

Question # 1 of 10 (Start time: 02:32:29 PM) Total Marks: 1

_____ also has the ability to explain the line of reasoning in reaching a particular solution, which _____ does not have.

Select correct option:

DSS, MIS

OLAP, KSS

KSS, DSS

GDSS, DSS

Question # 2 of 10 (Start time: 02:33:32 PM) Total Marks: 1

We can get help in non-routine decision making through _____

Select correct option:

KSS

TPS

MIS

DSS

Question # 3 of 10 (Start time: 02:34:27 PM) Total Marks: 1

Which of the following ethical system differs from secular ethical systems and from the moral code advocated by other religions

Select correct option:

Islamic

Christian

Hindu

Social

Question # 4 of 10 (Start time: 02:35:48 PM) Total Marks: 1

Manufacturing process involves more than one sub-process.

Select correct option:

True

False

Question # 5 of 10 (Start time: 02:36:25 PM) Total Marks: 1

_____ models represent its entities with an abstraction of lines, symbols or

shapes.

Select correct option:

Narrative

Physical

Mathematical

Graphical

Question # 6 of 10 (Start time: 02:36:56 PM) Total Marks: 1

The reports generated by the -----are used for analytical decision making by the

management.

Select correct option:

MIS

DSS

EIS

TIP

Question # 7 of 10 (Start time: 02:37:30 PM) Total Marks: 1

CBIS helps in updating every change being triggered in less time and with more effort.

Select correct option:

True

False

Question # 8 of 10 (Start time: 02:38:16 PM) Total Marks: 1

An information system that automatically generates report on regular basis and are not used

to monitor input or activities is called

Select correct option:

Open loop system

Closed loop system

Closed end System

Open system

Question # 9 of 10 (Start time: 02:39:03 PM) Total Marks: 1

Distributing common information to every one may result in waste of time and confusion.

Select correct option:

True

False

Question # 10 of 10 (Start time: 02:39:29 PM) Total Marks: 1

The information can also be ranked in accordance with the qualities it has.

Select correct option:

True

False

Instead of Information, data is more important in day to day decision making

True

False

Information technology is being used to overcome the business issues like, Marketing, Brand of the product, Quality of the product, Cost control, Organizational internal and external issues

True

False

Which of the following is a form of automation where computers communicate work instructions directly to the manufacturing machinery?

CAM Page#53

MCA

CNC

MRP

Level of _____ refers to the perfection in solution the model will achieve

Depletion

Optimization Page#39

Compression

Attenuation

_____ also has the ability to explain the line of reasoning in reaching a particular solution, which _____ does not have.

DSS, MIS

OLAP, KSS

KSS, DSS

GDSS, DSS

_____ are created for just one department

Data marks

Narrative data models

Data driven DSS

Graphical data models

Small organizations usually have complex management structure

True

False

Which of the following is a system that enables drawings to be constructed on a computer screen and subsequently stored, manipulated and updated electronically?

CDA

MRP

CAD

CNC

_____ is the set of interconnected structural elements that provide the framework for supporting the entire structure

Management system

Infrastructure

Decision support system

Transaction processing system

Closed System depends on _____ and data.

Internal resources

External resources

Procedures

Techniquial resources

The information can also be ranked in accordance with the qualities it has

True

False

Sources of information are generally categorized in different types depending on their originality and their proximity to the source or origin

True

False

We find the value of the inputs necessary to achieve a desired level of output in _____ analysis

What-if

Goal seek

Lexical

Business

Which of the following is a system that enables drawings to be constructed on a computer screen and subsequently stored, manipulated and updated electronically?

CDA

MRP

CAD

CNC

Which of the following subsystem gives a snapshot of statuses of various orders placed, at any given time?

Quality assurance sub-system

Order processing sub-system

Controlled processing sub-system

Concurrent processing sub-system

An _____ representation that illustrates the components or relationships of a phenomenon is called a model

Concrete

Actual

Abstract

Tangible

The practice of checking the impact of a change in the assumptions on the proposed solution is carried out in _____ analysis.

What-if

Goal seek

Lexical

Business

Which of the following is the specific collection of values and norms that are shared by people and groups in an organization and that control the way they interact with each other and with stakeholders outside the Organization

Organization culture Page#11

Structure

Management style

Decision making style

Medium Sized organizations are normally a family ownership run by

Father & son

Brothers

Both option a and b

None of the given options

The information from the system not used for control purpose called-----

Open loop system

Closed loop system

Open end system

Open and close system

The -----is an international, multilateral organization, which was created as a result of the Uruguay round of discussion in 1994 to harmonic world trade.

SAFTA

SAARC

WTO

None of above

There is a greater emphasis on models in case of _____

Kss

DSS

MIS

TPS

_____ are created for just one department.

Data marks

Narrative data models

Data driven DSS

Graphic data models

The set of _____ being discharged set the tone and structure of that department

Responsibilities

Rules

Laws

Process

Which of the following views organization as a combination of process oriented groups whose information needs are related but independent?

CBIS

MIS

DIS

OIS

_____ is the set of interconnected structural elements that provide the framework.

Infrastructure

System

Organization

Internet

_____ is the set of interconnected structural elements that provide the framework.

True

false

Continue change in work force is harmful for an organization

True

False

Which of the following have collection of predefined Procedures related to each other in a sequenced logical manner in order to collectively achieve the desired results.

Information system

System

organization

None of the above options

Information system must fulfill the needs of the -----

Customers

Business

Employee

Organization

Every decision we take in daily life requires some sort of information about the alternatives available.

True

False

(CBIS) stands for -----

Computer based information

In which of the following organizations all critical managerial positions are usually controlled by the family members

Medium size

Participative management style approach is a combination of both authoritative and mixed style

False

_____ also has the ability to explain the line of reasoning in reaching a particular solution, which _____ does not have.

Kss, Dss

Procedures are organized in a physical manner to form systems.

False

Data mining is also known as _____ in databases

Knowledge discovery Lesson#11

Which of the following is software based production planning and inventory control system for material procurement and scheduling.

MRP

Factors of -----are basic elements of reducing manufacturing cost

Production

_____ is the set of interconnected structural elements that provide the framework for supporting the entire structure

Infrastructure

The basic purpose behind setting up systems and procedures is to make available information when required

True

Page#18

An organization is defined by the elements that are part of it, its communication and its rules of action compared to outside events

True
