Question # 1 of 10 (Start time: 12:06:10 PM, 09 August 2020)

Total Marks: 1

The information about interrupt vector is given in 8-bits, from bit 0 to 7, which is translated to bit _____ on the data bus.

Select the correct option

- | | | |
|----------------------------------|----------|---|
| <input checked="" type="radio"/> | 16 to 23 | / |
| <input type="radio"/> | 11 to 18 | / |
| <input type="radio"/> | 0 to 7 | / |
| <input type="radio"/> | 8 to 15 | / |

CS501:Semester Quiz # 01

Question # 2 of 10 (Start time: 12:06:41 PM, 09 August 2020)

_____ is the simplest form for representing a signed number

Select the correct option

- | | |
|----------------------------------|----------------------------------|
| <input type="radio"/> | Biased Representation |
| <input type="radio"/> | Diminished Radix Compliment Form |
| <input checked="" type="radio"/> | Sign Magnitude Form |
| <input type="radio"/> | None of the given |

Question # 3 of 10 (Start time: 12:06:58 PM, 09 August 2020)

_____ signal is used in printer with DB-25 interface to reset its controller.

Select the correct option

- | | |
|----------------------------------|--------|
| <input type="radio"/> | #PE |
| <input type="radio"/> | #STROB |
| <input checked="" type="radio"/> | #INIT |
| <input type="radio"/> | #SLCT |

Question # 4 of 10 (Start time: 12:07:16 PM, 09 August 2020)

Total

A component connected to the system bus and having control of it during a particular bus cycle is called_____.

Select the correct option

- | | |
|----------------------------------|------------------|
| <input type="radio"/> | Slave component |
| <input checked="" type="radio"/> | Master component |
| <input type="radio"/> | System bus |
| <input type="radio"/> | Buffer component |

Question # 5 of 10 (Start time: 12:07:36 PM, 09 August 2020)

Most parallel I/O ports used with peripheral devices are mapped on a range of _____.

Select the correct option

- | | |
|----------------------------------|----------------------|
| <input type="radio"/> | Bus addresses |
| <input type="radio"/> | Direct memory Access |
| <input checked="" type="radio"/> | contiguous addresses |
| <input type="radio"/> | Cache |

CS501:Semester Quiz # 01

Question # 6 of 10 (Start time: 12:07:52 PM, 09 August 2020)

_____ is/are example(s) of synchronous communication.

Select the correct option

<input checked="" type="radio"/>	Register to Register
<input type="radio"/>	Register to Memory
<input type="radio"/>	Memory to Memory
<input type="radio"/>	All of the given

Question # 7 of 10 (Start time: 12:08:05 PM, 09 August 2020)

Taking control of the system bus for a few bus cycles is known as _____.

Select the correct option

- | | |
|----------------------------------|--------------------|
| <input type="radio"/> | Bus Stealing |
| <input checked="" type="radio"/> | Cycle Stealing |
| <input type="radio"/> | Cycle Transferring |
| <input type="radio"/> | None of given |

Question # 8 of 10 (Start time: 12:08:20 PM, 09 August 2020)

In a printer with DB-25 interface, _____ signal is better for edge triggered systems.

Select the correct option

- | | |
|----------------------------------|---------|
| <input type="radio"/> | BUSY# |
| <input type="radio"/> | PE# |
| <input checked="" type="radio"/> | ACKNLG# |
| <input type="radio"/> | STROB# |

Question # 9 of 10 (Start time: 12:08:37 PM, 09 August 2020)

For input ports, the incoming data should be placed on the data bus only during the I/O read bus cycle. For this purpose, _____ are used.

Select the correct option

<input type="radio"/>	Flip Flops
<input checked="" type="radio"/>	Tri-state Buffers
<input type="radio"/>	AND Gates
<input type="radio"/>	Registers

Question # 10 of 10 (Start time: 12:08:54 PM, 09 August 2020)

How can you define an interrupt?

Select the correct option

- | | |
|----------------------------------|--|
| <input type="radio"/> | A process where an external device can speedup the working of the microprocessor |
| <input type="radio"/> | A process where memory can speed up programs execution speed |
| <input checked="" type="radio"/> | A process where an external device can get the attention of the microprocessor |
| <input type="radio"/> | A process where input devices can takeover the working of the microprocessor |

2nd account

CS501:Semester Quiz # 01

Question # 1 of 10 (Start time: 12:20:08 PM, 09 August 2020)

ET = _____.

Select the correct option

- | | |
|----------------------------------|--------------------------|
| <input type="radio"/> | $CP \times IC \times T$ |
| <input checked="" type="radio"/> | $CPI \times IC \times T$ |
| <input type="radio"/> | $CPI / IC \times T$ |
| <input type="radio"/> | $CPI \times IC / T$ |
- 

Question # 2 of 10 (Start time: 12:20:59 PM, 09 August 2020)

In 8086/8088 processor, interrupt vector table is located at the memory location _____.

Select the correct option

<input checked="" type="checkbox"/>	0
<input type="checkbox"/>	4
<input type="checkbox"/>	256
<input type="checkbox"/>	1024

Question # 3 of 10 (Start time: 12:21:20 PM, 09 August 2020)

Every time you press a key, an interrupt is generated.
This is an example of

Select the correct option

<input checked="" type="radio"/>	Hardware interrupt
<input type="radio"/>	Software interrupt
<input type="radio"/>	All of the given
<input type="radio"/>	None of the given

Question # 4 of 10 (Start time: 12:21:45 PM, 09 August 2020)

Most parallel I/O ports used with peripheral devices are mapped on a range of _____.

Select the correct option

- Bus addresses
 - Direct memory Access
 - contiguous addresses
 - Cache
- 

Question # 5 of 10 (Start time: 12:22:05 PM, 09 August 2020)

Which is the last instruction of the ISR that is to be executed when the ISR terminates?

Select the correct option

<input checked="" type="radio"/>	IRET
<input type="radio"/>	IRQ
<input type="radio"/>	INT
<input type="radio"/>	NMI

Question # 6 of 10 (Start time: 12:22:22 PM, 09 August 2020)

How can you define an interrupt?

Select the correct option

- A process where an external device can speedup the working of the microprocessor
- A process where memory can speed up programs execution speed
- A process where an external device can get the attention of the microprocessor
- A process where input devices can takeover the working of the microprocessor

Question # 7 of 10 (Start time: 12:22:40 PM, 09 August 2020)

A software routine performed when an interrupt is received by the computer is called as -----

Select the correct option

- Interrupt
- Interrupt handler
- Exception
- Trap

Question # 8 of 10 (Start time: 12:23:00 PM, 09 August 2020)

Why DMA is faster than Programmer I/O technique because?

Select the correct option

- | | |
|----------------------------------|--|
| <input type="radio"/> | DMA transfers data directly using CPU. |
| <input checked="" type="radio"/> | DMA transfers data directly without using CPU. |
| <input type="radio"/> | DMA uses buffers with CPU |
| <input type="radio"/> | DMA uses interrupted driven I/O |

[Click to Save Answer 8](#)

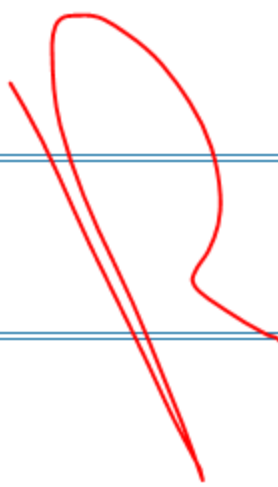

Question # 9 of 10 (Start time: 12:23:16 PM, 09 August 2020)

Given an m-digit base b number x, the _____ of x is

$$x^c = (b^m - x) \bmod b^m$$

Select the correct option

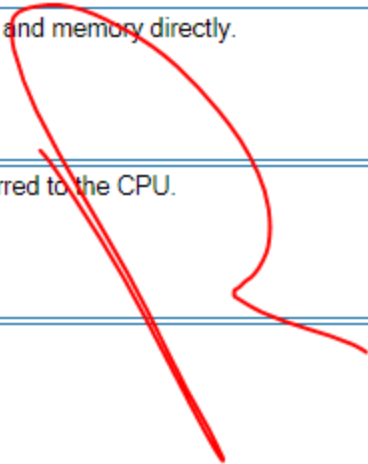

<input checked="" type="radio"/>	Radix Compliment
<input type="radio"/>	Diminished Radix Compliment
<input type="radio"/>	Signed Magnitude Form
<input type="radio"/>	Biased Representation

Question # 10 of 10 (Start time: 12:23:35 PM, 09 August 2020)

How does DMA saves CPU time?

Select the correct option

- | | |
|----------------------------------|--|
| <input checked="" type="radio"/> | By controlling data transfer between I/O device and memory directly. |
| <input type="radio"/> | By storing all data in a buffer to be later transferred to the CPU. |
| <input type="radio"/> | By periodically polling. |
| <input type="radio"/> | By issuing an interrupt request to the CPU to request attention. |
- 

3rd account

Question # 1 of 10 (Start time: 12:26:20 PM, 09 August 2020)

Select the parts of a hard disk.

Select the correct option

- | | |
|----------------------------------|-------------------------------------|
| <input type="radio"/> | Header only |
| <input type="radio"/> | Data section and a trailer |
| <input type="radio"/> | Data section only |
| <input checked="" type="radio"/> | Header, data section and a trailer. |

Question # 2 of 10 (Start time: 12:26:37 PM, 09 August 2020)

----- allows a peripheral to read and write memory without intervention by the CPU.

Select the correct option

- | | |
|----------------------------------|---------------------------|
| <input type="radio"/> | Programmed I/O |
| <input type="radio"/> | Interrupt driven I/O |
| <input checked="" type="radio"/> | Direct memory access(DMA) |
| <input type="radio"/> | Polling |

Question # 3 of 10 (Start time: 12:26:54 PM, 09 August 2020)

The Pentium does allow the use of some part of its _____ accumulator register EAX

Select the correct option

- | | |
|----------------------------------|---------|
| <input type="radio"/> | 8 bits |
| <input type="radio"/> | 16 bits |
| <input checked="" type="radio"/> | 32 bits |
| <input type="radio"/> | 64 bits |

Question # 4 of 10 (Start time: 12:27:07 PM, 09 August 2020)

For input ports, the incoming data should be placed on the data bus only during the I/O read bus cycle. For this purpose, _____ are used.

Select the correct option

<input type="radio"/>	Flip Flops
<input checked="" type="radio"/>	Tri-state Buffers
<input type="radio"/>	AND Gates
<input type="radio"/>	Registers

Question # 5 of 10 (Start time: 12:27:26 PM, 09 August 2020)

Total Mark

A component connected to the system bus and having control of it during a particular bus cycle is called_____.

Select the correct option

- | | |
|----------------------------------|------------------|
| <input type="radio"/> | Slave component |
| <input checked="" type="radio"/> | Master component |
| <input type="radio"/> | System bus |
| <input type="radio"/> | Buffer component |

Question # 6 of 10 (Start time: 12:27:44 PM, 09 August 2020)

Total M

Which I/O technique will be used by a sound card that may need to access data stored in the computer's RAM?

Select the correct option

- | | |
|----------------------------------|---------------------------|
| <input type="radio"/> | Programmed I/O |
| <input type="radio"/> | Interrupt driven I/O |
| <input checked="" type="radio"/> | Direct memory access(DMA) |
| <input type="radio"/> | Polling |

Question # 7 of 10 (Start time: 12:28:01 PM, 09 August 2020)

Total Marks: 1

In the little-endian format exchanging data between computers, the data transmitted by one will be received in a "swapped" form by the other.

Select the correct option

<input type="radio"/>	Organized	//
<input type="radio"/>	Signals	//
<input checked="" type="radio"/>	Swapped	//
<input type="radio"/>	Arranged	//

Question # 8 of 10 (Start time: 12:28:19 PM, 09 August 2020)

Total Marks:

A computer interface is an _____ circuit that matches the requirements of the two subsystems between which it is connected

Select the correct option

<input type="radio"/>	Digital	//
<input checked="" type="radio"/>	Electronic	//
<input type="radio"/>	Primary	//
<input type="radio"/>	Obituary	//

Question # 9 of 10 (Start time: 12:28:35 PM, 09 August 2020)

Total Marks: 1

In which one of the following methods for resolving the priority, the device with the highest priority is placed in the first position, followed by lower-priority devices up to the device with the lowest priority, which is placed last in the series?

Select the correct option

<input type="radio"/>	Asynchronous	//
<input checked="" type="radio"/>	Daisy-Chaining Priority	//
<input type="radio"/>	Parallel	//
<input type="radio"/>	Semi-synchronous	//

Question # 10 of 10 (Start time: 12:28:52 PM, 09 August 2020)

Total Marks: 1

Every interrupt handler has an interrupt return (IRET) instruction, this instruction is an example of _____ return.

Select the correct option

<input type="radio"/>	NEAR	//
<input checked="" type="radio"/>	FAR	//
<input type="radio"/>	SHORT	//
<input type="radio"/>	RELATIVE	//

4th account

Question # 2 of 10 (Start time: 12:36:11 PM, 09 August 2020)

Total

A software routine performed when an interrupt is received by the computer is called as -----

Select the correct option

- Interrupt
- Interrupt handler
- Exception
- Trap

Question # 3 of 10 (Start time: 12:36:29 PM, 09 August 2020)

Total Marks: 1

Identify the following type of serial communication error condition:
"The prior character that was received was not still read by the CPU and is over written by a new received character."

Select the correct option

<input type="radio"/>	Framing error
<input type="radio"/>	Parity error
<input checked="" type="radio"/>	Overrun error
<input type="radio"/>	Under-run error

Question # 4 of 10 (Start time: 12:36:47 PM, 09 August 2020)

Taking control of the system bus for a few bus cycles is known as _____.

Select the correct option

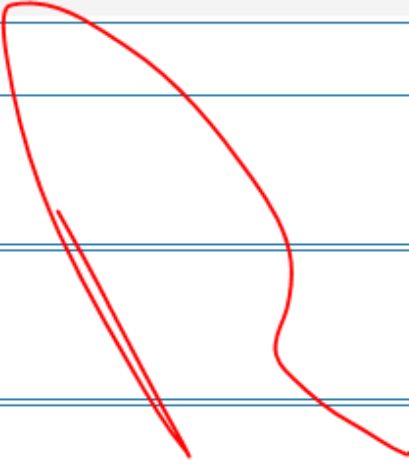

- Bus Stealing
- Cycle Stealing
- Cycle Transferring
- None of given

Question # 5 of 10 (Start time: 12:37:01 PM, 09 August 2020)

What is the status of the ACKNLG# signal when a character is completely received by the printer?

Select the correct option

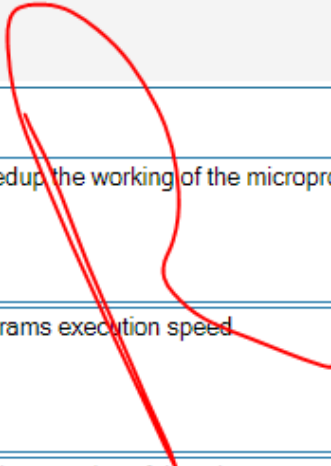

- | | |
|----------------------------------|--------------------------|
| <input type="radio"/> | It goes from low to high |
| <input checked="" type="radio"/> | It goes from high to low |
| <input type="radio"/> | It toggles its state |
| <input type="radio"/> | It remains unaffected |
- 

Question # 6 of 10 (Start time: 12:37:16 PM, 09 August 2020)

To

How can you define an interrupt?

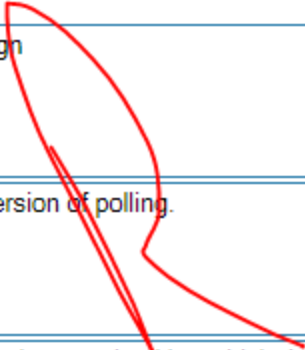

Select the correct option

- | | |
|----------------------------------|--|
| <input type="radio"/> | A process where an external device can speedup the working of the microprocessor |
| <input type="radio"/> | A process where memory can speed up programs execution speed |
| <input checked="" type="radio"/> | A process where an external device can get the attention of the microprocessor |
| <input type="radio"/> | A process where input devices can takeover the working of the microprocessor |
- 

Question # 7 of 10 (Start time: 12:38:45 PM, 09 August 2020)

How Interrupt driven I/O is better than polling because?

Select the correct option

- | | |
|----------------------------------|---|
| <input type="radio"/> | Interrupt driver I/O is easy to design |
| <input type="radio"/> | Interrupt driver I/O is enhanced version of polling. |
| <input checked="" type="radio"/> | Interrupt driver I/O does not waste time on checking which device is available. |
| <input type="radio"/> | Interrupt driven I/O is easy to program. |
- 

Question # 8 of 10 (Start time: 12:39:08 PM, 09 August 2020)

T

For input ports, the incoming data should be placed on the data bus only during the I/O read bus cycle. For this purpose, _____ are used.

Select the correct option

<input type="radio"/>	Flip Flops
<input checked="" type="radio"/>	Tri-state Buffers
<input type="radio"/>	AND Gates
<input type="radio"/>	Registers

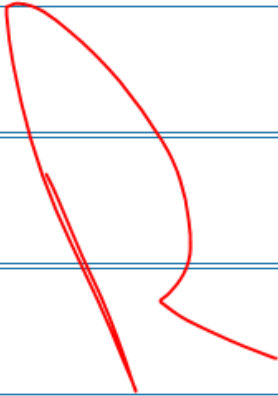

Question # 9 of 10 (Start time: 12:39:27 PM, 09 August 2020)

Total Marks: 1

In the little-endian format exchanging data between computers, the data transmitted by one will be received in a "swapped" form by the other.

Select the correct option

<input type="radio"/>	Organized	//
<input type="radio"/>	Signals	//
<input checked="" type="radio"/>	Swapped	//
<input type="radio"/>	Arranged	//

Question # 10 of 10 (Start time: 12:39:49 PM, 09 August 2020)

Total Marks: 10

Which I/O technique will be used by a sound card that may need to access data stored in the computer's RAM?

Select the correct option

<input type="radio"/>	Programmed I/O
<input type="radio"/>	Interrupt driven I/O
<input checked="" type="radio"/>	Direct memory access(DMA)
<input type="radio"/>	Polling

5th account

Question # 1 of 10 (Start time: 12:53:10 PM, 09 August 2020)

Along with information bits we add up another bit which is called the _____ bit.

Select the correct option

<input type="radio"/>	CRC
<input type="radio"/>	Hamming
<input type="radio"/>	Error Detection
<input checked="" type="radio"/>	Parity

CS501:Semester Quiz # 01

Question # 2 of 10 (Start time: 12:53:36 PM, 09 August 2020)

Tri-state buffers are used for removing _____.

Select the correct option

- | | |
|----------------------------------|------------------------|
| <input type="radio"/> | Instruction collision |
| <input type="radio"/> | bus collision |
| <input type="radio"/> | Instruction contention |
| <input checked="" type="radio"/> | bus contention |

Question # 3 of 10 (Start time: 12:53:49 PM, 09 August 2020)

Total

In which technique does the hardware directly access host memory for reading or writing independent of CPU?

Select the correct option

<input checked="" type="radio"/>	Direct Memory Access (DMA)
<input type="radio"/>	Programmed I/O
<input type="radio"/>	Interrupt driven I/O
<input type="radio"/>	Polling

Question # 4 of 10 (Start time: 12:54:12 PM, 09 August 2020)

The main issue/s in error control is/are_____.

Select the correct option

<input type="radio"/>	Detection of Error
<input type="radio"/>	Correction of Error
<input checked="" type="radio"/>	Both Detection of Error and Correction of Error
<input type="radio"/>	Avoidance of Error

CS501:Semester Quiz # 01

Question # 5 of 10 (Start time: 12:54:26 PM, 09 August 2020)

The source file of FALSIM should contain _____ text only.

Select the correct option

<input type="radio"/>	Unicode
<input checked="" type="radio"/>	ASCII
<input type="radio"/>	ANSI
<input type="radio"/>	UTF

Question # 6 of 10 (Start time: 12:54:41 PM, 09 August 2020)

The directive _____ is used to define variables.

Select the correct option

<input checked="" type="radio"/>	.equ
<input type="radio"/>	.db
<input type="radio"/>	.sw
<input type="radio"/>	.org

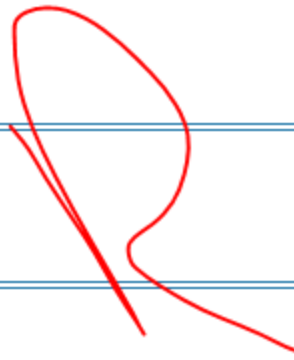

CS501:Semester Quiz # 01

Question # 7 of 10 (Start time: 12:54:58 PM, 09 August 2020)

human works with base 10 and computers work with base _____.

Select the correct option

<input type="radio"/>	8
<input type="radio"/>	10
<input checked="" type="radio"/>	2
<input type="radio"/>	16

Question # 8 of 10 (Start time: 12:55:13 PM, 09 August 2020)

Total Marks:

The information about interrupt vector is given in 8-bits, from bit 0 to 7, which is translated to bit _____ on the data bus.

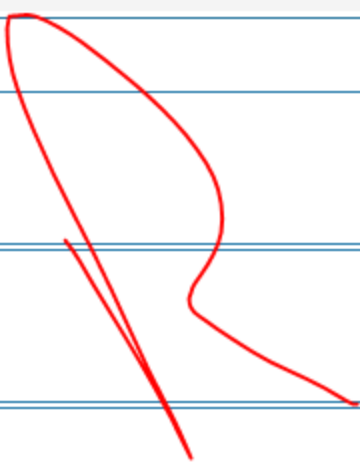

Select the correct option

<input checked="" type="radio"/>	16 to 23	//
<input type="radio"/>	11 to 18	//
<input type="radio"/>	0 to 7	//
<input type="radio"/>	8 to 15	//

Question # 9 of 10 (Start time: 12:55:32 PM, 09 August 2020)

The _____ can be determined from the number of platters and the number of tracks.

Select the correct option

- | | |
|----------------------------------|---------------------|
| <input type="radio"/> | Speed of processing |
| <input type="radio"/> | execution time |
| <input checked="" type="radio"/> | storage capacity |
| <input type="radio"/> | Latency |
- 

Question # 10 of 10 (Start time: 12:55:48 PM, 09 August 2020)

The conversion of numbers from a representation in one base to another is known as _____

Select the correct option

<input checked="" type="radio"/>	Radix Conversion
<input type="radio"/>	Number Representation
<input type="radio"/>	Decimal representation
<input type="radio"/>	Hexadecimal Representation
