If u like me than raise your hand with me

If not then raise ur standard

That's about me ... !

Question # 1 of 10 (Start time: 09:09:19 AM) Total Marks: 1
The process of managing risks through developing a risk mitigation plan that predict, implement and maintain controls is referred as risk

_____.

Select correct option:

 Detection
 Planning
 Scrutiny
 Avoidance

Question # 2 of 10 (Start time: 09:10:44 AM) Total Marks: 1
In information security, integrity means that data cannot be modified undetectably
Select correct option:

 True
 False

Question # 3 of 10 (Start time: 09:12:12 AM) Total Marks: 1
Rectangle shape in the flow charts represents_____
Select correct option:

 Decision
 Process
 Terminator
 Relationship

Question # 4 of 10 (Start time: 09:12:55 AM) Total Marks: 1
Temporal CSFs in an organization, results from _____
Select correct option:

 Economic changes
 Technological changes

==Internal needs and changes==
Environmental changes

Question # 5 of 10 (Start time: 09:14:04 AM) Total Marks: 1
_____ factor is not considered during OO Design.
Select correct option:

==Encapsulation==
Usability
Information hiding
Confidentiality

Question # 6 of 10 (Start time: 09:15:24 AM) Total Marks: 1
Which one of the following is not classified as biometrics?
Select correct option:

==Digital Password==
Sound of your voice
Blood vessels in the retina of your eye
Finger Prints

Question # 7 of 10 (Start time: 09:15:59 AM) Total Marks: 1
Providing independent assurance to management regarding the
appropriateness of the security objectives is the responsibility of
_____.
Select correct option:

==Information systems auditors==
Data owners
Process owners
End users

Question # 8 of 10 (Start time: 09:17:13 AM) Total Marks: 1
The mechanism by which the more specific class in a generalization includes
the attributes and operations of general class is called ___
Select correct option:

Inheritance
Encapsulation
Polymorphism
Generalization

Question # 9 of 10 (Start time: 09:18:37 AM) Total Marks: 1
Which of the following is considered during OO Analysis?
Select correct option:

Concurrency
System behavior
Distribution
Persistence

Question # 10 of 10 (Start time: 09:20:03 AM) Total Marks: 1
Operations are usually called via _____
Select correct option:

Methods
Functions
Signatures
Interfaces

Question # 1 of 10 (Start time: 07:52:32 AM) Total Marks: 1
A schematic representation of a sequence of operations as in a
manufacturing process or computer program is called _____
Select correct option:

Flowchart
Entity relationship Diagram
Data flow diagram
Sequentioal Diagram

Question # 2 of 10 (Start time: 07:53:08 AM) Total Marks: 1

Object oriented analysis generates
Select correct option:

Conceptual model of Information
Implementation constraints
System Interfaces
Data requirement specifications

Question # 3 of 10 (Start time: 07:53:42 AM) Total Marks: 1
_____ has no way to replicate automatically
Select correct option:

Virus
Worm
Bug
Trojan horse

Question # 4 of 10 (Start time: 07:55:06 AM) Total Marks: 1
Software that is developed through OOAD is easy to test due to the use of
_____.
Select correct option:

Real time modeling
Usability features
Modular approach
Procedural approach

Question # 5 of 10 (Start time: 07:56:06 AM) Total Marks: 1
An association among entities is called Relation.
Select correct option:

True
False

Question # 6 of 10 (Start time: 07:56:29 AM) Total Marks: 1
Which of the following may attack executable programs?
Select correct option:

Viruses
Worms
Trojans
Sniffers

Question # 7 of 10 (Start time: 07:57:07 AM) Total Marks: 1
The Internet poses specific security problems because
Select correct option:

it was designed to be easily accessible
everyone uses it.
viruses cannot be controlled
it changes so fast.

Question # 8 of 10 (Start time: 07:57:24 AM) Total Marks: 1
A security program is a series of ongoing regular periodic reviews conducted
to ensure that assets associated with the information systems function are
safeguarded adequately.
Select correct option:

True
False

Question # 9 of 10 (Start time: 07:57:53 AM) Total Marks: 1
Both software objects and real time objects have _____
Select correct option:

Identity and behavior
Identity and state
Identity, state and behavior
State and behavior

The first step in a successful attack against availability or confidentiality of information may be the violation of _____.
Select correct option:

Completeness constraints
Consistency
Integrity
Reliability

_____ is/are an example of internal threat of the system.
Select correct option:

Virus
Bug
Worm
All of them

A fixed Internet address creates a prime target for hackers
Select correct option:

True
False

The use of software routines to tie up the computer hosting a Web site that denies legitimate visitor's access is called :
Select correct option:

denial of service
hacking.
Spoofing

Sniffing

Question # 4 of 10 (Start time: 08:02:55 AM) Total Marks: 1
A denial-of-service attack floods a Web site with so many requests for services that it slows down or crashes
Select correct option:

True
False

Question # 5 of 10 (Start time: 08:03:18 AM) Total Marks: 1
Internet provider is an example of technology provider.
Select correct option:

True
False

Question # 6 of 10 (Start time: 08:04:50 AM) Total Marks: 1
The first PC virus was a boot sector virus created in _____
Select correct option:

UK
USA
India
Pakistan

Question # 7 of 10 (Start time: 08:05:18 AM) Total Marks: 1
Inheritance can be defined in terms of _____
Select correct option:

Has kind of
Is based on
Is similar to
Is kind of

Question # 8 of 10 (Start time: 08:05:43 AM) Total Marks: 1

The main source of bugs in computer programs is the complexity of decision-making code.
Select correct option:

True
False

Question # 9 of 10 (Start time: 08:06:04 AM) Total Marks: 1
Connecting one segment with another we use _____.
Select correct option:

Decision box
Connector
Input/Output box
Process box

Question # 10 of 10 (Start time: 08:06:30 AM) Total Marks: 1
Testing is easy for the software that is developed using OOAD due to use of _____
Select correct option:

Real time modeling
Usability feature
Conceptual modeling
Modular approach

Question # 1 of 10 (Start time: 08:26:24 AM) Total Marks: 1
OECD stands for
Select correct option:

Organization of Electrical Computing Development
Organization for Economic Cooperation & Development
Organization of Engineers & Computer Developer
Organization of Economic Collaboration & Development

Question # 2 of 10 (Start time: 08:27:13 AM) Total Marks: 1
Dropper is an example of Trojans
Select correct option:

 True
 False

Question # 3 of 10 (Start time: 08:27:35 AM) Total Marks: 1
Which of the following activity consists of the discovery, modeling,
specification and evaluation of requirements?
Select correct option:

 Development
 Design
 Requirement
 Implementation

Question # 4 of 10 (Start time: 08:28:11 AM) Total Marks: 1
_____ refer to the sudden increase in power supply.
Select correct option:

 Sags
 Brown outs
 Spikes
 Black out

Question # 5 of 10 (Start time: 08:28:42 AM) Total Marks: 1
ERD shows a _____ relation between entities.
Select correct option:

 Secondary
 Derived
 Primary
 Multi valued

Question # 6 of 10 (Start time: 08:29:09 AM) Total Marks: 1
We use entity relatioship diagram in structured analysis & design
Select correct option:

 True
 False

Question # 7 of 10 (Start time: 08:29:36 AM) Total Marks: 1
The requirement of protecting information from improper modification is
termed as system and data _____.
Select correct option:

 Privacy
 Consistency
 Integrity
 Reliability

Question # 8 of 10 (Start time: 08:31:01 AM) Total Marks: 1
Which of the following is not considered during OO Design?
Select correct option:

 Concurrency factor
 Distribution factor
 Usability factor
 Persistence factor

Question # 9 of 10 (Start time: 08:31:34 AM) Total Marks: 1
Which of the following is true about "Entity"?
Select correct option:

 Entity may be any person, place, or thing about which someone is interested
to store data.

Entity may have attributes associated with it

Entities are normally mapped to Tables in relational database management systems.

All of above

Question # 10 of 10 (Start time: 08:31:58 AM) Total Marks: 1
Integrity means data and information are protected against authorized modification
Select correct option:

True
False

Question # 1 of 10 (Start time: 08:36:39 AM) Total Marks: 1
Providing access to the data and behavior is through an object's interface is called _____
Select correct option:

Polymorphism
Encapsulation
Message passing
Inheritance

Question # 2 of 10 (Start time: 08:37:05 AM) Total Marks: 1
Data travels across the internet through several levels of networks until it reaches its middle point.
Select correct option:

True
False

Question # 3 of 10 (Start time: 08:37:28 AM) Total Marks: 1

Process indicates:
Select correct option:

 Procedure
 Flow
 Activity
 Result

Question # 4 of 10 (Start time: 08:38:00 AM) Total Marks: 1
Customer feedback on any product is required for _____
Select correct option:

 Money factors
 Strategic relationship
 Intellectual capital
 Quality check

Question # 5 of 10 (Start time: 08:39:25 AM) Total Marks: 1
Confidentiality & availability have same meaning while considering the security of Information Systems
Select correct option:

 False
 True

Question # 6 of 10 (Start time: 08:39:46 AM) Total Marks: 1
A denial-of-service attack floods a Web site with so many requests for services that it slows down or crashes
Select correct option:

 True
 False

Question # 7 of 10 (Start time: 08:40:11 AM) Total Marks: 1

Which of the following is a program not a virus but it installs a virus on the PC while performing another function?
Select correct option:

Dropper
Trojans
worm
None of above options

Question # 8 of 10 (Start time: 08:40:34 AM) Total Marks: 1
Temporal CSFs in an organization, results from _____
Select correct option:

Economic changes
Technological changes
Internal needs and changes
Environmental changes

Question # 9 of 10 (Start time: 08:41:23 AM) Total Marks: 1
Information systems auditors can be different from security auditors
Select correct option:

True
False

Question # 10 of 10 (Start time: 08:41:42 AM) Total Marks: 1
There has to be a relationship between two entities
Select correct option:

True
False

Question # 1 of 10 (Start time: 08:45:59 AM) Total Marks: 1
Which of the following is not considered during OO Design?
Select correct option:

 Concurrency factor
 Distribution factor
 Usability factor
 Persistence factor

Question # 2 of 10 (Start time: 08:46:22 AM) Total Marks: 1
While developing software object oriented analysis focuses on _____
Select correct option:

 Incremental approach
 Modular approach
 Traditional approach
 Derived approach

Question # 3 of 10 (Start time: 08:46:44 AM) Total Marks: 1
Rectangle shape in the flow charts represents_____
Select correct option:

 Decision
 Process
 Terminator
 Relationship

Question # 4 of 10 (Start time: 08:47:20 AM) Total Marks: 1
A sniffer forges the return address of an e-mail so that the e-mail message
appears to come from someone other than the sender.
Select correct option:

 True
 False

Question # 5 of 10 (Start time: 08:47:42 AM) Total Marks: 1
_____ refer to the sudden increase in power supply.

Select correct option:

 Sags
 Brown outs
 Spikes
 Black out

Question # 6 of 10 (Start time: 08:48:08 AM) Total Marks: 1
We use entity relatioship diagram in structured analysis & design
Select correct option:

 True
 False

Question # 7 of 10 (Start time: 08:48:28 AM) Total Marks: 1
If a flow chart become complex it is better to use connector symbols to
reduce to number of flow lines.
Select correct option:

 True
 False

Question # 8 of 10 (Start time: 08:48:48 AM) Total Marks: 1
Which of the following is not same as key performance indicator or KPI.
Select correct option:

 CSF
 PIN
 Both options a and b
 None of them

Question # 9 of 10 (Start time: 08:49:13 AM) Total Marks: 1
A denial-of-service attack floods a Web site with so many requests for
services that it slows down or crashes
Select correct option:

==**True**==
False

Question # 10 of 10 (Start time: 08:49:33 AM) Total Marks: 1
The first PC virus was a boot sector virus created in _____
Select correct option:

UK
USA
India
==**Pakistan**==

Question # 1 of 10 (Start time: 08:52:39 AM) Total Marks: 1
A language mechanism for restricting access to some of the object's components is known as:
Select correct option:

Object hiding
Object Encapsulation
Polymorphism
Object inheritance

Question # 2 of 10 (Start time: 08:53:25 AM) Total Marks: 1
In case of logical intrusion, the intruder might be trying to have an unauthorized access to the system
Select correct option:

==**True**==
False

Question # 3 of 10 (Start time: 08:53:52 AM) Total Marks: 1
We have to secure our systems in such fashion that possibilities of having bugs are reduced

Select correct option:

<mark>True</mark>
False

Question # 4 of 10 (Start time: 08:54:27 AM) Total Marks: 1
Which of the following assigns overall responsibility for the security of information?
Select correct option:

Security Professionals
<mark>Executive Management</mark>
Data Owners
Option a and b

Question # 5 of 10 (Start time: 08:54:52 AM) Total Marks: 1
A fixed Internet address creates a prime target for hackers
Select correct option:

<mark>True</mark>
False

Question # 6 of 10 (Start time: 08:55:13 AM) Total Marks: 1
Information systems auditors can be different from security auditors
Select correct option:

<mark>True</mark>
False

Question # 7 of 10 (Start time: 08:55:35 AM) Total Marks: 1
Which of the following activity consists of the discovery, modeling, specification and evaluation of requirements?
Select correct option:

<mark>Development</mark>
 Design
 Requirement
 Implementation

Question # 8 of 10 (Start time: 08:56:00 AM) Total Marks: 1
Tricking people into revealing their password by pretending to be legitimate
users or members of a company in need of information is called
Select correct option:

 <mark>Social Engineering</mark>
 Snooping
 Spoofing
 Spamming

Question # 9 of 10 (Start time: 08:56:21 AM) Total Marks: 1
Arrow is also called _____
Select correct option:

 Dotted line
 Process
 <mark>Flow line</mark>
 Link line

Question # 10 of 10 (Start time: 08:56:47 AM) Total Marks: 1
_____ is/are an example of internal threat of the system.
Select correct option:

 Virus
 <mark>Bug</mark>
 Worm
 All of them

Question # 1 of 10 (Start time: 09:05:35 AM) Total Marks: 1

After the process of risk assessment has been completed, the next process is that of risk _____.
Select correct option:

 Detection
 Criticality analysis
 Scrutiny
 Mitigation

_____ refer to the sudden increase in power supply.
Select correct option:

 Sags
 Brown outs
 Spikes
 Black out

Trojan is an example of Virus
Select correct option:

 True
 False

There are three approaches of system analysis & design
Select correct option:

 True
 False

A well designed system also helps in early detection of problems in critical areas.
Select correct option:

True
False

Question # 6 of 10 (Start time: 09:07:34 AM) Total Marks: 1
Sasser, Netsky, and Sobig are all classified as:
Select correct option:

DoS viruses
Worm viruses
Virus hoaxes
Trojan horses

Question # 7 of 10 (Start time: 09:08:02 AM) Total Marks: 1
DFD's should not have black holes, gray holes & miracles.
Select correct option:

True
False

Question # 8 of 10 (Start time: 09:08:25 AM) Total Marks: 1
Which of the following is a program not a virus but it installs a virus on the PC while performing another function?
Select correct option:

Dropper
Trojans
worm
None of above options

Question # 9 of 10 (Start time: 09:08:50 AM) Total Marks: 1
The purpose of data flow diagrams is to provide a --------- between users and systems developers

Select correct option:

Linking bridge
Empty space
Data Flows
Connection link

Question # 10 of 10 (Start time: 09:09:43 AM) Total Marks: 1
Which of the following is a data model or diagram for high-level descriptions of conceptual data model.
Select correct option:

ERD
Flow Chart
logical diagram
DFD

Question # 1 of 10 (Start time: 09:11:19 AM) Total Marks: 1
The requirement of protecting information from improper modification is termed as system and data _____.
Select correct option:

Privacy
Consistency
Integrity
Reliability

Question # 2 of 10 (Start time: 09:12:36 AM) Total Marks: 1
Providing independent assurance to management regarding the appropriateness of the security objectives is the responsibility of _____.
Select correct option:

Information systems auditors
Data owners
Process owners
End users

Question # 3 of 10 (Start time: 09:13:49 AM) Total Marks: 1
Which of the following is a private enterprise owned communication network that uses internet protocols.
Select correct option:

Wireless communication
Intranet
Internet
None of above

Question # 4 of 10 (Start time: 09:14:15 AM) Total Marks: 1
In case of logical intrusion, the intruder might be trying to have an unauthorized access to the system
Select correct option:

True
False

Question # 5 of 10 (Start time: 09:14:36 AM) Total Marks: 1
Object oriented analysis focuses on the _____
Select correct option:

Implementation of objects
States of objects
Identity of objects
Collaboration of objects

Question # 6 of 10 (Start time: 09:15:13 AM) Total Marks: 1
ERD shows a _____ relation between entities.
Select correct option:

Secondary
Derived
Primary
Multi valued

Question # 7 of 10 (Start time: 09:15:34 AM) Total Marks: 1
Which of the following is an expression of an intention to inflict pain, injury, evil or punishment, and an indication of impending danger or harm?
Select correct option:

 Intrusion
 Damage
 Threat
 None of these options

Question # 8 of 10 (Start time: 09:15:54 AM) Total Marks: 1
The first PC virus was a boot sector virus created in _____
Select correct option:

 UK
 USA
 India
 Pakistan

Question # 9 of 10 (Start time: 09:16:12 AM) Total Marks: 1
We use entity relatioship diagram in structured analysis & design
Select correct option:

 True
 False

Question # 10 of 10 (Start time: 09:16:34 AM) Total Marks: 1
A fixed Internet address creates a prime target for hackers
Select correct option:

 True
 False

Question # 1 of 10 (Start time: 09:20:47 AM) Total Marks: 1
Different levels and types of --------------------- may be required to address the risks to information

Select correct option:

 Security

 Authenticity

 Integrity

 None of any options

Question # 2 of 10 (Start time: 09:21:24 AM) Total Marks: 1
KPI measures the _____
Select correct option:

 Achievements

 Sales

 Risk factor

 Internal changes

Question # 3 of 10 (Start time: 09:21:48 AM) Total Marks: 1
Null is a blank read as zero value.
Select correct option:

 True

 False

Question # 4 of 10 (Start time: 09:22:08 AM) Total Marks: 1
Worms can destroy data and programs as well as disrupt or even halt the
operation of computer networks.
Select correct option:

 True

 False

Question # 5 of 10 (Start time: 09:23:33 AM) Total Marks: 1
Object oriented design elaborates the hardware and software architecture
to produce _____
Select correct option:

Functional specifications
Implementation specifications
Testing specifications
Modeling specifications

Question # 6 of 10 (Start time: 09:23:55 AM) Total Marks: 1
Which of the following assigns overall responsibility for the security of information?
Select correct option:

Security Professionals
Executive Management
Data Owners
Option a and b

Question # 7 of 10 (Start time: 09:24:16 AM) Total Marks: 1
Sasser, Netsky, and Sobig are all classified as:
Select correct option:

DoS viruses
Worm viruses
Virus hoaxes
Trojan horses

Question # 8 of 10 (Start time: 09:24:37 AM) Total Marks: 1
Due to unauthorized changes in data, its _____ is lost.
Select correct option:

Sharing
Consistency
Integrity
Redundancy

Question # 9 of 10 (Start time: 09:25:02 AM) Total Marks: 1
There are three approaches of system analysis & design
Select correct option:

True
False

Question # 10 of 10 (Start time: 09:25:19 AM) Total Marks: 1
Which of the following view gives a quick understanding of the business processes and flows?
Select correct option:

Procedural
Abstract
Internal
Diagrammatic

Question # 1 of 10 (Start time: 09:30:58 AM) Total Marks: 1
In information security, integrity means that data cannot be modified undetectably
Select correct option:

True
False

Question # 2 of 10 (Start time: 09:31:27 AM) Total Marks: 1
_____helps organization in gaining competitive advantage in the use of processes, effectiveness and efficiency.
Select correct option:

BPR
CSF
MIS
SPR

Question # 3 of 10 (Start time: 09:31:53 AM) Total Marks: 1
Customer feedback on any product is required for _____
Select correct option:

Money factors

Strategic relationship

Intellectual capital

Quality check

Question # 4 of 10 (Start time: 09:32:51 AM) Total Marks: 1

The use of software routines to tie up the computer hosting a Web site that denies legitimate visitor's access is called :

Select correct option:

denial of service

hacking.

Spoofing

Sniffing

Question # 5 of 10 (Start time: 09:33:21 AM) Total Marks: 1

Entity represents sources of data received by the system or destinations of the data produced by the system.

Select correct option:

True

False

Question # 6 of 10 (Start time: 09:33:54 AM) Total Marks: 1

In flow chart diagram circle represents:

Select correct option:

Process

Connector

Decision

Diamond

Question # 7 of 10 (Start time: 09:35:24 AM) Total Marks: 1

Measuring technical assessment of a computing system is known as:
Select correct option:

security plan
security measures
security audit
security lapse

Question # 8 of 10 (Start time: 09:35:53 AM) Total Marks: 1
Both software objects and real time objects have_____
Select correct option:

Identity and behavior
Identity and state
State and behavior
Attribute and property

Question # 9 of 10 (Start time: 09:37:20 AM) Total Marks: 1
Which one of the following is not classified as biometrics?
Select correct option:

Digital Password
Sound of your voice
Blood vessels in the retina of your eye
Finger Prints

Question # 10 of 10 (Start time: 09:38:38 AM) Total Marks: 1
_____ refer to the sudden increase in power supply.
Select correct option:

Sags
Brown outs
Spikes
Black out
Question # 1 of 10 (Start time: 09:43:35 AM) Total Marks: 1

Which of the following are responsible for providing independent assurance to management on the appropriateness of the security objectives?
Select correct option:

Information Systems Auditors
Executive Management
Security Managers
Data owners

Question # 2 of 10 (Start time: 09:44:40 AM) Total Marks: 1
A threat is some action or event that cannot lead to a loss
Select correct option:

False
True

Question # 3 of 10 (Start time: 09:45:11 AM) Total Marks: 1
Confidentiality & availability have same meaning while considering the security of Information Systems
Select correct option:

False
True

Question # 4 of 10 (Start time: 09:45:32 AM) Total Marks: 1
We have to secure our systems in such fashion that possibilities of having bugs are reduced
Select correct option:

True
False

Question # 5 of 10 (Start time: 09:45:53 AM) Total Marks: 1
_____ time is saved through an error free designed system.
Select correct option:

Deployment
Development
Configuration
Testing

Question # 6 of 10 (Start time: 09:46:22 AM) Total Marks: 1
Polymorphism can be defined in terms of _____
Select correct option:

Having inherited features
Having many forms
Having private data
Having direct access to system

Question # 7 of 10 (Start time: 09:46:45 AM) Total Marks: 1
Tricking people into revealing their password by pretending to be legitimate
users or members of a company in need of information is called
Select correct option:

Social Engineering
Snooping
Spoofing
Spamming

Question # 8 of 10 (Start time: 09:47:08 AM) Total Marks: 1
A _____ internet address creates a prime target for hackers.
Select correct option:

fixed
variable
subnet
changeable

Question # 9 of 10 (Start time: 09:47:39 AM) Total Marks: 1

The study of business problem domain used to recommend improvements and specify the business Requirements for the solution is called:
Select correct option:

System Analysis
System Design
Risk Management
Risk Analysis

Which of the following is the outcome of Object Oriented analysis?
Select correct option:

System interfaces
Integrity constraints
Completeness constraints
System's conceptual model

A language mechanism for restricting access to some of the object's components is known as:
Select correct option:

Object hiding
Object Encapsulation
Polymorphism
Object inheritance

An object can be defined as _____
Select correct option:

Abstraction
Constraint
Method
Class

Question # 3 of 10 (Start time: 09:52:29 AM) Total Marks: 1
In the context of information security, data cannot be modified without authorization is known as _____.
Select correct option:

user's rights
privileges
integrity
privacy

Question # 4 of 10 (Start time: 09:52:51 AM) Total Marks: 1
In flow chart terminator indicates from where the process starts & where its end.
Select correct option:

True
False

Question # 5 of 10 (Start time: 09:53:11 AM) Total Marks: 1
Entity represents sources of data received by the system or destinations of the data produced by the system.
Select correct option:

True
False

Question # 6 of 10 (Start time: 09:53:34 AM) Total Marks: 1
A category of objects _____ the same attributes, operations and relationships.
Select correct option:

Inherit
Share
Collaborate
Use

Question # 7 of 10 (Start time: 09:53:55 AM) Total Marks: 1
The main focus of Object Oriented analysis is to study the _____ of objects.
Select correct option:

Collaboration
State
Implementation
Sequence

Question # 8 of 10 (Start time: 09:54:18 AM) Total Marks: 1
Characteristics of object are called _____
Select correct option:

Methods
Status
Attributes
Instances

Question # 9 of 10 (Start time: 09:54:41 AM) Total Marks: 1
Which of the following is not considered during OO Design?
Select correct option:

Concurrency factor

Distribution factor
Usability factor
Persistence factor

Question # 10 of 10 (Start time: 09:55:14 AM) Total Marks: 1
Due to unauthorized changes in data, its _____ is lost.
Select correct option:

Sharing
Consistency
Integrity
Redundancy

Question # 1 of 10 (Start time: 10:06:54 AM) Total Marks: 1
Entity represents sources of data received by the system or destinations of
the data produced by the system.
Select correct option:

True
False

Question # 2 of 10 (Start time: 10:07:25 AM) Total Marks: 1
According to "Booch", object has following three components
Select correct option:

State, Behavior, Identity
State, Behavior, Interface
State, Interface, methods
State, Variables, Methods

Question # 3 of 10 (Start time: 10:07:48 AM) Total Marks: 1
In flow chart diagram circle represents:
Select correct option:

Process
Connector
Decision
Diamond

Question # 4 of 10 (Start time: 10:08:30 AM) Total Marks: 1
Worms can destroy data and programs as well as disrupt or even halt the operation of computer networks.
Select correct option:

True
False

Question # 5 of 10 (Start time: 10:09:14 AM) Total Marks: 1
Object oriented analysis focuses on the_____
Select correct option:

Implementation of objects
States of objects
Identity of objects
Collaboration of objects

Question # 6 of 10 (Start time: 10:09:39 AM) Total Marks: 1
Object oriented design elaborates the hardware and software architecture to produce _____
Select correct option:

Functional specifications
Implementation specifications
Testing specifications

Modeling specifications

Question # 7 of 10 (Start time: 10:10:02 AM) Total Marks: 1
ERD shows a _____ relation between entities.
Select correct option:

Secondary
Derived
Primary
Multi valued

Question # 8 of 10 (Start time: 10:10:17 AM) Total Marks: 1
Which of the following is an expression of an intention to inflict pain, injury,
evil or punishment, and an indication of impending danger or harm?

Select correct option:

user's rights
privileges
==integrity==
privacy

Question # 2 of 10 (Start time: 10:25:59 AM) Total Marks: 1
A _____ internet address creates a prime target for hackers.
Select correct option:

==fixed==
variable
subnet
changeable

Question # 3 of 10 (Start time: 10:26:27 AM) Total Marks: 1
Risk identification is often confused with risk mitigation
Select correct option:

==True==
False

Question # 4 of 10 (Start time: 10:26:53 AM) Total Marks: 1
Inheritance can be defined in terms of _____
Select correct option:

Has kind of
Is based on
Is similar to
==Is kind of==

Question # 5 of 10 (Start time: 10:27:15 AM) Total Marks: 1
Connecting one segment with another we use _____.
Select correct option:

 Decision box
 Connector
 Input/Output box
 Process box

Question # 6 of 10 (Start time: 10:27:40 AM) Total Marks: 1
_____are the key people who will have to ensure that security is
effective and smoothly operated
Select correct option:

 IS security professionals
 executive management
 technology providers
 users

Question # 7 of 10 (Start time: 10:28:07 AM) Total Marks: 1
A well designed system also helps in early detection of problems in critical
areas.
Select correct option:

 True
 False

Question # 8 of 10 (Start time: 10:28:30 AM) Total Marks: 1
Confidentiality & availability have same meaning while considering the
security of Information Systems
Select correct option:

 False
 True

Question # 9 of 10 (Start time: 10:28:51 AM) Total Marks: 1
