error".

## HOW TO RECTIFY THESE ERRORS

One way of rectification is that we can simply erase or overwrite the incorrect entry and replace it with the correct one. But this practice is not allowed in accounting. We have to Rectify / correct the mistake by recording another entry.

## TYPES OF ERRORS

Before going to the rectification process, let's first see the different kinds of errors that can appear in our books of accounts:

## ERROR OF OMISSION

One of the most common errors is that an event escapes recording. This means that an event occurred but we did not record it. For example, we discussed about bank charges being deducted by banks without our knowledge or our payments made by banks on our standing orders etc. There can be other reasons as well. Such errors are called ERRORS OF OMISSION.

## ERROR OF COMMISSION

Then, there is a chance that the event is classified and recorded correctly but within wrong classification of account. For example, a payment to Mr. A, who is a debtor, is recorded in the account of Mr. B, who is also a debtor. Now the classification is correct but entry is posted in the wrong account. Such errors are called ERRORS OF COMMISSION.

## ERROR OF PRINCIPLE

Then there are errors in which an entry is recorded in the wrong class of account. For example a purchase of fixed asset, say, a vehicle is recorded in an expense account. These errors are called ERRORS OF PRINCIPLE.

## ERROR OF ORIGINAL ENTRY

The errors in which recording is in correct account but the figure is incorrect are called ERRORS OF ORIGINAL ENTRY. For example, a receipt of Rs. 50,000 from a debtor is recorded as Rs. 5,000 in his account.

## REVERSAL OF ENTRY

Then, there are errors in which the entry is reversed by mistake. This means that the account that should have been debited is credited and vice versa. These errors are called REVERSAL OF ENTRY.

## RECTIFYING THE ERRORS

Now, we will rectify all these types of entries:

## ERROR OF OMISSION

This is the easiest error to rectify. You have to record the entry that was omitted by mistake. It is important to note here that the rectifying entry will be posted on the date on which the error was discovered. But we will give a note in the narration of the voucher that the event took place on such date.

## Example

A purchase of Rs. 5,000 from ABC on April 15, was omitted by mistake
Rectification Entry on the date of discovery:

| Debit: | Purchase Account | 15,000 |
| :--- | :---: | :---: |
| Credit: | ABC Account | 15,000 |

Narration: Rectification of omission of recording purchase to ABC on April 15.
ERRORS OF COMMISSION / ERROR OF PRINCIPLE

In both these cases, the effect given to incorrect account is reversed and effect is given to the correct account.

## Example

Purchase of an asset for Rs. 20,000 is recorded in the expense account.
Rectification:
Debit: Asset Account 50,000
Credit: Relevant Expense Account 50,000
Narration: Rectification of purchase of asset incorrectly recorded as expense.

## ERROR OF ORIGINAL ENTRY

If the entry recorded is of lesser amount than the required amount, then an entry of the balance amount is passed. On the other hand, if the entry recorded is of a greater amount than the required amount, a reverse entry is passed of the balance amount that cancels the effect of the error.

## Example

1) A receipt of cash Rs. 5,000 from B is recorded as Rs. 500
2) A receipt of cash Rs. 5,000 from B is recorded as Rs. 50,000

## Rectification

In the first instance, the recorded figure is less by Rs. 4,500. The rectification entry will, therefore, be:
Debit:
Cash Account
Credit:
B Account
4,500
4,500

In the second instance, the recorded figure exceeds by Rs. 45,000 from the desired figure. The rectification will, therefore, be a reverse entry of Rs. 45,000 :
Debit:
B Account
Credit: Cash Account
45,000
45,000

## REVERSAL OF ENTRY

If a reverse entry is recorded by mistake, then two entries are required to rectify it, one to reverse the effect of mistake and the other to record correct entry or we can pass one entry with double amount that serves the purpose of both the entries.

## Example

A payment of Rs. 10,000 made to Mr . D is recorded on the receipt side of the cash book and credit is given to D's account.

## Rectification

We can correct this mistake by two entries:
Debit:
Mr. D Account
Credit:
Cash Account
10,000
10,000

This will reverse the effect of mistake:
Debit: Mr. D Account 10,000
Credit: Cash Account
10,000
And this will record the transaction correctly:
Or
We can record it through one entry:
Debit: Mr. D Account 20,000
Credit: Cash Account 20,000
Based on our above discussion, we can devise a general procedure for rectification of errors.
Take another example, assume that we received cash Rs. of 50,000 from a debtor and instead of Debiting the Cash Book / Cash Account, we debited the Bank Book whereas the credit was given to the correct account.

Step 1: Note down the correct entry

| Debit | Cash |  | 50,000 |  |
| :--- | :--- | :--- | :--- | :--- |
| Credit |  | Creditors |  | 50,000 |

Step 2: Note down the incorrect entry

| Debit | Bank |  | 50,000 |  |
| :--- | :--- | :--- | :--- | :--- |
| Credit |  |  |  |  |

Step 3: See that Credit affect is correct. In case of Debit, affect has been given to Bank instead of cash. Therefore we will give the due affect to Cash by debiting it and Remove the incorrect affect from bank by crediting it.
Debit
Credit
Cash Account
Bank Account
50,000
50,000

## ILLUSTRATION

Rectify the following errors:

1. A cheque issued of Rs. 50,000 to Mr . A (Creditor), but the credit was given to cash account.
2. Purchase of goods from Mr. B worth of Rs. 5,500 was recorded at Rs. 4,500.
3. Cash sale to Mr. C worth of Rs. 10,000 was debited to sale account and credited to cash account.
4. Repair of vehicle worth of Rs. 5,000 was charged to asset account.
5. A cheque of Rs. 15,000 received and deposited in bank from Mr. D, but no entry was passed.

## SOLUTION

15,000
Mr. D's A/C
15,000

Incorrect Entry passed
No entry was passed
Rectifying Entry
$\begin{array}{lrll}\text { Debit: } & \text { Bank A/C } & 15,000 & \\ \text { Credit: } & \text { Mr. D's A/C } & 15,000\end{array}$

## STANDARD FORMAT OF PROFIT \& LOSS ACCOUNT

Standard format of profit \& loss account is shown as follows:

| Particulars | $\begin{array}{c}\text { Amount } \\ \text { Rs. }\end{array}$ | $\begin{array}{r}\text { Amount } \\ \text { Rs. }\end{array}$ |
| :--- | ---: | ---: |
| $\begin{array}{l}\text { Sales } \\ \text { Less: Cost of Goods Sold }\end{array}$ |  | X |
| $\begin{array}{l}\text { Gross Profit } \\ \text { Less: Administrative Expenses } \\ \text { Selling Expenses }\end{array}$ |  | X |
|  |  | X |$]$

## SALES

- Sales as we know are the revenue against the sale of the product in which the organization deals.
- In case of a service organization, there will be Income against Services Rendered instead of Sales and there will be no Cost of Sales or Gross Profit.

## COST OF GOODS SOLD/GROSS PROFIT

- Cost of goods sold is the cost incurred in purchasing or manufacturing the product, which an organization is selling plus any other expense incurred in bringing the product in salable condition. Cost of goods sold contain the following heads of accounts:
o Purchase of raw material/goods
o Wages paid to employees for manufacturing of goods
0 Any tax/freight is paid on purchases
0 Any expense incurred on carriage/transportation of purchased items.
- Gross Profit $=$ Sales - Cost of goods sold

## OTHER INCOME

- Other income includes revenue from indirect source of income, such as return on investment, profit on PLS account etc.

## ADMINISTRATIVE EXPENSES

- Administrative expenses are the expenses incurred in running a business effectively. Main components of this group are:
o Payment of utility bills
o Payment of rent
o Salaries of employees
o General office expenses
o Repair \& maintenance of office equipment \& vehicles.
- It is important to distribute expenses properly among the three classifications i.e. Cost of Goods Sold, Administrative Expenses and Selling Expenses to present the financial statements fairly. Take the example of following costs:
o Salaries and Wages
- Although both these terms mean remuneration paid to labour and employee against services.
- Wages usually denotes remuneration paid to daily wages labour. Whereas salary denotes payments to permanent employees.
- Salaries can be classified in any of the classifications mentioned below.
- Salaries / wages paid to labour and supervisors/officers working for the manufacturing of goods become a part of Cost of Goods Sold.
- Salaries and benefits of general administrative staff becomes part of Administrative Expenses
- Salaries and benefits of sales and marketing staff become part of selling expenses.
- Other expenses like Depreciation, Utilities and Maintenance can also be classified in all three, depending upon the exact nature of the expenditure.

## SELLING EXPENSES

- Selling expenses are the expenses incurred directly in connection with the sale of goods. This head contains:
o Transportation/carriage of goods sold
o Tax/freight paid on sale
- If the expense head 'salaries' includes salaries of sales staff. It will be excluded from salaries \& appear under the heading of 'selling expenses'.

## FINANCIAL EXPENSES

- Financial expenses are the interest paid on bank loan \& charges deducted by bank on entity's bank accounts. These are shown separately in the Profit and Loss Account. These includes:
o Interest on loan
o Bank charges
- There is, however, one exception and that is the interest paid on loan taken to build an asset is capitalized as cost of the asset up to the time that asset is completed.

## INCOME TAX

- Different types of entities have to pay income tax at different rates.
- At the time of preparing annual financial statements, an estimate of expected tax liability is made.
- A provision is then, created equal to that estimate.
- You should remember the treatment of Provision for Doubtful debts. Same is the case with income tax i.e. provision is made at the time of preparing accounts which is then adjusted accordingly at the time when actual tax expense is known.

## BALANCE SHEET (ASSET SIDE)

Standard format of the balance sheet is given as follows:

| Particulars | Amount Rs. | Amount Rs. |
| :--- | :--- | :--- |
| Assets |  |  |
| Non Current Assets |  |  |
| Fixed Assets |  |  |
| Capital Work In Progress |  | X |
| Deferred Costs |  | x |
| Long Term Investments |  |  |
|  |  |  |
| Current Assets |  |  |
| Stocks |  |  |
| Trade debtors and Other Receivables | X |  |
| Prepayments | X |  |
| Short Term Investments | X |  |
| Cash and Bank | X |  |
|  |  |  |
| Total |  |  |

## FIXED ASSETS

- Fixed assets are the assets of permanent nature that a business acquires, such as plant, machinery, building, furniture, vehicles etc.
- Fixed assets are presented at cost less accumulated depreciation OR revalued amount.

## CAPITAL WORK IN PROGRESS

- If an asset is not completed at that time when balance sheet is prepared, all costs incurred on that asset up to the balance sheet date are transferred to an account called Capital Work in Progress Account. This account is shown separately in the balance sheet below the fixed assets. Capital work in progress account contains all expenses incurred on the asset until it is converted into working condition. All these expenses will become part of the cost of that asset. When an asset is completed and it is ready to work, all costs will transfer to the relevant asset account.

## DEFERRED COSTS

- An expense that has a future benefit in excess of one year and recorded in a capital asset account

## LONG TERM AND SHORT TERM INVESTMENTS

- Where a business has surplus funds, it is better to invest those funds where these can generate a return greater than PLS accounts.
- These investments can be of different types e.g. shares of other companies, fixed deposits with banks, government securities, national savings etc.
- For presentation purposes, these investments are classified in two categories, long term and short term investments.
- Investments made with the intention that they will be held for a period longer than twelve months are classified as long term and those made for a period equal to or shorter than 12 months are classified as short term.

Following things are important to note here:

- Classification is to be made every time a balance sheet is prepared and the period is to be calculated from the date of balance sheet.
- This means that an investment made for 2 years on May 2000 will be classified as long term investment in accounts prepared on Jun 30, 2000 and the same investment will be classified as current investment in the accounts prepared on June 30, 2001.
- An investment may initially be made as current investment. Subsequently, if it is decided to hold it for a longer period, then its classification will have to be changed accordingly and vice versa.
- Therefore, investments are checked for classification every time a balance sheet is prepared and presented accordingly.

## CURRENT ASSETS

Current Assets are the receivables that are expected to be received within one year of the balance sheet date. Debtors, closing stock \& all accrued incomes are the examples of Current Assets because these are expected to be received within one accounting period from the balance sheet date.

It is important to note that assets and liabilities are presented in the balance sheet in the order of their maturity i.e. assets / liabilities having longer life are presented first and assets / liabilities having shorter life are presented later.

STANDARD FORMAT OF BALANCE SHEET

## (LIABILITY SIDE)

| Particulars | Amount Rs. | Amount Rs. |
| :--- | ---: | ---: |
| Liabilities |  |  |
| Capital and Reserves <br> Capital <br> Reserves <br> Profit and Loss Account | X |  |
| Non Current / Long Term Liabilities | X |  |
| Long term loans | X |  |
| Other long term liabilities | X |  |
| Current Liabilities | X |  |
| Trade creditors and other payables <br> Short term borrowings | X | X |
| Current portion of long term borrowings | X |  |
| Total | X | X |

## CAPITAL

Capital is the first item shown on the liability side of the balance sheet of an organization. Capital is the Money invested in the business by the owners. Capital is a liability for the business as the business has to pay return against this money and in case the business is closed, then it has to return the amount. Capital is also termed as "Share Capital".

## RECORDING OF CAPITAL

Recording of Capital is Simple

- At the time of receipt

| Debit | Cash / Bank |
| :--- | ---: |
| Credit | Capital |

- If the owner contributes an asset instead of cash, then

| Debit | Asset Account |
| :--- | ---: |
| Credit | Capital |

- When the capital is repaid (this does not happen in normal course of business, but just in case)

| Debit $\quad$ Capital |  |  |
| :--- | :--- | :--- |
| Credit |  |  |

## RESERVES

The portion of profit which is not paid to proprietor, but is kept apart for meeting some known or unknown losses is called Reserve, e.g. Reserve fund, contingencies reserve etc.

There are two major types of reserves:

- Revenue reserves
o From the view point of its creation revenue reserve may again be classified into:

## a. General reserve

Reserve which is not created for any specific purpose, but for strengthening the financial position of the business is known as General Reserve, e.g. Reserve fund, contingencies reserve etc.

## b. Specific Reserve

Reserve created for any special purpose is known as Specific Reserve. e.g., Dividend Equalization fund, Debenture sinking fund etc.

## Capital Reserves

Capital reserves, in most of the cases, are created due to legal requirements. Profit may arise from sources, other than normal business activity. For example, profit on sale of fixed assets or profit on revaluation of fixed assets. When a reserve is created out of these profits, it is termed as capital reserve. One capital reserve about which we already know is "Fixed Assets Revaluation Reserve". Capital reserves can be used for specific purposes only.

## DIFFERENCE BETWEEN RESERVE AND PROVISION

Both reserves and provisions are created out of revenues of the business, but they differ from each other.

- Creating a provision is necessary to show a true profit for the period, whereas the reserve is created on the discretion of the owner, out of profits.
- Provision is to be made, even, if there is a loss; Reserves are created out of profits only.
- Reserve is shown as liability in the balance sheet, Provision is shown as a reduction from the asset against which it is created.
- Provision is used specifically for the purpose for which it is made, Reserves are usually general and can be used for any purpose.

## PROFIT AND LOSS ACCOUNT

- Profit and Loss Account or Accumulated Profit and Loss Account shows the balance of undistributed profit accumulated over the periods.
- In the first year of business, this account shows following figure:

$$
\begin{array}{lc}
\text { Profits for the year } & \mathrm{X} \\
\text { Less: Transferred to Reserve } & (\mathrm{X}) \\
\text { Less: Profit distributed } & (\mathrm{X}) \\
\text { Balance carried to Balance Sheet } & \mathrm{X} \\
\hline
\end{array}
$$

- In Subsequent years, balance brought forward from previous years and profit for the year is added and distributed as above and the balance is carried to next year.
- This is why; it is termed as Accumulated Profit and Loss Account.

## LONG TERM LOANS

- The owners of the business may feel that their business can flourish, if there are more funds. These funds can be arranged from their own resources, if possible, or they can ask a bank or financial institution for funds. This loan, if extended by bank for a period of more than one year is termed as a long term loan. There can be other sources of long term loans as well, e.g. Term Finance Certificates and Debentures, where money is borrowed from general public under certain legal restrictions.

## OTHER LONG TERM LIABILITIES

These include all other liabilities that are payable after a period of one year of balance sheet date. For example, staff gratuity and other benefits, taxes and liabilities that become payable after a period of one year.

## CURRENT LIABILITIES

Current Liabilities are the obligations of the business that are payable within twelve months of the balance sheet date. Creditors, all accrued expenses are the examples of current liabilities of the business because business is expected to pay these back within one accounting period.

## CURRENT PORTION OF LONG TERM LIABILITIES

Long term loans are usually payable in installments. Therefore, at every year end, some portion of the loan becomes payable within one year of the balance sheet date. The portion that becomes payable within the next accounting period is transferred to current liabilities and classified under current portion of long term liabilities.

Format of current liabilities shown in the balance sheet is as follows:

## Current Liabilities

Trade Creditors<br>Short Term Borrowings<br>Other Short Term Liabilities<br>Salaries Payable<br>Accrued Expenses<br>Bills payable<br>Advances from Customers<br>Current Portion of Long Term Liabilities

## Lesson-31

## DIFFERENT BUSINESS ENTITIES

There are two types of entities:

- Commercial organizations
- Non-commercial organizations

## COMMERCIAL ORGANIZATION

Commercial organization is the entity that is working to earn profit. At the end of the financial year, the profit is distributed among the owners of the business. Normally, commercial organizations include:

- Sole proprietorship
- Partnership, and
- Limited Company

## NON COMMERCIAL ORGANIZATION

Non Commercial organization is the entity that is not working to earn profit. At the end of the financial year, the profit is not distributed among the owners, but is used for the objective of the organization. Normally, commercial organizations include:

- Co-operative institutions
- NGO's
- Trusts

## COMMERCIAL ORGANIZATION

## Sole proprietorship business

It is a business that is owned by an individual. He may have employed any number of persons to work for him, but he is the sole owner of the business.

## Partnership

Partnership is the type of business where more than one person (called partners) enters into a legal agreement to run a business on a profit and loss sharing basis.

## Limited Company

Limited company is a legal entity, separate from its owners (called shareholders). The basic difference between a partnership and a limited company is the concept of limited liability.

- If a partnership business runs into losses and is unable to pay its liabilities, its partners will have to pay the liabilities from their own wealth.
- Whereas, in case of limited company, the shareholders don't lose anything more than the amount of capital they have contributed in the company. i.e., their personal wealth is not at stake and their liability is limited to the amount of share capital they have contributed.
The concept of limited company is to mobilize the resources of a large number of people for a project, which they would not be able to afford independently and then, get it managed by experts.

## ACCOUNTING REQUIREMENTS

## Sole Proprietorship

In case of sole proprietor, he is the sole owner of the business. So, there is no restriction on him for drawing money for his personal use.

For accounting purposes, an account titled Proprietor's Drawings is opened in the General Ledger and all payments and receipts, if any, from the proprietor are recorded in this account.

## Accounting Entries

Cash Drawn by Proprietor

$$
\begin{array}{lc}
\text { Debit } & \text { Proprietor's drawing } \\
\text { Credit } & \text { Cash }
\end{array}
$$

Amount paid in by proprietor through cheque

| Debit Bank |  |  |
| :--- | :--- | :--- |
| Credit |  | Proprietor's drawing |

The balance in drawings account is transferred to Capital Account at the year end.

The sample of general ledger of Capital account, in case of profit earned by the business, is as follows:

| Capital Account |  |  |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :---: |
| Debit Side |  |  |  | Credit Side |  |  |  |  |
| Date | No | Narration | Dr. Rs. | Date | No | Narration | Cr. Rs. |  |
| Jun 30 |  | Drawings | 45,000 | Jul 01 |  | Balance B/F | 100,000 |  |
|  |  |  |  | Jun 30 |  | P \& L Account | 50,000 |  |
|  |  |  |  |  |  |  |  |  |
| Jun 30 |  | Balance C/F | 105,000 |  |  |  |  |  |
|  |  | Total | $\mathbf{1 5 0 , 0 0 0}$ |  |  | Total | $\mathbf{1 5 0 , 0 0 0}$ |  |

The sample of general ledger of Capital account, in case of loss sustained by the business, is as follows:

| Capital Account |  |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| Debit Side |  |  |  | Credit Side |  |  |  |
| Date | No | Narration | Dr. Rs. | Date | No | Narration | Cr. Rs. |
| Jun 30 |  | P \& L Account | 10,000 | Jul 01 |  | Balance B/F | 100,000 |
| Jun 30 |  | Drawings | 45,000 |  |  |  |  |
|  |  |  |  |  |  |  |  |
| Jun 30 |  | Balance C/F | 45,000 |  |  |  |  |
|  |  | Total | $\mathbf{1 0 0 , 0 0 0}$ |  |  | Total | $\mathbf{1 0 0 , 0 0 0}$ |

The balance sheet of sole proprietor is as follows:

| Name of Business |  |  |
| :---: | :---: | :---: |
| Balance Sheet As At ---- |  |  |
| Particulars | Amount Rs. | Amount Rs. |
| ASSETS <br> Fixed Assets <br> Long Term Assets <br> Current Assets |  | X X X |
| TOTAL |  | X |
| LIABILITIES <br> Capital <br> Add: Profit / Loss For The Year <br> Less: Drawings | $\begin{array}{r} \mathrm{X} \\ \mathrm{X} \\ (\mathrm{X}) \end{array}$ | X |
| Long Term Liabilities |  | X |
| Current Liabilities |  | X |
| TOTAL |  | X |

## PARTNERSHIP

There are two types of capital accounts in partnership:

- Fixed capital
- Fluctuating capital

## Fixed Capital

In this case, capital account shows movement in capital only i.e. actual increase or decrease in capital, by partners and all other transactions, such as Drawings and Profit etc. are not recorded in capital account. Fluctuating capital

In fluctuating capital account, all transactions relating to partners, such as drawings, salaries etc. are recorded in capital account, in addition to entries relating to capital account.

## Current Account

In case of fixed capital accounts, other transactions such as Drawings and Profit etc. are recorded in a separate account called Current Account.

## JOURNAL ENTRIES

- Capital Introduced by Partner

| Debit | Cash $/$ Bank |
| :--- | :---: |
| Credit | Partner's Capital Account |

Separate capital account is opened in general ledger for each partner.

- Drawing by Partner

| Debit | Individual Partner's Current Account |

| Long Term Assets |  |  | X |
| Current Assets |  |  | X |
| TOTAL |  |  | X |
| LIABILITIES |  |  |  |
| Capital | A | X |  |
|  | B | X |  |
|  | C | X | X |
| Current Account | A | X |  |
|  | B | X |  |
|  | C | X | X |
| Long Term Liabilities |  |  | X |
| Current Liabilities |  |  | X |
| TOTAL |  |  | X |

## LIMITED COMPANIES

There are two types of companies:

- Public Limited Companies
- Private Limited Companies

## Public Limited Companies

In public limited companies, there is no restriction on number of persons to be its members. There is one restriction. i.e., there should be a minimum of three members to form a public limited company.

## Private Limited Companies

Two to fifty persons can form a private limited company. Minimum two members are elected to form a board of directors. This board is given the responsibility to run day to day business of the company.

## SHARE CAPITAL

Capital of the company is divided into small units / denominations. These units / denominations are called shares and the capital is called share capital. Owners purchase these shares and are, therefore, called shareholders. As, there are so many shareholders in a company, profit is distributed among the members/shareholders of the company on the basis of number of shares held by each shareholder. The profit distributed among shareholders is called DIVIDEND.

## SOLE PROPRIETORSHIP

## ILLUSTRATION \# 1

Prepare profit \& loss account and balance sheet for the year ending June 30, 2002 from the following trial balance of Naseem Trading Company.

| Particulars | Debit <br> Rs. | Credit <br> Rs. |
| :--- | ---: | ---: |
| Opening Stock | 115,200 |  |
| Cash in hand | 10,800 |  |
| Cash at bank | 52,600 |  |
| Purchases | 813,500 |  |
| Returns inward (Sales return) | 13,600 |  |
| Wages | 169,600 |  |
| Fuel \& power | 94,600 |  |
| Carriage on sales | 64,000 |  |
| Carriage on purchases | 40,800 |  |
| Building | 640,000 |  |
| Land | 200,000 |  |
| Machinery | 400,000 |  |
| Salaries | 300,000 |  |
| General expenses | 60,000 |  |
| Drawings | 12,000 |  |
| Insurance | 104,900 |  |
| Sundry Debtors | 290,000 |  |
| Sales |  | $1,975,600$ |
| Returns outwards (Purchase returns) |  | 10,000 |
| Capital |  | $1,090,000$ |
| Sundry Creditors |  | 126,000 |
| Rent received | $\mathbf{3 , 3 8 1 , 6 0 0}$ | $\mathbf{3 , 3 8 1 , 6 0 0}$ |
| Total |  |  |

Following additional information is supplied to you:

- Closing stock is valued at Rs. 136,000
- Machinery \& Building are to be depreciated @ 10\%
- Salaries for the month of June, 2002 amounting to Rs. 30,000 are unpaid
- Insurance is paid in advance to the extent of Rs. 13,000
- Rent receivable is Rs. 20,000

## SOLUTION

When additional information is given at the end of the question, which means these entries are still to be recorded in the books of accounts. So, we shall pass the entries first:

ENTRY \# 1

| Particulars | Code \# | Amount(Dr.) <br> Rs. | Amount(Cr.) <br> Rs. |
| :---: | :---: | :---: | :---: |
| Closing stock account |  | 136,000 |  |
| Profit \& Loss account |  |  | 136,000 |
| Closing stock is recorded |  |  |  |

Closing stock is presented in the profit \& loss account, credited in the cost of goods sold and is shown in the balance sheet under the heading of Current Assets.

The ledger account of closing stock will be as follows:

| Stock Account |  |  | Account Code -------- |  |  |
| :--- | ---: | :--- | :--- | :---: | :---: |
| Particulars | Amount <br> Dr. (Rs.) | Particulars | Amount <br> Cr. (Rs.) |  |  |
| Closing Stock | 136,000 |  |  |  |  |
|  |  | Balance b/d | 136,000 |  |  |
| Total | 136,000 | Total | 136,000 |  |  |

ENTRY \# 2

| Particulars | Code \# | Amount(Dr.) <br> Rs. | Amount(Cr.) <br> Rs. |
| :---: | :---: | :---: | :---: |
| Depreciation account <br> Machinery account |  | 40,000 |  |
| Depreciation on machinery is <br> charged. |  |  | 40,000 |

Depreciation of machinery will be shown in the profit \& loss account under the heading of Administrative Expenses and will be deducted from the value of machinery account in the balance sheet.

ENTRY \# 2

| Particulars | Code \# | Amount(Dr.) <br> Rs. | Amount(Cr.) <br> Rs. |
| :---: | :---: | :---: | :---: |
| Depreciation account |  |  | 64,000 |
| Building account |  |  |  |
| Depreciation on building is charged. |  |  | 64,000 |

Depreciation of building will be shown in the profit \& loss account under the heading of Administrative Expenses and will be deducted from the value of building account in the balance sheet.

The ledger account of depreciation will be as follows:

| Depreciation Account |  |  |  |
| :--- | ---: | :--- | :--- |
| Particulars | Amount <br> Dr. (Rs.) | Particulars | Amount <br> Cr. (Rs.) |
| Dep. of Machinery <br> Dep. of building | 40,000 |  |  |
| Total | 64,000 |  |  |

ENTRY \# 3

| Particulars | Code \# | Amount(Dr.) <br> Rs. | Amount(Cr.) <br> Rs. |
| :---: | :---: | :---: | :---: |
| Salaries account <br> Salaries payable account |  | 30,000 |  |
| Salaries for the month of June are <br> unpaid. |  |  | 30,000 |

Salaries account will be presented in the profit \& loss account under the heading of Administrative Expenses and salaries payable will be presented in the balance sheet under the heading of Current Liabilities.

The ledger account of salaries will be as follows:

| Salaries Account |  |  |  |
| :--- | ---: | :--- | :--- |
| Particulars | Amount <br> Dr. (Rs.) | Particulars |  |
| Balance c/d | 300,000 |  |  |
| Salaries payable | 30,000 |  | Amount <br> Cr. (Rs.) |

## ENTRY \# 4

| Particulars | Code \# | Amount(Dr.) <br> Rs. | Amount(Cr.) <br> Rs. |
| :---: | :---: | :---: | :---: |
| Advance Insurance |  | 13,000 |  |
| Insurance Account |  |  | 13,000 |
| Insurance is paid in advance |  |  |  |

Advance insurance is our asset and it will be shown in the balance sheet under the heading of current assets and advance insurance will be deducted from the insurance expenses.

The ledger account of insurance will be as follows:

| Insurance Account |  | Account Code ------- |  |
| :--- | :---: | :--- | :--- |
| Particulars | Amount <br> Dr. (Rs.) | Particulars | Amount <br> Cr. (Rs.) |
| Balance c/d | 104,900 | Advance insurance |  |
| Total |  | Balance b/d | 13,000 |

ENTRY \# 5

| Particulars | Code \# | Amount(Dr.) <br> Rs. | Amount(Cr.) <br> Rs. |
| :---: | :---: | :---: | :---: |
| Rent Receivables |  | 20,000 |  |
| Rental Income |  |  | 20,000 |
| Rental Income receivable |  |  |  |

Rent receivables is our income and it will be shown in the balance sheet under the heading of current assets and rent will be shown as income in the profit \& loss account

The ledger account of rent will be as follows:

| Rent Account |  |  | Account Code -------- |  |
| :--- | ---: | :--- | :--- | :---: |
| Particulars | Amount | Particulars |  |  |
|  | Dr. (Rs.) |  | Amount |  |
|  |  | Balance c/d |  |  |
|  |  | Receivable |  |  |
| Balance b/d | 200,000 |  | 180,000 |  |
|  |  |  | 20,000 |  |
| Total | 200,000 | Total |  |  |

## PROFIT \& LOSS ACCOUNT

## ILLUSTRATION \# 2

Following trial balance has been extracted from the books of Arif Traders on June 30, 2002

## Further information available:

- Wages and salaries payable on June 30, 2002 Rs. 4,500
- Rent prepaid on June 30, 2002 Rs. 7,000
- Vehicle running costs payable on June 30 Rs. 3,000
- Increase in provision for doubtful debts Rs. 3,000
- Depreciation rate is $12.5 \%$ for furniture and $20 \%$ for vehicle.

You are required to prepare Profit and Loss Account for the year and Balance Sheet as on June 30, 2002

## SOLUTION

In the profit \& loss account prepared above, the amount of bad debts written off are grouped with the provision for doubtful debts (see note \# 4)
In the following presentation, bad debts are shown separately and working of provision of bad debts is shown in Note \# 4(a).

## Note \# 1 Salaries \& Wages

| Salaries \& Wages |  | Account Code ------- |  |  |
| :--- | ---: | ---: | ---: | :---: |

## EXAMPLE \# 1

The following trial balance was extracted from A, B \& Co. books on June 30, 2002.

| A, B \& company |  |  |
| :---: | :---: | :---: |
| Trial balance as on June 30, 2002 |  |  |
| Particulars | Amount Dr. (Rs.) | Amount Cr. (Rs.) |
| Building Cost | 750,000 |  |
| Furniture and Fixtures Cost | 110,000 |  |
| Accumulated Dep. Building |  | 250,000 |
| Accumulated Dep. Furniture |  | 33,000 |
| Debtors | 162,430 |  |
| Creditors |  | 111,500 |
| Cash at Bank | 6,770 |  |
| Stock on Jun 30, 2002 | 563,400 |  |
| Sales |  | 1,236,500 |
| Cost of goods Sold | 710,550 |  |
| Carriage outward | 12,880 |  |
| Discounts Allowed | 1,150 |  |
| Markup on Bank Loan | 40,000 |  |
| Office Expenses | 24,160 |  |
| Salaries and Wages | 189,170 |  |
| Bad Debts | 5,030 |  |
| Provision for Bad Debts |  | 4,000 |
| Bank Loan (Long Term) |  | 400,000 |
| Capital - A |  | 350,000 |
| B |  | 295,000 |
| Current Account - A |  | 13,060 |
| B |  | 2,980 |
| Drawings - A | 64,000 |  |
| B | 56,500 |  |
|  |  |  |
| Total | 2,696,040 | 2,696,040 |

## Notes:

- Expenses to be accrued, Office Expenses Rs. 960, Wages Rs.2,000.
- Depreciate Fixtures $10 \%$ and Building $5 \%$ on straight line.
- Reduce provision for doubtful debts to Rs. 3,200
- Partnership salary of A Rs. 8,000 is to be accrued.
- A and B share profit and loss equally.

You are required to prepare profit \& loss account and the balance sheet as at June 30, 2002.

## SOLUTION

PROFIT \& LOSS ACCOUNT

| A, B, \& Co |  |  |  |
| :---: | :---: | :---: | :---: |
| Profit and Loss Account for the Year Ending June 30, 20-2 |  |  |  |
| Particulars | Note | Amount Rs. | Amount Rs |
| Sales <br> Less: Cost of Goods Sold (ma | l consumed) |  | $\begin{aligned} & \hline 1,236,500 \\ & (710,550) \end{aligned}$ |
| Gross Profit <br> Less: Expenses <br> Wages and Salaries <br> Office Expenses <br> Carriage Out <br> Discount Allowed <br> Markup on Loan <br> Provision for Doubtful Debt <br> Depreciation | $\begin{array}{ll}  & 1 \\ 2 & \\ & \\ & 3 \\ & \\ & \end{array}$ | $\begin{array}{r} 191,170 \\ 25,120 \\ 12,880 \\ 1,150 \\ 40,000 \\ 4,230 \\ 48,500 \end{array}$ | 525,950 $(323,050)$ |
| Net Profit |  |  | 202,900 |

In above solution, bad debts are grouped with provision for doubtful debts. In the following solution, bad debts and provision for doubtful debts are shown separately.

## INTEREST ON CAPITAL AND DRAWINGS

o The partnership agreement may include one or both of the following clauses:
o Partners are charged interest on drawings (this may be on the total amount of the current account balance or on the amount exceeding a specific limit, depending upon the terms of agreement).
o Partners are given interest on their capital (again this can be on the total amount of the capital or the amount exceeding a specific figure).

## REASONS FOR INTEREST ON CAPITAL

o The profit/loss sharing ratio may not be equal despite the fact that partners have contributed equal capital, depending upon the partnership agreement.
o Take the following example:
o Two partners start a business and contribute equal capital and decide to share equal profits.
o But they also realize that in future the business may need further capital and at that time both partners may not be able to contribute equally.
o So, instead of revising the contract every time, they include a clause in the agreement, whereby, the partners are allowed an interest on the capital contributed.
o This interest can be on the whole amount of both partners or only of one partner on the amount contributed in excess of the other partner.
o This way a partner, who provides capital in excess of his profit sharing ratio, can be compensated.
o One may say that the same results can be achieved by saying that profit and loss sharing will be proportionate to the amount of capital invested.
o But, as we have said that in partnership everything depends on the Partnership Agreement.

## REASONS FOR INTEREST ON DRAWINGS

o Drawings are opposite to capital invested i.e. these are the funds drawn by partners from the business.
o Therefore, in order to keep the distribution of profit fair, a clause may be inserted in the agreement, where an interest is charged on the drawings of the partners.
o Again, this can be on the total amount or on an amount exceeding a specific limit.
o Both of the above things depend upon the agreement between partners.

## ACCOUNTING TREATMENT

o One may think that as Interest on Capital is paid to the partners, so it should be treated as business expense and Interest on Drawings is charged from the partners, therefore, it should be treated as income.
o But this is not the case.
o Just like partners salaries, both these items will be included in the Profit and Loss Appropriation Account.
o Partners' salaries, interests etc. are never treated as expense or income of the business. They are a part of DISTRIBUTION OF PROFIT.

## EXCEPTIONS

0 Rent paid to partner for use of his premises, purchase of stocks, assets or other items for use in business, Markup on loan from partner are the exceptions. All these expenses are charged to profit \& loss account of the partnership firm.

## ACCOUNTING ENTRIES

O Interest on Capital

| Debit: | Profit and Loss Appropriation Account |
| :--- | :---: |
| Credit: | Partner A's Current Account |
| Credit: | Partner B's Current Account |
| Credit: | Partner C's Current Account |

0 Interest on Drawings

| Debit: | Partner A's Current Account |
| :--- | :--- |
| Debit: | Partner B's Current Account |
| Debit: | Partner C's Current Account |
| Credit: | Profit and Loss Appropriation Account |

## Example \# 1

Mr. Abid is a partner in a partnership firm. His capital on July 1, 2001 was Rs. 200,000. He invested further capital of Rs. 100,000 on March 1, 2002.

You are required to calculate his mark up. Mark up rate is $5 \%$. The financial year is from July to June.

## SOLUTION

Rs. 200,000 was invested in the beginning of the year and extra capital was invested on $1^{\text {st }}$ March. So, from March onward, the capital is Rs. 300,000 (200,000 + 100,000). We will calculate mark up on Rs. 200,000 for 12 months, i.e., from July to June. Mark up on 100,000 will be for 4 months, i.e., from March to June.

Mark up is calculated as follows:

$$
\begin{aligned}
& 200,000 \times 5 \%=10,000= \\
& 100,000 \times 5 \%=15,000 \times 4 / 12= \\
& \text { Total Mark Up }
\end{aligned}
$$

## Example \# 2

Mr. Naeem is a partner in a partnership firm. He drew following amount during the financial year:
Rs.

| September 1 | 3,000 |  |
| :--- | :--- | :--- |
| November 1 | 5,000 |  |
| January 1 | 4,000 |  |
| March 1 | 5,000 |  |
| June 1 |  | 2,000 |

You are required to calculate Mark up on his drawings, if the rate of mark up is $5 \%$. The financial year is from July to June,

## SOLUTION

$$
\begin{array}{ll}
3,000 \times 5 \%=150 \times 10 / 12=125.00 \\
5,000 \times 5 \%=250 \times 8 / 12=166.67 \\
4,000 \times 5 \%=200 \times \quad 6 / 12=100.00 \\
5,000 \times 5 \%=250 \times 4 / 12=83.33 \\
2,000 \times 5 \%=100 \times 1 / 12=\underline{8.33} \\
\text { Total Mark Up } & \underline{483.33}
\end{array}
$$

## EXAMPLE \# 3

Atif, Babar and Dawar are three partners sharing profits equally.
You are required to prepare profit and loss appropriation account and extract from balance sheet, showing partners capital and current accounts from the following information:

- Net profit for the year Rs. 558,000
- Opening balance of Capital accounts Atif Rs. 500,000, Babar Rs. 600,000, Dawar Rs. 400,000
- Opening balance of Current Account Atif Rs. 55,800, Babar Rs. 63,820, Dawar Rs. 20,555.
- Salaries to be paid to Babar Rs. 10,000, Dawar Rs. 12,000.
- Drawings during the year Atif Rs. 180,000, Babar Rs. 220,000 Dawar Rs. 151,000
- Mark up on Capital @ $5 \%$ and Mark up on drawings are: Atif Rs. 9,000, Babar Rs. 11,000 and Dawar Rs. 7,550.

## SOLUTION

PROFIT \& LOSS APPROPRIATION ACCOUNT

| Atif, Babar, Dawar \& Co |  |  |

## ADMISSION OF A PARTNER

When a new partner join the business, old agreement of partnership is modified or a new agreement is prepared. This new agreement contains new ratios in which partners share profit and loss in new set up. At the admission of a new partner, all the assets and liabilities of the old business are revalued in order to know the exact worth of the business. Goodwill of the business is also revalued. The value (in monetary terms) of the reputation of the business is called GOODWILL. It is an intangible asset.

## DISSOLUTION OF A FIRM

When a partnership is dissolved, all the liabilities of the firm are paid, out of the assets of the firm, available at the time of dissolution. The remaining amount after paying all the liabilities, if available, will be distributed among the partners in their profit loss sharing ratios. If assets of the firm are not sufficient to pay all the liabilities of the firm, the partners will contribute the balance amount in their profit/loss sharing ratios to meet the liabilities of the firm.

## DISADVANTAGES OF A PARTNERSHIP FIRM

The Local Law restricts the number of partners in a partnership firm to twenty. If the firm needs more capital for its business, the partners may not be in a position to invest more money in the business.

Secondly, if the business of the partnership firm is very large and twenty persons can not manage it, they cannot admit new partners in the business. However, there is one exception. The partnership firm of professionals can have more than twenty partners.

At this point, need for forming a COMPANY arises.

## ADVANTAGES OF A LIMITED COMPANY

A Limited company enjoys the following benefits:

- It can have more than twenty partners, so problem of extra capital is reduced to minimum.
- The liabilities of the members of a company is limited to the extent of capital invested by them in the company
- There are certain tax benefits to the company, which a partnership firm can not enjoy.
- In Pakistan, affairs of limited companies are controlled by COMPANIES ORDINANCE issued in 1984.
- The formation of a company and other matters related to companies are governed by SECURITIES AND EXCHANGE COMMISSION OF PAKISTAN (SECP).

## TYPES OF COMPANIES

There are two major types of the companies:

- Private limited companies
- Public limited companies

## PRIVATE LIMITED COMPANIES

Following are the main characteristics of private limited companies:

- Number of members in a private limited company ranges from two to fifty.
- Words and parentheses "(Private) Limited" are added at the end of the name of a private limited company. Example: ABC (Private) Limited.
- Private limited company can not offer its shares to general public at large.
- In case a shareholder decides to sell his shares, his shares are first offered to existing shareholders. If all existing shareholders decide not to purchase these shares, only then, an outsider can buy them.
- The shareholders of the private limited company elect two members of the company as Directors.
- These directors form a board of directors to run the affairs of the company.
- The head of board of directors is called "chief executive".

## PUBLIC LIMITED COMPANY

Following are the main characteristics of public limited companies:

- Minimum number of members in a public limited company is seven
- There is no restriction on the maximum number of members in a public limited company.
- Word "Limited" is added at the end of the name of a public limited company. Example: ABC Limited.
- Public limited company can offer its shares to general public at large.
- The shareholders of the public limited company elect seven members of the company as Directors.
- These directors form a board of directors to run the affairs of the company.
- The head of board of directors is called "chief executive".

There are two types of public limited company:

- Listed Company
- Non Listed Company

## LISTED COMPANY

Listed company is that company whose shares are quoted on stock exchange. i.e. whose shares are traded in stock exchange. It is also called quoted company.

## NON LISTED COMPANY

Non listed company is that company whose shares are not quoted on stock exchange. i.e. whose shares are not traded in stock exchange.

## FORMATION OF A COMPANY

In case of private limited company, any two members and in case of public limited company, any seven members can subscribe their names in Memorandum and Articles of association along with other requirements of the Companies Ordinance 1984; can apply to Security and Exchange Commission for registration of the company.

Memorandum of association contains the following:

- Name of the company with the word "Limited" as the last word of the name, in case of public limited and the parenthesis and the word "(Private Limited)" as the last word of the name, in case of private limited company.
- Place of registered office of the company.
- Objective of the company.
- Amount of share capital with which company proposes to be registered and division in to number of shares.
- No subscriber of the company shall take less than one share.
- Each subscriber of the memorandum shall write opposite to his name, the number of shares held by him.

## ARTICLES OF ASSOCIATION

- Article of association is a document that contains all the policies and other matters which are necessary to run the business of the company.
- This is also signed by all the members of the company.

When Security and Exchange Commission is satisfied that all the requirements of the Companies Ordinance have been complied with, it issued certificate of incorporation to the company. This certificate is evidence that a separate legal entity has come in to existence.

## AUTHORIZED SHARE CAPITAL

- The maximum amount with which a company gets registration/incorporation is called authorized share capital of that company.
- This capital can be increased with the prior approval of security and exchange commission. This capital is further divided in to smaller denominations called shares.
- Each share usually has a face value equal to Rs. 10. According to Companies Ordinance, this face value can be increased but can not be decreased.
- The value of share written on its face is called face value or par value or nominal value

## ISSUED SHARE CAPITAL

- When a company issues its shares to general public at large, the amount raised by the company with such an issue is called issued share capital.
- This is also called Paid up Share Capital.( total amount received by the company)
- Accounting entry is recorded for issued share capital; no such entry is recorded for authorized share capital.

## PRELIMINARY EXPENSES

All expenses incurred up to the stage of incorporation of the company are called Preliminary Expenses. All these expenses are incurred by subscribers of the company.

## Lesson-37

## SHARE CAPITAL

- The maximum amount with which a company gets registration/incorporation is called authorized share capital of that company.
- This capital can be increased with the prior approval of security and exchange commission. This capital is further divided in to smaller denominations called shares.
- Each share usually has a face value equal to Rs. 10. According to Companies Ordinance, this face value can be increased but can not be decreased.
- The value of share written on its face is called face value.
- Shares are issued for cash as well as for any asset. For example, if any member of the company sell his/her land to the company. In return, company issue him/her fully paid shares instead of paying cash. Those shares are also part of paid up capital because company has received the benefit of that amount.

## SHARE CERTIFICATE

- Share Certificate is the evidence of ownership of the number of shares held by a member of the company. When a company issue more than one share to its member, it does not issue that number of shares to him/her. Instead, it issues a certificate under the stamp of the company that a particular number of shares are issued to -------- member of the company.

## SHARES ISSUED AT PREMIUM

When a company has a good reputation and earns huge profits, the demand of its shares increases in the market. In that case, the company is allowed by the Companies Ordinance 1984, to issue shares at a higher price than their face value. Such an issue is called Shares Issued at Premium. The amount received; in excess of the face value of the shares is transferred to an account called "Share Premium Account". This account is used to:

- Write off Preliminary Expenses of the company.
- Write off the balance amount, in issuing shares on discount.
- Issue fully paid Bonus Shares.

## SHARES ISSUED ON DISCOUNT

When a company is not making huge profits, rather it is sustaining loss, the demand of its shares decreases in the market. If the company needs extra funds, then it is allowed by the Companies Ordinance 1984, to issue shares at lesser price than their face value. Such an issue is called Shares Issued on discount.

The difference of face value and the amount received is met by share premium account, if available. If there is no share premium account available, this difference is shown in the profit and loss account of that period, in which shares are issued as loss on issue of shares at discount.

## CERTIFICATE OF INCORPORATION/REGISTRATION

When Security and Exchange Commission of Pakistan receives application for registration of a company, the registrar of SECP makes investigation in respect of compliance with legal requirements. When he is satisfied that all legal requirements are complied with. He issues a Certificate of Incorporation/registration to the company. This certificate is evidence that a separate legal entity has formed. The company, after incorporation/Registration has the right to sue and to be sued in its own name.

## DIVIDEND

- Profit distributed to the share holders for their investment in the company is called Dividend.
- Dividend is approved by the share holders in the annual general meeting at the recommendation of the directors.
- Dividend is paid out of profits. If, in any year, company could not make any profit. No dividend will be paid to share holders.
- Dividend is paid to registered share holders of the company.
- Registered share holders are those members of the company, who are enlisted in the register of share holders of the company.

## SUBSCRIBERS / SPONSORS OF THE COMPANY

Subscribers / Sponsors are the persons who sign articles and memorandum of the company and contribute in the initial share capital of the company.

## ISSUANCE OF FURTHER CAPITAL

- Where a company wants to issue further capital (called raising the capital), shares are first offered to current shareholders.
- The issuance of further capital to Present Shareholders is called Right Issue.
- This issue is in proportion to current shares held by the shareholders.
- The shareholders can accept or reject the offer.
- If shareholders refuse to accept these shares then these are offered to other people.

## JOURNAL ENTRIES

- Shares issued against cash

Debit: Cash / Bank Account
Credit: Share Capital Account

- Shares issued against transfer of asset:

Debit: Asset Account
Credit: Share Capital Account
This is called issuance of asset in kind.

## BONUS SHARES

- This is another way of distributing dividend.
- When a company decides, not to give cash to the share holders as dividend, it issued shares called bonus shares, to the share holders for which it receives no cash.
- These are fully paid shares.

## FINANCIAL STATEMENTS OF LIMITED COMPANIES

- In Pakistan, Financial Statements of limited companies are prepared in accordance with:
- International accounting standards adopted in Pakistan.
- Companies Ordinance 1984.
- In case of conflict the requirements of Companies Ordinance would prevail over Accounting Standards.

## COMPONENTS OF FINANCIAL STATEMENTS

Components of companies' financial statements are as follows:

- Balance Sheet
- Profit and Loss Account
- Cash Flow Statement
- Statement of Changes in Equity
- Notes to the Accounts
- Comparative figures of Previous Period

## EQUITY

Equity is the total of capital, reserves and undistributed profit. That means the amount contributed by share holders plus accumulated profits of the company. Equity, therefore, represents the total of shareholders fund in the company.

## STATEMENT OF CHANGES IN EQUITY

- The statement of changes in equity shows the movement in the shareholders equity (capital and reserves) during the year.
- We can say that it replaces profit and loss appropriation account of partnership business.

## FORMAT OF STATEMENT OF CHANGES IN EQUITY

| Name of the Company |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Statement of Changes in Equity for Year Ended June 30, 2002 |  |  |  |  |  |
|  | Share Capital | Share <br> Premium Account | Reserves | $\left\|\begin{array}{ll} \text { Profit } & \& \\ \text { Loss } & \text { A/c } \end{array}\right\|$ | Total |
| Balance On Jun 30, 2000 | X | X | X | X | X |
| Movements During the Year |  |  |  | X | X |
| Balance On Jun 30, 2001 | X | X | X | X | X |
| Movements During the Year |  |  |  | X | X |
| Balance On June 30, 2002 | X | X | X | X | X |

## STATEMENT OF CHANGES IN EQUITY

- Statement of changes in equity shows the movement in:
o Share Capital (issued share capital)
o Share Premium
o Nature of Reserves created
o Un-appropriated Profit / Loss
o Dividend Distributed

## SHARE PREMIUM

- Share Premium is the amount received in excess of the face value of the share. Example: if a Rs. 10 share is sold for Rs, 12 then Rs. 2 is share premium.
- Share Premium can not be distributed among the share holders.
- It can be utilized:
o To issue Bonus Shares
o To write off Preliminary Expenses
0 To meet the difference of face value and cash received in case of shares issued at discount
0 To meet the expenses of issue of shares
0 For payment of premium on redemption of debentures.

## RESERVES

- Capital Reserve and Fixed Asset Replacement Reserve are used for specific purpose. These are not distributed among share holders.
- General Reserve and undistributed profit` can be distributed among share holders.
- Revaluation Reserve is created when an asset is re-valued from cost to market value.
- Revaluation Reserve can not be distributed among the share holders.
- It can be utilized for:
o Setting off any loss on revaluation
0 At the time of disposal of asset, the reserve relating to that asset is transferred to profit \& loss account.

## CASH FLOW STATEMENT

o Cash Flow Statement shows the movement of cash resources during the year. It gives information about sources of income and account heads on which this amount is spent.
0 It is an integral part of financial statements.

## NOTES TO THE ACCOUNTS

0 Notes to the accounts are the explanatory notes of all the items shown in the profit and loss account and the balance sheet.
0 It is the requirement of the Companies Ordinance and the International Accounting Standards.
0 Following are explained in Notes to the accounts:
o Nature of business of the company
o Accounting Policies of the company
0 Details and explanation of items given in the Profit and Loss Account and Balance Sheet.

## DEBENTURES

- Debentures are acknowledgement of debt, owed by the company to the public at large for a defined period of time, and has a mark up (profit) rate attached to it.
- Debentures are issued under the common seal (Stamp) of the company.
- Debenture is an instrument for obtaining loan from general public.
- Mark up is paid on Debentures which is generally equal to the market rate.

## TERM FINANCE CERTIFICATE

- Term Finance Certificates are issued for a defined period.
- These are also issued to obtain loan from public at large.
- Both Debentures and Term Finance Certificates are usually issued by Public Companies.

## ADDITIONAL INFORMATION

- Closing stock is valued at Rs. 412,780 .
- Accrue Auditors' remuneration Rs. 71,000.
- Dividend is proposed @ $37.5 \%$ for the year.
- Depreciate plant \& machinery @ $20 \%$ on cost.
- Of the motor hire, Rs. 55,000 are for selling purposes.
- Directors' remuneration has been as follows:
o Chairman 46,640
o Managing Director 51,500
0 Finance Director 46,000
o Marketing Director 51,000
- 195,140

You are required to prepare profit \& loss account as on June 30, 2002 and balance sheet for the reported period

## SOLUTION

While presenting the financial Statements of the company, balance sheet is presented first and profit \& loss account is presented later, but we cannot prepare balance sheet without preparing profit and loss account. So we will prepare profit and loss account first.

Balance Sheet

## Financial Statements of Limited Companies

## QUESTION \# 1

KKB (Private) Limited is a manufacturing company. Following list of balances has been extracted from its books as on June 30, 2002.

| KKB (Private) Limited |  |  |
| :--- | :--- | :--- |
| Trial Balance As At June 3002 |  |  |
|  | Debit Rs. | Credit Rs. |
| Authorized Share Capital |  | 500,000 |
| Paid up Capital |  | 300,000 |
| Debentures |  | 240,000 |
| Accumulated Profit and Loss Account |  | 49,489 |
| General Reserve |  | 8,000 |
| Creditors |  | 27,360 |
| Accumulated Depreciation |  |  |
| Botor Vehicles |  | 46,050 |
| Furniture and Fixtures | 66,000 |  |
| Proposed Dividend | 120,000 | 11,250 |
| Land | 315,000 | 15,000 |
| Building | 187,500 |  |
| Motor Vehicles | 34,500 |  |
| Furniture and Fixture | 48,630 |  |
| Stock in Trade | 42,525 |  |
| Debtors | 14,994 |  |
| Bank Balance | 763,149 | 763,149 |
| TOTAL |  |  |

## Note:

All items of profit and loss have been accounted for in calculating the balance of accumulated profit and loss account, except for Depreciation which is to be charged at $10 \%$ on WDV on all depreciable assets.

## Required

Prepare the balance sheet of Beta (Private) Limited As on June 30, 2002.

## SOLUTION

## Balance Sheet

| KKB (Private) Limited |  |
| :--- | :---: |
| Balance Sheet As At June 30, 2002 |  |
| Particulars | Note |
| Fixed Assets at WDV | Amount Rs. |
| Current Assets | 492,330 |
| Debtors |  |
| Stock in Trade | 42,525 |
| Bank Balance | 48,630 |
|  | 14,994 |
| Current Liabilities | 106,149 |
| Creditors |  |
| Proposed Dividend | 27,360 |
|  | 15,000 |
| Working Capital | 42,360 |
| Net Assets Employed | 63,789 |
| Financed By: | $\mathbf{5 5 6 , 1 1 9}$ |
| Authorized Capital |  |
| 50,000 Shares of Rs. 10 each | 500,000 |
| Paid Up Capital |  |
| 30,000 Shares of Rs. 10 each | 300,000 |
| General Reserve | 8,000 |
| Accumulated Profit and Loss Account | 2 |
| Share Holders Equity | 3,119 |
| Debentures | 240,000 |
| Total | $\mathbf{5 5 6 , 1 1 9}$ |

Note 1 - Fixed Assets at WDV

| Particulars | Cost |  |  | Rate | Accumulated <br> Depreciation |  |  | WDV |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
|  | As At <br> $1-7-01$ | Addition/ <br> Deletion | As At <br> $30-6-02$ |  | As At <br> $1-7-01$ | For The <br> Year | As At <br> $30-6-02$ | As At <br> $30-6-02$ |
|  | 120,000 | 0 | 120,000 | 0 | 0 | 0 | 0 | 120,000 |
| Building | 315,000 | 0 | 315,000 | 10 | 66,000 | 24,900 | 90,900 | 224,100 |
| Furniture \& |  |  | 0 | 34,500 | 10 | 11,250 | 2,325 | 13,575 |
| Fixtures | 34,500 | 0 | 187,500 | 10 | 46,050 | 14,145 | 60,195 | 120,925 |
| Vehicles | 187,500 | 0 | 12305 |  |  |  |  |  |
| TOTAL | 657,000 | 0 | 657,000 |  | 123,300 | 41,370 | 164,670 | 492,330 |

## Note 2 - Accumulated Profit and Loss Account

Balance As Per Trial Balance
Less: Depreciation for the Year (note 1) (41,370)
8,119

As depreciation is charged in profit \& loss account and we did not prepare profit \& loss account, in this case, so depreciation will be deducted from accumulated profit \& loss account.

## QUESTION \# 2

## STATEMENT OF CHANGES IN EQUITY

- Statement of changes in equity shows movement in share holders' equity during the reported period.
- Share holders equity includes:
o Share Capital
o Share Premium Reserve
o General Reserve
o Accumulated Profit \& Loss Account
Reserves are of two types:
- Distributable Reserve
- Non Distributable Reserve

Distributable reserves are those reserves which are distributable among the share holders of the company, for Example, General Reserve, Accumulated Profit \& loss etc.

## NON DISTRIBUTABLE RESERVE

Non Distributable reserves are those reserves which are created for a specific purpose. These can not be distributed among share holders. These can be utilized for that particular purpose, for which, these are created. For example, Share Premium Reserve, Revaluation Reserve.

## PROCEDURE FOR PREPARING STATEMENT OF CHANGE IN EQUITY

- All the opening balances of share holders' equity are listed down first.
- Movement during the year in share holders' equity is recorded.
- After adding/reducing the share holders' equity, closing balances are calculated.
- All information regarding share holders' equity is collected from balance sheet of the company.
- According to International Accounting Standards, fixed assets revaluation reserve is included in the statement of changes in equity. But The Companies Ordinance does not allow revaluation reserve to become a part of statement of changes in equity. As Companies Ordinance prevails over International Accounting Standards, so we do not show Revaluation reserve in the statement of changes in equity.

## NOTES TO THE ACCOUNTS

Notes to the accounts are explanatory notes on financial statements of the company. These include all the information, from formation of company to the calculation of figures, arrived at, during the preparation of financial statements.

Notes of Alpha Ltd. are as follows:

- Company and Its operations
o Company was formed in the year --------
o The company trades in electronic consumer items.
Significant Accounting Policies
Historical Cost Convention
0 These accounts have been prepared under the historical cost convention.

## Revenue Recognition

0 Sales are recorded on dispatch of goods to customers.

## Fixed Assets

0 Fixed Assets are recorded at cost less accumulated depreciation.
Stock Valuation
o Method of stock valuation is $\qquad$

Taxation
o Provision for Taxation is calculated on the basis of -------

## CASH FLOW STATEMENT

Cash flow statement shows, how cash was generated and how it was used during the period. These days, it is required by law to include this statement in financial statements, especially in case of financial statements of limited companies.

## NEED FOR CASH FLOW STATEMENT

For any business, it is important to ensure that:

- Sufficient profits are made to compensate owners for the investment made, efforts put in and the risk taken for the business,
- Sufficient funds are available to meet the obligations of the business as and when required.

The information as to profitability is provided by the Profit and Loss Account. The information as to availability of funds or financial health is provided by the balance sheet. But the balance sheet is prepared on a specific date and can provide information of financial position as on that date only. Cash flow, on the other hand provides more detailed information about the movement of funds during the period. With the help of cash flow, we can determine the amount of cash generated form different sources and the areas on which it is utilized.

## DIFFERENCE BETWEEN PROFITABILITY AND LIQUIDITY

## Liquidity

It is the ability of a business to pay its debts in time. By having good liquidity, we mean that a business has sufficient liquid funds (cash and cash equivalents) so that it can repay liabilities.

## Cash

Cash includes cash in hand and demand deposits.

## Cash Equivalents

Cash equivalents are those short term investments that can be converted into a known amount of cash at any time. Usually, investments up to three months maturity are included in cash equivalents.

People generally mix up profitability with liquidity. One might think that if a business has earned, say, One Million Rupees of profit than it should have approximately the same amount of cash in it.
But mostly this is not the case. Consider the following example:

- A person starts a small business with Rs. 10,000.
- He purchases goods worth Rs. 20,000. Rs. 10,000 is paid in cash and remaining is payable at the end of the month.
- The same day, all the goods are sold on credit of two months for Rs. 30,000.
- Now if we draw a profit and loss account at the end of the month, the business has earned a profit of Rs. 10,000, considering no expenses.
- But at the same time, it is time to pay to the Creditors, whereas payment from debtor is not due yet.
- This means that although the business earned a profit of Rs. 10,000 but it has no cash to pay to its creditors.
- This simple example helps us to understand that liquidity is different from profitability
- But it is as important as profitability.

## COMPONENTS OF CASH FLOW STATEMENT

Cash flow statement is divided into three components

- Cash Flow from Operating Activities
- Cash Flow from Investing Activities
- Cash Flow from Financing Activities

## CASH FLOW FROM OPERATING ACTIVITIES

Cash flow from operating activities is generally derived from the principal revenue producing activities of the business.

Cash Flow from Operating Activities is the indicator of success or failure of a business's operations. If the cash flow from operations is continuously negative, this means that the business revenue is not enough to recover the costs that are incurred to earn it. Therefore, in the long run Cash flow from operations must be positive.

Examples of cash flows from operating activities are:

- Cash receipt from sale of goods and rendering of services.
- Cash receipts from fees, commission and other revenues.
- Cash payments to suppliers for goods and services.
- Cash payments to and on behalf of the employees.
- Cash payments or refunds of income taxes.

## EXAMPLE

## CASH FLOW FROM INVESTING ACTIVITIES

Cash flow from investing activities includes cash receipts and payments that arise from Fixed and Long Term assets of the organization.

Cash Flows from Investing Activities shows the investment trend of the business. If it is negative (Outflow) this means that the company is investing in long term assets and is expanding. On the other hand if it is positive (Inflow) over the years, this means that the company is selling its long term investments.

Examples of cash flows from investing activities are:

- Cash payments to acquire property plant and equipment. These also include payments made for selfconstructed assets.
- Cash receipts from sale of property plant and equipment.
- Cash payments and receipts from acquisition and disposal of other than long term assets e.g. Shares, debentures, TFC, long term loans given etc.

If assets are held for trading purposes or in normal course of business e.g. car / property dealers and loans given by banks, then cash flow from these are included in Operating Cash Flow.

## EXAMPLE

## Cash Flow from Investing Activities

Add: Disposal of Fixed Asset and Long Term Investments
Less: Acquisition of Fixed Assets and Long Term Investments
Add: Dividend Received / Returns on Investment Received
Net Cash Flow from Investing Activities

100,000
$(80,000)$
20,000

## CASH FLOW FROM FINANCING ACTIVITIES

Cash flow from financing activities includes cash receipts and payments that arise from Owners of the business and other long term liabilities of the organization.

Cash Flows from Financing Activities shows the behavior of investors (both equity capital and debt capital). A positive figure (inflow) shows that funds are being invested in the company and vice versa.

Examples of cash flows from financing activities are:

- Cash received from owners i.e. share issue in case of company and capital invested by sole proprietor or partners.
- Cash payments to owners i.e. dividend, drawings etc.
- Cash receipts and payments for other long term loans and borrowings.

## EXAMPLE

## Cash Flow from Financing Activities

Add: Shares Issued / Capital Invested 1,000,000
Less: Dividend Paid / Drawings
Add: Increase in Long Term Borrowings
150,000
Net Cash Flow from Financing Activities

## PROCEDURE OF PREPARING CASH FLOW

Cash Flow Statement is prepared as follows:

- We start from the Profit / Loss for the period before taxation.
- Adjustments are made for non-cash items that are included in the profit and loss account such as Depreciation, Provisions and other items that relate to investing and financing activities.
- This gives us Operating Profit before Working Capital Changes.
- Then Working Capital Changes, i.e. increase or decrease in items of current assets and liabilities, are added / subtracted (Cash and Cash Equivalents are not included here)
- This gives the Cash Flow from Operations.
- To this figure, we add / subtract cash flows from investing and financing activities.
- This gives us Net Increase / Decrease in Cash and Cash Equivalents.
- To this figure we add Opening Balance of Cash and Cash Equivalents (that we excluded from current assets)
- This gives us the Closing Balance of Cash and Cash Equivalents.

Increase or Decrease is generally taken as difference in opening and closing balances of accounts reported in balance sheets.

## FORM OF CASH FLOW STATEMENT

## Name of the Entity <br> Cash Flow Statement for the Period Ending -----

| Net Profit before Tax | XYZ |
| :---: | :---: |
| Add: Adjustment for Non-Cash Items |  |

## Lesson-43

## FINANCIAL STATEMENTS OF LISTED/QUOTED COMPANIES

According to Companies Ordinance 1984, the arrangement of financial statements is as follows:

- Balance Sheet
- Profit and Loss Account
- Cash Flow Statement
- Statement of changes in Equity
- Notes to the Accounts

For the sake of presentation same order should be followed while solving the questions. But we cannot complete the balance sheet without first preparing the Profit and Loss Account. To solve the problem in exam situation we usually prepare the forms of Balance Sheet and Profit and Loss Account first. This way we can also plan the Serial Numbers of Notes to the Accounts beforehand. Otherwise a sheet of question paper can be left blank for preparation of Balance Sheet.

Comparative figures are also included in the financial statements for every figure, except where first set of financial statements is being prepared. In examination situation comparative figures should be shown provided these are provided in the question.

## QUESTION

Following is the trial balance of Alfa Ltd. For the year ended June 30, 2002. You are also given the balance sheet of June 30, 2001.

## REQUIRED

You are required to prepare a set of financial statements of the Alfa Ltd.

## Alfa Ltd.

Trial Balance for the Year June 30, 2002

|  | Debit <br> Rs. | Credit <br> Rs. |  |
| :--- | ---: | ---: | ---: |
| Fixed Assets at Cost |  |  |  |
| Freehold Land | 500,000 |  |  |
| Building | 600,000 |  |  |
| Furniture and Fixture | 400,000 |  |  |
| Vehicles | 930,000 |  |  |
| Accumulated Depreciation |  | 150,000 |  |
| Building |  | 150,000 |  |
| Furniture and Fixture |  | 300,000 |  |

## FINANCIAL ANALYSIS

The management of the business has to analyze several things to work out performance of the business. These analyses help the management in decision making. The management works out the performance of the business by calculating some ratios. Following are some of the important ratios, a management may calculate to get first hand knowledge about business's performance:

## Profitability Ratios

Profitability ratios contain the following ratios:

- Gross Profit Ratio
- Net Profit Ratio

## Gross Profit Ratio

The Gross Profit ratio tells the management of the company about profitability of the company. It helps the management of the company to know about cost of production of the company. When management compares it with previous year's ratios, it came to know, how well the business has performed and how to improve its efficiency further. Gross Profit ratio also gives information about sales. It tells the management whether sales has increased or decreased. The management takes appropriate steps accordingly. The formula for calculating this ratio is as follows:

$$
\text { Gross Profit Ratio }=(\text { Gross Profit } / \text { Sales }) \times 100
$$

## Net profit ratio

The benefit of net profit ratio is same as that of gross profit ratio. It helps the management to know about net profit. If gross profit ratio is greater as compared to last year and net profit ratio is lesser, it means that administrative and selling expenses of the company have increased. The management takes appropriate steps to control the expenses. The formula for this ratio is as follows:

Net Profit Ratio $=($ Net Profit $/$ Sales $) \times 100$

## Stock Turnover Ratio

This ratio tells us about sale of stock. It can be calculated in days as well as in number of times. It tells us how many times in a year or in a month, the stock is sold or in how many days, the stock is sold. If it is calculated in days and the result is higher than that of previous years. This means that the stock takes more days to be sold. That means demand of the product of the company is decreasing and vice versa. The formula for the number of days is as follows:

Stock Turnover in days $=($ Average Stock $/$ Cost of goods sold) $\times 365$
Average stock is calculated as follows: (Opening Stock + Closing Stock) / 2
This opening and closing stock may be for a year or for a month depending upon the policy for calculating this ratio.

If this ratio is calculated for number of times, it means that how many times in a given period ( whether a year or a month) the stock is sold. The formula for calculating this ratio is as follows:

Stock Turnover (Number of times) $=($ Cost of goods sold / Average stock $)$

## Debtors Turnover Ratio

This ratio is used to get first hand knowledge about payment received from debtors. It is evident that a company without receiving cash from its customers cannot meet its expenses. If debtors do not pay on time, how would a company pay its liabilities. Consequently its reputation will go down and nobody will place his trust on that company. This ratio helps management to identify debtors who do not pay on time and to pursue them to pay. This ratio is also calculated for number of days and number of times. The formulae for this ratio are as follows:

Debtor Turnover ( Number of days) = (Average Debtors / Credit Sales) x 365
Debtor Turnover ( Number of times) = Credit Sales / Average Debtors

## Creditors Turnover Ratio

Creditors turnover means how many times or in how many days a company pay to its creditors. As mentioned above, if a company does not collect its payment on time, how would it be able to pay its creditors on time. If it does not pay its debtors on time, this situation will make bad impression on its reputation. Like debtors turnover, creditors turnover is also calculated for number of days and number of times. The formulae for this ratio are as follows:

Creditor Turnover ( Number of days) $=($ Average Creditors $/$ Credit Purchases) $\times 365$
Creditor Turnover ( Number of times) $=$ Credit Purchases / Average Creditors

## Return on Capital Employed Ratio (ROCE)

This ratio is calculated for the share holders of the company. As share holders are concerned with profit paid by companies to its share holders. This ratio gives us the proportion of net profit before tax to average capital employed by the company. The return rate of profit given to its members should be higher than current market rate. If return rate is less than current market rate than the share holders will invest their money in the market instead of investing in the company. The formula for calculating this ratio is as follows:

Return on Capital Employed Ratio (ROCE) = Net profit after tax before appropriation / Average Capital Employed

## Earning per share ratio

Earning per share ratio indicates the proportion of net profit, a company is getting per share. Share holders are always interested to know the proportionate rate, a company is getting per share. As price is numerator and earning in denominator, therefore lower value means better return.
The formula for calculating this ratio is as follows:

Earning per share ratio $=$ Net profit after tax before appropriation $/$ Number of shares

## Price Earning Ratio

This ratio is calculated for those share which have market value. This ratio compares earning per share with market value of that share. The formula for calculating this ratio is as follows:

Price Earning Ratio = Market value per share / Earning per share

## Debt Equity Ratio

This ratio shows the composition of finance that have funded the asset of the company. This ratio varies for different projects. In Pakistan, maximum advised ratio is 60: 40. i-e. $40 \%$ of the assets should be bought with company, s investment and $60 \%$ should be bought with the loan taken by the company. This standard is acceptable in Pakistan. If a company's liquidity ratio is more than the above mentioned standard, that means condition of the company is not very good. If it has to pat its liabilities, its assets would not support it to pay its liabilities. The formula for calculating this ratio is as follows:

Debt Equity Ratio = Long term Liabilities $/$ Equity

## Current Ratio

Current ratio shows the proportion of current assets and current liabilities. This ratio should be 1:1. i-e. For every liability of one rupee, there should be an asset of one rupee to pay it. The formula for calculating this ratio is as follows:

Current Ratio $=$ Current Assets $/$ Current Liabilities

## Acid Test Ratio

Acid test ratio is the proportion of current assets which are convertible into cash and current liabilities. The formula for calculating this ratio is as follows:

Acid Test Ratio $=($ Current Assets - Stock $) /$ Current Liabilities

## Mark up Cover Ratio

This ratio shows the proportion of operating profit (Operating Profit before financial charges) and financial charges. This ratio is useful for bankers. If a company has taken loan and its financial charges are so large that all or a big part of profit is absorbed by financial charges, then how would a company repay its loans. The formula for calculating this ratio is as follows:

Mark up Cover Ratio = Operating Profit before financial charges / Financial charges
