Computer Grade 8 MCQs

Subject Name: Eight/Computer 8

I) Tick the Correct Option:

(All questions / options - 100 / 0) 0 Marks

1. McAfee is the name of:			
a) An antivirus program	b) A computer program	c) A computer hardware	d) A game
Correct Answer An antivirus program			
2. The value which is given at the timing of creating a program called as:			
a) Expression	b) Constant	c) Equation	d) None of these
Correct Answer Expression			
3. comparison operators are also known as :			
a) Relational	b) Assignment	c) Arithmetic	d) None of these
Correct Answer Arithmetic			
4. To share a peripheral device we attach to it.			
a) A computer	b) A telephone	c) A computer network	d) A monitor
Correct Answer A computer network			
5. Norton Antivirus software developed by:			
a) McAfee	b) Symantec	c) AVG	d) NORTAN
Correct Answer NORTAN			
6. Companies that are writing antivirus software:			
a) McAfee	b) Symantec	c) AVG	d) All of them
Correct Answer All of them			
7. Which of the following tasks are performed by most of the algorithms:			
a) Input	b) Output	c) Processing	d) All of the above
Correct Answer All of the above			

8. The uppermost bar in spreadsheet is:			
a) Tool bat	b) Menu Bar	c) Title barNo	
Correct Answer Tool bat			
9. A program or a set of programs that causes extensive damage to your computer called:			
a) Extensive Program	b) Bacteria	c) Virus	d) All of these
Correct Answer Virus			
10. The computer virus spread from:			
a) a sick person	b) a person who is suffering from malarial	c) someone who is suffering from common cold	d) One computer to another computer by copying itself
Correct Answer One computer to another computer by copying itself			
11. A string constant is a sequence of			
a) Numeric characters	b) Alphanumeric Characters	c) Alphabetic characters	d) None of the above
Correct Answer Alphanumeric Characters			
12. The oldest services for sending data over a cellular communication network is know as.			
a) Cellular telephone sets	b) Satellite telephon	c) Cellular digital packet data	d) A geostationary satellie
Correct Answer Cellular digital packet data			
13. The computer used a a server, controls access to the.			
a) New computer networks	b) Internet and telephone	c) Hardware software and other devices on the network	d) Modern and old modals
Correct Answer Hardware software and other devices on the network			
14. The character used for integer variable is:			
a) %	b) !	c) &	d) None of the above
Correct Answer %			
15. Different types of viruses found in:			
a) Unknown	b) New Websites	c) Insecure	d) CMS Websites

websites	websites		
Correct Answer Unknown websites			
16. A cell address is the basic unit for data:			
a) Storing	b) Deleting	c) Inserting	d) None of these
Correct Answer Storing			
17. For editing the data in active cell we press:			
a) F2	b) F4	c) F9	d) F1
Correct Answer F2			
18. In GW-BASIC every program ends with:			
a) String	b) Variable	c) Constant	d) None of the above
Correct Answer String			
19. The intersection of column C and Row 5 has the address:			
a) 5C	b) C5	c) C1-5	d) C5-1
Correct Answer C5			
20. Basic was developed by:			
a) John smith	b) Pascal	c) John Kemeny and Thomas Kurtz	d) None of the above
Correct Answer John Kemeny and Thomas Kurtz			
21. Any electronic device that is used to receive data called as.			
a) Monitor	b) Input device	c) Telephone	d) Receiving device
Correct Answer Receiving device			
22. What is the cell address and cell range?			
23. The total number of basic relational operators are:			
a) four	b) six	c) eight	d) ten
Correct Answer six			
24. The servers on a network that performs only one specific task called.			
a) Special servers	b) Client	c) Dedicated servers	d) Internet computer
Correct Answer			

Dedicated servers

25. The symbol for relational operators for equal to is:

- | | | | |
|----|------|------|--------|
| a) | b) > | c) = | d) < = |
|----|------|------|--------|

Correct Answer

=

26. In flow chart all necessary requirements should be listed in:

- | | | | |
|--------------------|-------------------------|--------------|-----------------|
| a) a logical order | b) a alphabetical order | c) a problem | d) strange form |
|--------------------|-------------------------|--------------|-----------------|

Correct Answer

a logical order

27. In cellular communication the bands of radio spectrum used are.

- | | | | |
|--------------------------------------|--------------------------------------|--------------------------------------|--------------------------------------|
| a) 324 to 349 MHz and 269 to 294 MHz | b) 424 to 449 MHz and 469 to 894 MHz | c) 524 to 549 MHz and 569 to 594 MHz | d) 824 to 849 MHz and 869 to 894 MHz |
|--------------------------------------|--------------------------------------|--------------------------------------|--------------------------------------|

Correct Answer

824 to 849 MHz and 869 to 894 MHz

28. A constant can be:

- | | | | |
|------------------|---------------|----------------------|----------------------|
| a) Long or Short | b) New or old | c) Numeric or string | d) None of the above |
|------------------|---------------|----------------------|----------------------|

Correct Answer

Long or Short

29. The relational operator for greater than and equal to is:

- | | | | |
|----|--------|------|----------------------|
| a) | b) > = | c) > | d) None of the above |
|----|--------|------|----------------------|

Correct Answer

> =

30. The simplest form of algorithm is:

- | | | | |
|----------------------------|------------------------|------------------------------|---------|
| a) complete form algorithm | b) step form algorithm | c) particular form algorithm | d) None |
|----------------------------|------------------------|------------------------------|---------|

Correct Answer

step form algorithm

31. The symbol represents:

- | | | | |
|----------|--------|----------|---------|
| a) Start | b) End | c) Input | d) None |
|----------|--------|----------|---------|

Correct Answer

Start

32. When we press the enter key after completion of data entry the cursor:

- | | | | |
|----------|-------------|-------------|-------------------------------------|
| a) Stops | b) vanishes | c) vibrates | d) automatically moves to next cell |
|----------|-------------|-------------|-------------------------------------|

Correct Answer

automatically moves to next cell

33. The diamond symbol represents the:

a) Decision making

b) Input

c) Output

d) Processing

Correct Answer

Decision making

34. The Global positioning system is a.

a) Central switching station

b) Radio navigation sytem

c) Cellular communication

d) Central position station

Correct Answer

Radio navigation sytem

35. Total types of modem are.

a) 2

b) 3

c) 4

d) 5

Correct Answer

3

36. MS excel is a:

a) Spreadsheet software

b) Database software

c) Application software

d) System Software

Correct Answer

Spreadsheet software

37. The worms does not spread from file to file but from:

a) Internet to computer

b) file to computer

c) virus to virus

d) computer to computer

Correct Answer

computer to computer

38. Spreadsheet in office is used for:

a) Arranging data and storing information

b) Gathering data and printing

c) Gathering data and saving

d) None of these

Correct Answer

Arranging data and storing information

39. GPS stand for.

a) Global positioning system

b) Grand positioning system

c) Great position system

d) Globalization positioning system

Correct Answer

Global positioning system

40. In GW -BASIC variables can be used without:

a) line number	b) number	c) declaration	d) strings
Correct Answer declaration			
41. In GW-BASIC the command LOAD is used :			
a) Load a program file from disk to main memory	b) Clear screen	c) Save the program to disk	d) none of these
Correct Answer Load a program file from disk to main memory			
42. The satellite that remain stationary approximately 23300 miles above the earth called as.			
a) Communication satellite	b) Television satellite	c) Geostationary satellite	d) Nuclear stations
Correct Answer Geostationary satellite			
43. The operator that is used to compare two values is called:			
a) Assignment operator	b) Relational operator	c) Equal operator	d) None of the above
Correct Answer Relational operator			
44. In cellular communication a geographical area is divided.			
a) In wide area network	b) into a LAN	c) Wifi networks	d) Into a grid
Correct Answer Into a grid			
45. The formula for multiplication in excel is:			
a) A1 * A2	b) =A1 * A2	c) MUL(A1 : A2)	d) None of these
Correct Answer =A1 * A2			
46. A computer virus written in a:			
a) Computer language	b) Human language	c) Binary language	d) English language
Correct Answer Computer language			
47. In a computer the most valuable thing is its:			
a) processor	b) hard disk	c) ram	d) data
Correct Answer data			
48. For start in a flow chart we use the symbol:			

a)	b)	c)	d) None of the above
Correct Answer			
49. Symantec is the registered name of:			
a) A hacker	b) a virus	c) An antivirus	d) None of these
Correct Answer			
An antivirus			
50. In a computer the thing that damages tehe data most is:			
a) a virus	b) to shut down computer without saving	c) not save data every two seconds	d) not to let computer takes rest after every 10 minutes
Correct Answer			
a virus			
51. In GW- BASIC every program must begin with :			
a) String	b) Variable	c) Line number	d) END statement
Correct Answer			
String			
52. Programming languages are:			
a) Binary Language	b) Computer language	c) Low level language	d) None of the above
Correct Answer			
Computer language			
53. We can open MS Excel from:			
a) My computer	b) Recycle bin	c) Start menu	d) Documents
Correct Answer			
Start menu			
54. The shortcut key for paste the data is:			
a) Ctrl + v	b) Alt + V	c) Ctrl + y	d) None of these
Correct Answer			
Ctrl + v			
55. The operator that is used to assign a value to a variable:			
a) + operator	b) - operator	c) = operator	d) No
Correct Answer			
= operator			
56. Most common devices used to transfer data between computers known as:			
a) A floppy disk	b) USB Flash drive	c) Hard disk	d) CDs
Correct Answer			

USB Flash drive

57. The types of computer architecture or network model are.

- | | | | |
|------|------|------|------|
| a) 1 | b) 2 | c) 3 | d) 4 |
|------|------|------|------|

Correct Answer

2

58. A command which is used to exit from GW-BASIC and return to operate system environment:

- | | | | |
|-----------|---------|---------|----------------------|
| a) SYSTEM | b) SAVE | c) LIST | d) None of the above |
|-----------|---------|---------|----------------------|

Correct Answer

SYSTEM

59. An error caused by wrong syntax written in program is called:

- | | | | |
|------------------|-----------------|------------------|---------------|
| a) Logical error | b) Syntax error | c) Runtime error | d) Data error |
|------------------|-----------------|------------------|---------------|

Correct Answer

Syntax error

60. A signal that has finite number of values between its minimum and maximum possible value called as.

- | | | | |
|-------------------|------------------|------------------|-----------------|
| a) Digital signal | b) Analog signal | c) Simple signal | d) Short signal |
|-------------------|------------------|------------------|-----------------|

Correct Answer

Digital signal

61. The geostationary satellite are used as.

- | | | | |
|---------------------|-----------------------|-------------------|------------------|
| a) Computer network | b) Television network | c) Relay stations | d) Radio station |
|---------------------|-----------------------|-------------------|------------------|

Correct Answer

Relay stations

62. A flow chart is the pictorial representation of:

- | | | | |
|-----------------|-----------------------|-----------------|---------|
| a) a flow chart | b) a computer program | c) an algorithm | d) None |
|-----------------|-----------------------|-----------------|---------|

Correct Answer

an algorithm

63. In Microsoft excel we can fill data automatically in different cell with:

- | | | | |
|------------|-------------|---------------|----------------|
| a) Formula | b) Function | c) Equal Sign | d) Fill Handle |
|------------|-------------|---------------|----------------|

Correct Answer

Fill Handle

64. The * operator is used for:

- | | | | |
|-------------------|-------------|----------------|-------------|
| a) Multiplication | b) Addition | c) Subtraction | d) Division |
|-------------------|-------------|----------------|-------------|

Correct Answer

Multiplication

65. Example of communication devices are.

a) Modem, NIC, router	b) NIC, switch, printer	c) Network card, scanner, router	d) Modem, Bluetooth, bouter
Correct Answer Modem, NIC, router			
66. Status bar shows the:			
a) figures of rows	b) figures of columns	c) Alphabet rows	d) Basic information about the status of the spreadsheet
Correct Answer Basic information about the status of the spreadsheet			
67. The satellite remains in the space almost.			
a) 23300 miles above the earth	b) 2300 miles above the earth	c) 2000 miles above the earth	d) 200 miles above the earth
Correct Answer 23300 miles above the earth			
68. A compiler converts all the source code into machine code creating an:			
a) source code	b) executable file	c) inside copy	d) None of the above
Correct Answer executable file			
69. Modem is an abbreviation of.			
a) Module/Demodule	b) Modulator/Demodulator	c) Mode/Demode	d) Modulation/Demodulation
Correct Answer Modulator/Demodulator			
70. After writing a program in source code the programmer convert it into:			
a) Program file	b) Save file	c) Machine code	d) None of the above
Correct Answer Machine code			
71. The clients on a network send requests to a.			
a) Modem	b) Server	c) Router	d) Switch
Correct Answer Server			
72. A statement which is used to get data from the user during the execution of program is:			
a) INPUT	b) PRINT	c) LIST	d) LOAD
Correct Answer INPUT			
73. The effective range of Bluetooth device is.			
a) 10 feet	b) 32 feet	c) 10 miles	d) 32 meters

Correct Answer 32 feet			
74. The maximum length of string constant is:			
a) 55 Characters	b) 155 characters	c) 255 characters	d) None of the above
Correct Answer 255 characters			
75. A formula is a:			
a) Mathematical Expression	b) Mathematical data	c) Mathematical information	d) None of these
Correct Answer Mathematical Expression			
76. After designing our algorithm we verify it through:			
a) Flow chart	b) Comparison	c) Processing	d) Desk Checking
Correct Answer Desk Checking			
77. A constant is a quality whose value cannot be:			
a) Read	b) Printed	c) Changed	d) memorized
Correct Answer Changed			
78. 1 s and 0 s called:			
a) Numbers	b) Arithmetic	c) Binary Number system	d) none of these
Correct Answer Binary Number system			
79. 1,2,3 shows the name of:			
a) Rows	b) Columns	c) Cells	d) None of these
Correct Answer Rows			
80. Which of the following operators processed first:			
a) ^ (Exponent)	b) Multiplication or Division	c) MOD (Modulus)	d) None of the above
Correct Answer ^ (Exponent)			
81. The satellite communication consists of			
a) Several microwave mediums	b) Several radio wave communication	c) Earth stations and a satellite	d) Many users of televisions

Correct Answer

Earth stations and a satellite

82. Mr. Arthur C. Clark gave the idea of.

a) GPS technology

b) Satellite technology

c) Cellular technology

d) Bluetooth technology

Correct Answer

Satellite technology

83. In cellular communication each section of this grid is a king of.

a) Network

b) Area

c) Cell

d) Telephone

Correct Answer

Cell

84. In GW-BASIC the command RUN is used to:

a) Compile a program

b) Execute the program

c) Save the program on disk

d) None of the above

Correct Answer

Execute the program

85. Coaxial cable used in.

a) WLAN

b) LAN

c) WAN

d) PAN

Correct Answer

LAN

86. Antivirus can protect computer by:

a) Updating and Scanning

b) installing and scanning

c) Shutdown and net browsing

d) Installing and shutdown

Correct Answer

Updating and Scanning

87. At the right hand of the worksheet on vertical side is the:

a) Vertical scroll

b) Cell address

c) Tool bar

d) Formula bar

Correct Answer

Vertical scroll

88. For End in a flow chart we use the symbol:

a)

b)

c)

d)

Correct Answer

89. Each MS-Excel file carries extension:

a) Excel

b) .xcl

c) .xlsx

d) .xdl

Correct Answer

.xlsx

90. A group of adjacent cells in a worksheet is called:

a) Ranfge	b) values	c) Label	d) Data
-----------	-----------	----------	---------

Correct Answer
values

91. The virus like malicious programs that read e-mail addresses and automatically send email to all addresses is called:

a) Tragon horse	b) macro virus	c) worms	d) adware
-----------------	----------------	----------	-----------

Correct Answer
worms

92. Spreadsheet use ----- to express relationship of two or more cells:

a) Formulas	b) Symbols	c) Commands	d) Sheets
-------------	------------	-------------	-----------

Correct Answer
Formulas

93. A maximum numbers of characters can be used for naming a cell or a range:

a) 255	b) 259	c) 260	d) 275
--------	--------	--------	--------

Correct Answer
255

94. How many steps are involving to solve a problem:

a) Three	b) Five	c) Four	d) Six
----------	---------	---------	--------

Correct Answer
Five

95. The symbol used for relational operator in computer in computer programming:

a) /	b) =	c) < >	d) *
------	------	--------	------

Correct Answer
< >

96. SQL slammer is an example of:

a) Antivirus	b) Worms	c) Adware	d) virus
--------------	----------	-----------	----------

Correct Answer
Worms

97. The receiving process of a modem called.

a) Receiver	b) Sender	c) Demodulation	d) Modulation
-------------	-----------	-----------------	---------------

Correct Answer
Demodulation

98. An expression that represents a numeric value is called:

a) Logical expression	b) Arithmetic expression	c) Common expression	d) None of the above
-----------------------	--------------------------	----------------------	----------------------

Correct Answer

Arithmetic expression

99. | a keyboard key combination which is used to cut the data in spreadsheet with:

a) Ctrl + x

b) Alt + x

c) Ctrl + z

d) None of these

Correct Answer

Ctrl + x

100. | In which stage the problem is observing carefully:

a) Coding

b) Designing

c) Testing

d) None of the above

Correct Answer

Coding

Computer Grade 8 MCQs

Student Name: _____ Roll No. _____ Marks Obtained/Total Marks: _____ / 0

Class: Eight Subject Name: Computer 8 Date: _____

I) Tick the Correct Option:

(All questions / options - 100 / 0) 0 Marks

1. McAfee is the name of:

a) An antivirus program	b) A computer program	c) A computer hardware	d) A game
-------------------------	-----------------------	------------------------	-----------

2. The value which is given at the timing of creating a program called as:

a) Expression	b) Constant	c) Equation	d) None of these
---------------	-------------	-------------	------------------

3. comparison operators are also known as :

a) Relational	b) Assignment	c) Arithmetic	d) None of these
---------------	---------------	---------------	------------------

4. To share a peripheral device we attach to it.

a) A computer	b) A telephone	c) A computer network	d) A monitor
---------------	----------------	-----------------------	--------------

5. Norton Antivirus software developed by:

a) McAfee	b) Symantec	c) AVG	d) NORTAN
-----------	-------------	--------	-----------

6. Companies that are writing antivirus software:

a) McAfee	b) Symantec	c) AVG	d) All of them
-----------	-------------	--------	----------------

7. Which of the following tasks are performed by most of the algorithms:

a) Input	b) Output	c) Processing	d) All of the above
----------	-----------	---------------	---------------------

8. The uppermost bar in spreadsheet is:

a) Tool bat	b) Menu Bar	c) Title barNo
-------------	-------------	----------------

9. A program or a set of programs that causes extensive damage to your computer called:

a) Extensive Program	b) Bacteria	c) Virus	d) All of these
----------------------	-------------	----------	-----------------

10. The computer virus spread from:

a) a sick person	b) a person who is suffering from malaria	c) someone who is suffering from common cold	d) One computer to another computer by copying itself
------------------	---	--	---

11. A string constant is a sequence of

a) Numeric characters	b) Alphanumeric Characters	c) Alphabetic characters	d) None of the above
-----------------------	----------------------------	--------------------------	----------------------

12. The oldest services for sending data over a cellular communication network is know as.

a) Cellular telephone	b) Satellite stelephon	c) Cellular digital	d) A geostationary
-----------------------	------------------------	---------------------	--------------------

sets		packet data	satellie
------	--	-------------	----------

13. The computer used a a server, controls access to the.

a) New computer networks	b) Internet and telephone	c) Hardware software and other devices on the network	d) Modern and old modals
--------------------------	---------------------------	---	--------------------------

14. The character used for integer variable is:

a) %	b) !	c) &	d) None of the above
------	------	------	----------------------

15. Different types of viruses found in:

a) Unknown websites	b) New Websites	c) Insecure websites	d) CMS Websites
---------------------	-----------------	----------------------	-----------------

16. A cell address is the basic unit for data:

a) Storing	b) Deleting	c) Inserting	d) None of these
------------	-------------	--------------	------------------

17. For editing the data in active cell we press:

a) F2	b) F4	c) F9	d) F1
-------	-------	-------	-------

18. In GW-BASIC every program ends with:

a) String	b) Variable	c) Constant	d) None of the above
-----------	-------------	-------------	----------------------

19. The intersection of column C and Row 5 has the address:

a) 5C	b) C5	c) C1-5	d) C5-1
-------	-------	---------	---------

20. Basic was developed by:

a) John smith	b) Pascal	c) John Kemeny and Thomas Kurtz	d) None of the above
---------------	-----------	---------------------------------	----------------------

21. Any electronic device that is used to receive data called as.

a) Monitor	b) Input device	c) Telephone	d) Receiving device
------------	-----------------	--------------	---------------------

22. What is the cell address and cell range?

23. The total number of basic relational operators are:

a) four	b) six	c) eight	d) ten
---------	--------	----------	--------

24. The servers on a network that performs only one specific task called.

a) Special servers	b) Client	c) Dedicated servers	d) Internet computer
--------------------	-----------	----------------------	----------------------

25. The symbol for relational operators for equal to is:

a) <	b) >	c) =	d) < =
------	------	------	--------

26. In flow chart all necessary requirements should be listed in:

a) a logical order	b) a alphabetical order	c) a problem	d) strange form
--------------------	-------------------------	--------------	-----------------

27. In cellular communication the bands of radio spectrum used are.

a) 324 to 349 MHz and 269 to 294 MHz	b) 424 to 449 MHz and 469 to 894 MHz	c) 524 to 549 MHz and 569 to 594 MHz	d) 824 to 849 MHz and 869 to 894 MHz
--------------------------------------	--------------------------------------	--------------------------------------	--------------------------------------

28. A constant can be:

--	--	--	--

a) Long or Short	b) New or old	c) Numeric or string	d) None of the above
------------------	---------------	----------------------	----------------------

29. The relational operator for greater than and equal to is:

a) <	b) > =	c) >	d) None of the above
------	--------	------	----------------------

30. The simplest form of algorithm is:

a) complete form algorithm	b) step form algorithm	c) particular form algorithm	d) None
----------------------------	------------------------	------------------------------	---------

31. The symbol  represents:

a) Start	b) End	c) Input	d) None
----------	--------	----------	---------

32. When we press the enter key after completion of data entry the cursor:

a) Stops	b) vanishes	c) vibrates	d) automatically moves to next cell
----------	-------------	-------------	-------------------------------------

33. The diamond symbol represents the:

a) Decision making	b) Input	c) Output	d) Processing
--------------------	----------	-----------	---------------

34. The Global positioning system is a.

a) Central switching station	b) Radio navigation sytem	c) Cellular communication	d) Central position station
------------------------------	---------------------------	---------------------------	-----------------------------

35. Total types of modem are.

a) 2	b) 3	c) 4	d) 5
------	------	------	------

36. MS excel is a:

a) Spreadsheet software	b) Database software	c) Application software	d) System Software
-------------------------	----------------------	-------------------------	--------------------

37. The worms does not spread from file to file but from:

a) Internet to computer	b) file to computer	c) virus to virus	d) computer to computer
-------------------------	---------------------	-------------------	-------------------------

38. Spreadsheet in office is used for:

a) Arranging data and storing information	b) Gathering data and printing	c) Gathering data and saving	d) None of these
---	--------------------------------	------------------------------	------------------

39. GPS stand for.

a) Global positioning system	b) Grand positioning system	c) Great position system	d) Globalization positioning system
------------------------------	-----------------------------	--------------------------	-------------------------------------

40. In GW -BASIC variables can be used without:

a) line number	b) number	c) declaration	d) strings
----------------	-----------	----------------	------------

41. In GW-BASIC the command LOAD is used :

a) Load a program file from disk to main memory	b) Clear screen	c) Save the program to disk	d) none of these
---	-----------------	-----------------------------	------------------

42. The satellite that remain stationary approximately 23300 miles above the earth called as.

a) Communication	c) Geostationary
------------------	------------------

satellite	b) Television satellite	satellite	d) Nuclear stations
-----------	-------------------------	-----------	---------------------

43. The operator that is used to compare two values is called:

a) Assignment operator	b) Relational operator	c) Equal operator	d) None of the above
------------------------	------------------------	-------------------	----------------------

44. In cellular communication a geographical area is divided.

a) In wide area network	b) into a LAN	c) Wifi networks	d) Into a grid
-------------------------	---------------	------------------	----------------

45. The formula for multiplication in excel is:

a) A1 * A2	b) =A1 * A2	c) MUL(A1 : A2)	d) None of these
------------	-------------	-----------------	------------------

46. A computer virus is written in a:

a) Computer language	b) Human language	c) Binary language	d) English language
----------------------	-------------------	--------------------	---------------------

47. In a computer the most valuable thing is its:

a) processor	b) hard disk	c) ram	d) data
--------------	--------------	--------	---------

48. For start in a flow chart we use the symbol:

a)	b)	c)	d) None of the above
----	----	----	----------------------

49. Symantec is the registered name of:

a) A hacker	b) a virus	c) An antivirus	d) None of these
-------------	------------	-----------------	------------------

50. In a computer the thing that damages the data most is:

a) a virus	b) to shut down computer without saving	c) not save data every two seconds	d) not to let computer takes rest after every 10 minutes
------------	---	------------------------------------	--

51. In GW- BASIC every program must begin with :

a) String	b) Variable	c) Line number	d) END statement
-----------	-------------	----------------	------------------

52. Programming languages are:

a) Binary Language	b) Computer language	c) Low level language	d) None of the above
--------------------	----------------------	-----------------------	----------------------

53. We can open MS Excel from:

a) My computer	b) Recycle bin	c) Start menu	d) Documents
----------------	----------------	---------------	--------------

54. The shortcut key for paste the data is:

a) Ctrl + v	b) Alt + V	c) Ctrl + y	d) None of these
-------------	------------	-------------	------------------

55. The operator that is used to assign a value to a variable:

a) + operator	b) - operator	c) = operator	d) No
---------------	---------------	---------------	-------

56. Most common devices used to transfer data between computers known as:

a) A floppy disk	b) USB Flash drive	c) Hard disk	d) CDs
------------------	--------------------	--------------	--------

57. The types of computer architecture or network model are.

a) 1	b) 2	c) 3	d) 4
------	------	------	------

58. A command which is used to exit from GW-BASIC and return to operate system environment:

a) SYSTEM	b) SAVE	c) LIST	d) None of the above
-----------	---------	---------	----------------------

59. An error caused by wrong syntax written in program is called:

a) Logical error	b) Syntax error	c) Runtime error	d) Data error
------------------	-----------------	------------------	---------------

60. A signal that has finite number of values between its minimum and maximum possible value called as.

a) Digital signal	b) Analog signal	c) Simple signal	d) Short signal
-------------------	------------------	------------------	-----------------

61. The geostationary satellite are used as.

a) Computer network	b) Television network	c) Relay stations	d) Radio station
---------------------	-----------------------	-------------------	------------------

62. A flow chart is the pictorial representation of:

a) a flow chart	b) a computer program	c) an algorithm	d) None
-----------------	-----------------------	-----------------	---------

63. In Microsoft excel we can fill data automatically in different cell with:

a) Formula	b) Function	c) Equal Sign	d) Fill Handle
------------	-------------	---------------	----------------

64. The * operator is used for:

a) Multiplication	b) Addition	c) Subtraction	d) Division
-------------------	-------------	----------------	-------------

65. Example of communication devices are.

a) Modem, NIC, router	b) NIC, switch, printer	c) Network card, scanner, router	d) Modem, Bluetooth, bouter
-----------------------	-------------------------	----------------------------------	-----------------------------

66. Status bar shows the:

a) figures of rows	b) figures of columns	c) Alphabet rows	d) Basic information about the status of the spreadsheet
--------------------	-----------------------	------------------	--

67. The satellite remains in the space almost.

a) 23300 miles above the earth	b) 2300 miles above the earth	c) 2000 miles above the earth	d) 200 miles above the earth
--------------------------------	-------------------------------	-------------------------------	------------------------------

68. A compiler converts all the source code into machine code creating an:

a) source code	b) executable file	c) inside copy	d) None of the above
----------------	--------------------	----------------	----------------------

69. Modem is an abbreviation of.

a) Module/Demodule	b) Modulator/Demodulator	c) Mode/Demode	d) Modulation/Demodulation
--------------------	--------------------------	----------------	----------------------------

70. After writing a program in source code the programmer convert it into:

a) Program file	b) Save file	c) Machine code	d) None of the above
-----------------	--------------	-----------------	----------------------

71. The clients on a network send requests to a.

a) Modem	b) Server	c) Router	d) Switch
----------	-----------	-----------	-----------

72. A statement which is used to get data from the user during the execution of program is:

a) INPUT	b) PRINT	c) LIST	d) LOAD
----------	----------	---------	---------

73. The effective range of Bluetooth device is.

a) 10 feet	b) 32 feet	c) 10 miles	d) 32 meters
------------	------------	-------------	--------------

74. The maximum length of string constant is:

a) 55 Characters	b) 155 characters	c) 255 characters	d) None of the above
------------------	-------------------	-------------------	----------------------

75. A formula is a:

a) Mathematical Expression	b) Mathematical data	c) Mathematical information	d) None of these
----------------------------	----------------------	-----------------------------	------------------

76. After designing our algorithm we verify it through:

a) Flow chart	b) Comparison	c) Processing	d) Desk Checking
---------------	---------------	---------------	------------------

77. A constant is a quality whose value cannot be:

a) Read	b) Printed	c) Changed	d) memorized
---------	------------	------------	--------------

78. 1 s and 0 s called:

a) Numbers	b) Arithmetic	c) Binary Number system	d) none of these
------------	---------------	-------------------------	------------------

79. 1,2,3 shows the name of:

a) Rows	b) Columns	c) Cells	d) None of these
---------	------------	----------	------------------

80. Which of the following operators processed first:

a) ^ (Exponent)	b) Multiplication or Division	c) MOD (Modulus)	d) None of the above
-----------------	-------------------------------	------------------	----------------------

81. The satellite communication consists of

a) Several microwave mediums	b) Several radio wave communication	c) Earth stations and a satellite	d) Many users of televisions
------------------------------	-------------------------------------	-----------------------------------	------------------------------

82. Mr. Arthur C. Clark gave the idea of.

a) GPS technology	b) Satellite technology	c) Cellular technology	d) Bluetooth technology
-------------------	-------------------------	------------------------	-------------------------

83. In cellular communication each section of this grid is a king of.

a) Network	b) Area	c) Cell	d) Telephone
------------	---------	---------	--------------

84. In GW-BASIC the command RUN is used to:

a) Compile a program	b) Execute the program	c) Save the program on disk	d) None of the above
----------------------	------------------------	-----------------------------	----------------------

85. Coaxial cable used in.

a) WLAN	b) LAN	c) WAN	d) PAN
---------	--------	--------	--------

86. Antivirus can protect computer by:

a) Updating and Scanning	b) installing and scanning	c) Shutdown and net browsing	d) Installing and shutdown
--------------------------	----------------------------	------------------------------	----------------------------

87. At the right hand of the worksheet on vertical side is the:

a) Vertical scroll	b) Cell address	c) Tool bar	d) Formula bar
--------------------	-----------------	-------------	----------------

88. For End in a flow chart we use the symbol:

a) 	b) 	c) 	d) 
--	--	--	--

89. Each MS-Excel file carries extension:

a) Excel	b) .xcl	c) .xlsx	d) .xdl
----------	---------	----------	---------

90. A group of adjacent cells in a worksheet is called:

a) Ranfge	b) values	c) Label	d) Data
-----------	-----------	----------	---------

91. The virus like malicious programs that read e-mail addresses and automatically send email to all addresses is called:

a) Tragon horse	b) macro virus	c) worms	d) adware
-----------------	----------------	----------	-----------

92. Spreadsheet use ----- to express relationship of two or more cells:

a) Formulas	b) Symbols	c) Commands	d) Sheets
-------------	------------	-------------	-----------

93. A maximum numbers of characters can be used for naming a cell or a range:

a) 255	b) 259	c) 260	d) 275
--------	--------	--------	--------

94. How many steps are involving to solve a problem:

a) Three	b) Five	c) Four	d) Six
----------	---------	---------	--------

95. The symbol used for relational operator in computer in computer programming:

a) /	b) =	c) < >	d) *
------	------	--------	------

96. SQL slammer is an example of:

a) Antivirus	b) Worms	c) Adware	d) virus
--------------	----------	-----------	----------

97. The receiving process of a modem called.

a) Receiver	b) Sender	c) Demodulation	d) Modulation
-------------	-----------	-----------------	---------------

98. An expression that represents a numeric value is called:

a) Logical expression	b) Arithmetic expression	c) Common expression	d) None of the above
-----------------------	--------------------------	----------------------	----------------------

99. a keyboard key combination which is used to cut the data in spreadsheet with:

a) Ctrl + x	b) Alt + x	c) Ctrl + z	d) None of these
-------------	------------	-------------	------------------

100. In which stage the problem is observing carefully:

a) Coding	b) Designing	c) Testing	d) None of the above
-----------	--------------	------------	----------------------
