

CS101 GRAND OUIZ MCOS (mid-term) (update 2020)

Modules (1-108)

1	compact disk is consist of material:	Reflective
2	Digital versatile disk capacity isMB	600 to 700
3	SSDs stand for	solid state disk
4	ASCII codes have combinations	27
5	Unicode's have a unique pattern ofbits.	21
<mark>6</mark>	MIDI stands for	musical
		instrument
		digital interface
<mark>7</mark>	Integer representation in 2's complement used normallybits	32
8	When data being compressed consist of long sequence of	Run length
	same value, the compression technique is called	encoding
9	SDHC (high capacity) can provideGBs	32
10	Mostly computers have additional storage devices called	Mass storage
11	Most computers have additional memory device called mass storage is	DVD,s and flash drive
12	When you want to search Google or search a query on a particular social media, you can add a symbol?	d):"@"
13	Fact sheet of ENIAC having weight	30 tons
<mark>14</mark>	Example of search engine is	Google, Yahoo
		and MSN
<u>15</u>	The rate at which data transfer to or from disk	transfer rate
<mark>16</mark>	Computer hardware is the collection of of computer system	Physical parts
<u>17</u>	A machine especially one programmer by a computer are called	Robots
<mark>18</mark>	Computer science applications are	7
<mark>19</mark>	Data base learn about will be implemented using	DBMS
	tool like Microsoft access	
20	One of the earlier computer device was the	Abacus
21	1 kilo byte is equal to	1024 byte
<mark>22</mark>	1 tear byte is equal to	1024 GB
23	In one bit we can represent two pattern	0 or 1

<mark>24</mark>	The bit receiver is known as the machine	Main memory
25	RAM access for	Random access
		memory
<mark>26</mark>	The rate at which can be transferred to or from the disk	Transfer rate
<mark>27</mark>	BDs stand for	Blue ray disk
28	CAD stand for	Computer added
		design
<mark>29</mark>	Loosy techniques can often provide than	More
	compression than lossless	
<mark>30</mark>	A variation of dictionary encoding is	Adaptive
		dictionary
		encoding
<mark>31</mark>	is storage organization in which are ordered in	Queue
	FIFO fashion	
<mark>32</mark>	Techniques that allow the steps in the machine cycle to	Pipelining
	overlap	
<mark>33</mark>	MP3 do not require transfer rate more than	64 Kbps
<mark>34</mark>	successfully relayed on communication paths having	MPEG
	40 Mbps	
	Transfer rate.	
<u>35</u>	CPU and main memory connected via	Bus
<mark>36</mark>	MP3 is short for	MPEG layer 3
<u>37</u>	The best known system for compressing audio is	MP3
<mark>38</mark>	The idea of storing a computer's programme in its main	Stored program
	memory is called	concept
<mark>39</mark>	CPU is designed to recognise institutions encoded as	Bit patterns
<mark>40</mark>	Collection of instructions along with the encoding system	Machine
	is called	language
41	RISC stands for	Reduced
		instructions set
		computer
<mark>42</mark>	A request to transfer the contents of a register to a	STORE
4.0	memory cell is called	instructions
43	The commonly used standards for encoding and	MPEG
	compressing audio and video were developed:	
44	CPU consistsparts:	3
45	The use of AND operation is an example of the	Masking
4	process	1170
<mark>46</mark>	8Kbps=:	1KB per second

<mark>47</mark>	Communication between computer and other device is	Controller
48	handling through apparatus called: The ability of a controller to access main memory	DMA
49	called: WAN is abbreviated of:	wide wire network
50	The best known system of compressing audio is	mp3
51	Mp3recording generally require transfer rates of no more	64
	thankbps.	
<mark>52</mark>	To compare sequence of picture in MPEG only some of the pictures called	I – frame
53	A machine CPU and main memory are connected by a collection of wires called?	Bus
<mark>54</mark>	The idea of storing a computer's program in its main memory is called?	Store data
55	The now decode the content of its instruction register and executes its by activating the two's complement addition circulatory with inpits being register?	5 and 6
<mark>56</mark>	The use of AND operation example of the process called ?	Masking
<mark>57</mark>	The result of circular shift is called?	Rotation
<mark>58</mark>	Usb and Fire wire provide several?	Hundred Mbps
<mark>59</mark>	Communication between computing device is handled	Serial and
	over path?	parallel
<u> </u>	GI PG : 0	communication
60	GbPS is?	Billion Bits
61	The portion of an operating system that handles this communication is often called the	:user interface
62	Most file manager allow files to be grouped into a bundle called	<mark>:folder</mark>
<mark>63</mark>	A chain of directories within directions calledpath	Directory
<mark>64</mark>	Components of an operating system's kernel is the	memory manager
<mark>65</mark>	The memory manger reserves of storage space on a magnetic disk	4GB
<mark>66</mark>	Rom stands for	Read only memory
<mark>67</mark>	Culprit that auditing systems are designed to detect in the presence	sniffing software

68	A network of former type is called network	Open
69	Computer network is often classified as:	All of these
70	The technique of holding data for output at a later but	Spooling
	more convenient time is called	
71	A technique that transfer the distribution problem to	Multi cast
	internet routes	
<mark>72</mark>	A programme that enter a computer system disguised as	Trojan horse
	a desirable programmed	
<mark>73</mark>	Transporting audio and video across the internet in real	Streaming
	time is known as	
<mark>74</mark>	If a user is using CGI script on a UNIX server, then the	server side
	script type is called	scripting
<mark>75</mark>	XML stands for	Extensible
		markup language
<mark>76</mark>	OSI stands for	Open system
77	2 In a set Comment of the Control of	interconnection
77	3 Is a software that infects a computer by inserting	Virus
70	itself into programs that already reside in the machine	Woma
<mark>78</mark>	is an autonomous program that transfers itself through a network, taking up residence in computer and	Worm
	forwarding copies of itself to other computer.	
79	Another form of malicious software is	Spyware
80	Dos stands for	Denial of service
81	Problem associated with an abundance of unwanted	Spam
	messages is the proliferation of unwanted email called.	Spani
82	Prevention tool that has filtering connotation is the	Proxy server
83	SSL stands for	Secure socket
		layer
84	Public key is used formessages	Encrypt
<mark>85</mark>	Virus is executed in a computer	Before execution
		of Host
<mark>86</mark>	Explosion of replicated copies that degrade the	. Worm
	performance of legtimate application. This is property of	
<mark>87</mark>	Trojan can enter	through games
		and utility
		package
88	Spyware also called	Sniffing software
<mark>89</mark>	Process of overloading a computer with messages.	DoS

<mark>90</mark>	Software that act as a shield to protection from adverse actions	proxy server
91	Spam filter can distinguish between desired mail and spam	True
<mark>92</mark>	Which key is required to decrypt messages	private key
<mark>93</mark>	Computer Fraud and abuse act Cover	Theft of
		Information and
		worms and
		viruses
94	Repeaters passes signals between	Two original
	repeaters passes signals services	buses
95	A bridge is similar to a	Repeater
96	Peer-to-peer often abbreviated as	P2P
<mark>97</mark>	service allow clients to rent virtual	Amazon's
	computers by the	Elastic Compute
	hour, without concern for where the computer hardware is	Cloud
	actually located.	
<mark>98</mark>	The distinction between the tier-1 and tier-2 ISPs is often	True
	a matter of opinion.	
<mark>99</mark>	An access ISP is essentially an independent internet,	Intranet
	sometimes called	
100	The process of using DNS to perform a translation is	DNS Lookup
	called	
101	VoIP is the abbreviation of	Voice over
		Internet Protocol
102	An enormous portion of current internet traffic is used for	Streaming
	transporting audio and video across the internet in real	
	time, is known as	
103	WWW is the abbreviation of World Wide Web	True
104	A networking technology called, which	Anycast
	enables an end user to automatically connect to the closest	
	server out of a defined group of servers helps to make	
	CDNs practical	
105	A second form of VoIP consists of	Analog
		Telephone
		Adapters
106	The point at which one network is linked to an internet is	Gateway
	offen called	

107	Distributed system in which many independed computer	Cluster
	work closely to gether to provide computation or service	computing
	comparable to a mach larger machine?	
<mark>108</mark>	Each domain must be registerd with ICANN process	Registrars
	handled by companies called?	
109	DNS mean?	Domain name
		System
110	Softwere packages that allow users to access hypertext on	Browsers and
	the internet fall into categories?	Webserver

111	Essentially a notational system by which a text document	HTML
	along with the document's appearance can be encoded as	
	a simple text file	U
112	Hypertext document also contain special symbol called?	Tags
113	URL means?	Uniform
		Resource
		Locator
114	Common Internet brewers include	Firefox, safari
115	The distinction is that a hypertext document also contains	Tags
	special symbol	
116	A traditional hypertext document is similar text file	source version
	because text is HTML - encoded	
117	HTM is essentially a notional system by which text	simple text file
	document's	
118)Music is traditionaly reperseted does not conform the	text file
	character by character	
119	The additional activity by either the browser or the web	client side
	browser	
120	Then it hands these segment known	Packets
121	OSI standard for	Open system
		interconnections
122	Origin perpare a packet it appends a value called	hop count
123	If two functins were performed 'PROCESS LOAN' AND '	If-else method
	REJECT APPRECIATION' what should be structure of	
	problem	
124	What should be sequenc	Problem-devise
		plan-carry plane
125	Stepwise refinement is a strategy to conquere at once	Task
		· · · · · · · · · · · · · · · · · · ·

126	Which strategy is contrast to stepwise refinement	Bottom-up methodology
127	Which has cause Computer science to grow so much	Algorithms and problem solving
128	As a general rule the use of a loop structure produces Of flexibility	higher degree
129	A method of implementing repitition is the iterative structure knows as	Loop
130	Change the state in such a way that it moves towards the termination condition	Modify
131	In each iteration "i" the current value of "i" will With current value of "f"	Multiplied
132	The control of a loop consist of how many activities	Three
133	Repeat loop structure referred to as a	posttest loop
134	If we reach the end of the list without finding the target value our search terminates as	Failure
135	In which collection of instructions called	body of loop
136	Write a for finding maximum number from a list.	pseudo-code
137	The loop will keep executing until remains smaller or equal to n.	I
138	Set of steps that define how a task is performed is called	Algorithm
139	In Unambiguous, the information in the state of the process must be sufficient to determine uniquely and	True
	completely the actions required by each step.	
140	A single algorithm can be represented in	Many ways
141	The sentence, could mean either that	"Visiting
	the grandchildren cause problems when they come to visit	grandchildren
	or that going to see them is problematic.	can be nerve
		racking"
142	One semantic structure is the of a computed	Saving
	value.	
143	Another common semantic structure is no any repeation	True
	execution of a statement or sequence of statements as	
	long as some condition remains true.	
134	In a man in Texas received very high radiations.	1986
135	Which is not the advantage of software verification	None

136	Computer can executeof instructions iin a second	Billions
137	A measure of the execution time necessary for an	D ata
	algorithm to complete work in a set of	
138	In general a recursive function is designed to test for the	Base or
	termination condition often called	degenerative
		case
139	One method of implementing such repetition is the	Loop
	iterative structure known as:	
140	In which execution of function the tested condition we're	process loan
	true. ??	
<u>141</u>	select the entry in the list known as:	test entry
142	Amethodology progresses from the specific to the	bottom up
	general:	
143	the collection of instructions called??	Body
144	the loosely defined problem solving phases presented by	1945
	the mathematicians G.polya in??	
145	Test for termination is performed before the body is	True
	executed in pretest loop:	
<u>146</u>	In insertion sort Algorithms lists are sorted out into:	alphabetical
		<mark>order</mark>
147	IF our target value is not present in oriental list, our	By dividing into
	approach to search will proceed as:	smaller segments
148	Binary search executes each stage of a repetition as a	Recursion
	subtask of the previous stage, known as:	
149	A recursive function is designed to test for:	Degenerative
		and base case
		and termination
		condition (All)

BEST OF LUCK AND JAZAK ALLAH FOR ALL THOSE MEMBERS WHO COPERATE WITH ME AND GROUP ADMINS
